

BNY BRINGS THE LATEST IN ETF SOLUTIONS

Choice, Quality and Experience
The BNY ETF Difference

- 1 BNY Mellon Exchange-Traded Funds (ETFs) are designed to offer a compelling alternative to those in the market today across both indexed and actively managed solutions.
- 2 Our index ETFs are built to track their respective indices, utilizing a variety of investment tools and techniques to minimize tracking error, reduce transaction costs and maximize efficiency. Two of these funds are offered at a market-leading price point. **BNY Mellon US Large Cap Core Equity ETF** and **BNY Mellon Core Bond ETF** are zero-fee* ETFs in the largest equity and fixed income US market categories offered to investors without fee waivers or other restrictions, providing investors the benefits that lower expenses can have on their long-term returns.
- 3 BNY is committed to the strength of our intellectual capital. The introduction of new actively managed ETFs enable us to make some of the leading strategies from across our investment specialist firms available to a broader range of investors.

¹ Effective August 1, 2024, BNY Mellon ETF Investment Adviser, LLC (the Adviser) has contractually agreed until at least March 1, 2026, to assume the direct expenses of BNY Mellon Concentrated International ETF so that the fund's total annual operating expenses, including acquired fund fees and expenses (if any), do not exceed 0.65% of the fund's average daily net assets. ² Prior to its conversion the ETF operated as a mutual fund. Shown is the inception date for the BNY Mellon Concentrated Growth ETF predecessor mutual fund (BNY Mellon Tax Managed Growth Fund). The listing date for BKCG is 3/31/25. ³ Effective February 28, 2025, the Adviser has contractually agreed until at least February 28, 2026, to assume the direct expenses of the BNY Mellon Global Infrastructure ETF so that the fund's total annual operating expenses, including acquired fund fees and expenses (if any), do not exceed 0.55% of the fund's average daily net assets.

Please see the funds' prospectuses for additional information on fees.

[†] Gross expenses is the total annual operating expense ratio for the fund, before any fee waivers or expense reimbursements. ^{††} Net Expenses is the total annual operating expense ratio for the fund, after any applicable fee waivers or expense reimbursements. The Net Expenses is the actual fund expense ratio applicable to investors. **Past performance is no guarantee of future results.**

Effective July 1, 2024, the BNY Mellon High Yield Beta ETF was renamed the BNY Mellon High Yield ETF and adopted revised investment policies to seek total return consisting of capital appreciation and income. Please read the Prospectus Supplement for more information.

NOT ALL ETFs MAY BE AVAILABLE TO ALL INVESTORS OR THROUGH ALL BROKER-DEALER PLATFORMS.

FDIC is Federal Deposit Insurance Corp. GBS is Global Benchmark Series. NTR is Net Total Return. NAV is Net Asset Value. ESG is Environmental, Social and Governance.

Investors should consider the investment objectives, risks, charges and expenses of an ETF fund carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about a fund, contact your financial professional or visit [bny.com/investments](https://www.bny.com/investments). Read the prospectus carefully before investing.

ETF shares are listed on an exchange, and shares are generally purchased and sold in the secondary market at market price. At times, the market price may be at a premium or discount to the ETF's per share NAV. In addition, ETFs are subject to the risk that an active trading market for an ETF's shares may not develop or be maintained. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions.

ETFs trade like stocks, are subject to investment risk, including possible loss of principal. The risks of investing in ETFs typically reflect the risks associated with the types of instruments in which the ETF invests. Diversification cannot assure a profit or protect against loss.

Past performance is no guarantee of future results.

RISKS

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with **emerging market countries**. **Bonds** are subject to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **High yield bonds** involve increased credit and liquidity risk than higher-rated bonds and are considered speculative in terms of the issuer's ability to pay interest and repay principal on a timely basis. **Small and midsized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. For a fund which invests significantly in companies that are engaged in the **infrastructure business**, the fund is more susceptible to adverse economic, regulatory, political, legal and other changes affecting such companies. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest

costs in connection with capital construction programs, costs associated with environmental and other regulations, difficulty in raising capital in adequate amounts on reasonable terms in periods of high inflation or unsettled capital markets, the effects of economic slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies, service interruption due to environmental, operational or other mishaps, and other factors. **BNY Mellon Innovators ETF:** There can be no assurance that a company identified as an innovation-driven company by Newton will ultimately introduce a new product or service or that such product or service may not be significantly delayed or have the affect Newton anticipated. The returns on a portfolio of securities that are viewed by Newton as innovation-driven companies may trail the returns of a portfolio that is not limited to securities of innovation-driven companies. Investing only in securities of innovation-driven companies may affect the fund's exposure to certain types of investments and may adversely impact the fund's performance depending on whether such investments are in or out of favor in the market. The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors. **BNY Mellon Women's Opportunities ETF:** The fund's incorporation of Women's Opportunities considerations into its investment approach may cause the fund to make different investments than funds that invest principally in equity securities but do not incorporate Women's Opportunities considerations when selecting investments. Under certain economic conditions, this could cause the fund to underperform funds that do not incorporate Women's Opportunities considerations. The BNY Mellon active ETFs are non-diversified, which means that the funds may invest a relatively high percentage of its assets in a limited number of issuers. Therefore, performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund. The **healthcare sector** is subject to government regulation and reimbursement rates, as well as government approval of products and services, which could have a significant effect on price and availability. Furthermore, the types of products or services produced or provided by healthcare companies quickly can become obsolete. In addition, companies in the healthcare sector can be significantly affected by patent expirations, pricing pressure, and product liability claims. The **information technology** sector has been among the most volatile sectors of the stock market. Information technology companies involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain information technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of information technology stocks than it does in other sectors. Fund investments may decline dramatically in value if anticipated products or services are delayed or cancelled.

Past performance is no guarantee of future results.

The BNY Mellon ETFs are not sponsored, endorsed, sold or promoted by Solactive or Bloomberg Index Services Limited (together the "index provider") and have been licensed for use for certain purposes by BNY. The index provider makes no representation regarding the advisability of investing in BNY Mellon ETFs. The index provider determines the composition of the index and relative weightings of the securities in the index, which is subject to change by the index provider. The index provider publishes information regarding the market value of the index.

The ETF funds will issue (or redeem) fund shares to certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of fund shares known as "Creation Units." BNY Mellon Securities Corporation ("BNYSC"), a subsidiary of the BNY, serves as distributor of the fund. BNYSC does not distribute fund shares in less than Creation Units, nor does it maintain a secondary market in fund shares. BNYSC may enter into selected agreements with Authorized Participants for the sale of Creation Units of fund shares.

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

The Solactive GBS Emerging Markets Large & Mid Cap USD Index NTR is part of the Solactive Global Benchmark Series which includes benchmark indices for developed and emerging market countries. The index intends to track the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in the Emerging Markets. **The Solactive GBS Developed Markets ex United States Large & Mid Cap USD Index NTR** is part of the Solactive Global Benchmark Series which includes benchmark indices for developed and emerging market countries. The index intends to track the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in the Developed Markets excluding the United States. It is calculated as a net total return index in USD and weighted by free-float market capitalization. **The Solactive GBS United States 500 Index** intends to track the performance of the largest 500 companies from the US stock market and is based on the Solactive Global Benchmark Series. Constituents are selected based on company market capitalization and weighted by free float market capitalization. The index is calculated as a total return index in USD and is reconstituted quarterly. **The Solactive GBS United States 400 Index** intends to track the performance of the largest 400 mid cap companies from the US stock market and is based on the Solactive Global Benchmark Series. Constituents are selected based on company market capitalization and weighted by free float market capitalization. The index is calculated as a total return index in USD and is reconstituted quarterly. **The Solactive GBS United States 600 Index** intends to track the performance of the largest 600 small cap companies from the US stock market and is based on the Solactive Global Benchmark Series. Constituents are selected based on company market capitalization and weighted by free float market capitalization. The index is calculated as a total return index in USD and is reconstituted quarterly.

The Bloomberg US Aggregate Total Return Index is designed to measure the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed pass-through securities (agency fixed-rate), commercial mortgage-backed securities (agency and non-agency) and other asset-backed securities having at least one year until final maturity. To be included in the index, securities must be rated investment grade (Baa3/ BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. **The Bloomberg US Corporate High Yield Total Return Index** is designed to measure the US dollar-denominated, high yield (junk), fixed-rate, taxable corporate bond market. Bonds included in the index must have \$150 million or more par amount outstanding and at least one year until final maturity. Bonds are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Securities in the index are updated on the last business day of each month. **The Bank of America Merrill Lynch 3-Month US Treasury Bill Index** is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from

the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. The **S&P 500®** Index is widely regarded as the best single gauge of large-cap US equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. The **MSCI Emerging Markets Index** is a free float-adjusted market capitalization-weighted index that is designed to measure equity market performance of emerging markets. The **MSCI EAFE Index** (Europe, Australasia, Far East) is a free float-adjusted, market capitalization-weighted index that is designed to measure the equity market performance of developed markets, excluding the US and Canada. Reflects reinvestment of net dividends and, where applicable, capital gain distributions. The **ICE Bank of America US Corporate Index** is an unmanaged index comprised of US dollar denominated investment grade corporate debt securities publicly issued in the US domestic market with at least one year remaining term to final maturity. The **S&P Global Infrastructure Index** is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. To create diversified exposure, the index includes three distinct infrastructure clusters: energy, transportation, and utilities. An investor cannot invest directly in any index. The **Russell 1000® Value Index** measures the performance of the large-cap value segment of the US equity universe. It includes those Russell 1000 companies with relatively lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years). The **Russell 3000® Growth Index** measures the performance of the broad growth segment of the US equity universe. It includes those Russell 3000 companies with relatively higher price-to-book ratios, higher forecasted growth rates and higher sales per share historical growth. The index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

“Newton” and/or the “Newton Investment Management” refers to Newton Investment Management Limited and Newton Investment Management North America LLC. Newton is incorporated in the United Kingdom and is authorized and regulated by the Financial Conduct Authority in the conduct of investment business. Newton is registered with the US Securities and Exchange Commission (SEC) as an investment adviser. Newton is a subsidiary of The Bank of New York Mellon Corporation.

Walter Scott & Partners Limited (“Walter Scott”) is an investment management firm authorized and regulated in the United Kingdom by the Financial Conduct Authority in the conduct of investment business. Walter Scott is a subsidiary of The Bank of New York Mellon Corporation.
