BNY Mellon Stock Index Fund, Inc.

GOAL/APPROACH

The fund seeks to match the performance of the Standard & Poor's 500 Composite Stock Price Index("S&P 500 Index"). To pursue this goal, the fund generally is fully invested in stocks included in the S&P 500 Index, and in futures whose performance is tied to the S&P 500 Index. The fund attempts to have a correlation between its performance and that of the index of at least .95, before expenses. A correlation of 1.00 would mean that the fund and the S&P 500 Index were perfectly correlated. The fund generally invests in all 500 stocks in the S&P 500 Index in proportion to their weighting in the S&P 500 Index. The S&P 500 Index is a capitalization-weighted unmanaged index of 500 common stocks chosen to reflect the industries of the U.S. economy and is often considered a proxy for the stock market in general. The fund may also use stock index futures as a substitute for the sale or purchase of securities.

RISKS

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. The fund's share price fluctuates, sometimes dramatically, which means you could lose money.

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, to varying degrees. The fund uses an **indexing strategy.** It does not attempt to manage market volatility, use defensive strategies or reduce the effects of any long-term periods of poor stock performance.
