

The value of investments can fall. Investors may not get back the amount invested.
Income from investments may vary and is not guaranteed.

BNY MELLON

MULTI-ASSET BALANCED FUND

Combining income
and long-term growth

IMPORTANT INVESTOR INFORMATION

For definitions of the investment related terms included in this document, please refer to the glossary on page 10.

BNY Mellon Multi-Asset Balanced Fund

FUND OBJECTIVE

The Fund aims to achieve a balance between income and capital growth over the long term (5 years or more).

FUND BENCHMARK

A benchmark is a metric or baseline to judge a fund’s performance against. The BNY Mellon Multi-Asset Balanced Fund uses the UK Investment Association Mixed Investment 40-85% Shares NR Sector average as an appropriate benchmark for comparison.

This benchmark is a collection of funds with different investment managers. Both the Fund and the constituents of the benchmark have a range of different investments. Typically, between 40% and 85% of the funds’ portfolios will be invested in company shares.

As an actively managed fund, the Investment Manager can make investment decisions (whether to buy, sell or hold assets) at its discretion. These decisions are made in line with the Fund’s objective and investment policy as disclosed in the Prospectus.

PERFORMANCE – 12-MONTH RETURNS (%)

Period	Jun 2020 to Jun 2021	Jun 2021 to Jun 2022	Jun 2022 to Jun 2023	Jun 2023 to Jun 2024	Jun 2024 to Jun 2025
Fund	16.67	1.07	8.41	12.94	6.21
Benchmark	17.64	-7.08	3.30	11.77	5.57

CALENDAR YEAR PERFORMANCE (%)

Period	2020	2021	2022	2023	2024
Fund	6.49	17.37	-4.23	9.43	10.80
Benchmark	5.09	11.24	-10.00	8.02	8.90

Past performance is not a guide to future performance.

Source for all performance: Lipper as at 30 June 2025. Fund performance for the Institutional Shares W (Accumulation) share class calculated as total return, including reinvested income net of UK tax and charges, based on net asset value. All figures are in GBP terms. The impact of an initial charge (currently not applied) can be material on the performance of your investment. Further information is available upon request.

FUND CHARGES

INSTITUTIONAL SHARES W (ACCUMULATION) SHARE CLASS

One-off charges taken before or after you invest

Below are the maximum amounts that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

	%	Per £1,000 invested
Entry charge	0.00	–
Exit charge	None	–

Charges taken from the Fund over a year

So long as you hold an investment in the Fund you will pay the ongoing charges, which cover the costs of running the Fund. Ongoing charges are deducted from the Fund and, as such, are reflected in its performance. The below ongoing charges are based on expenses calculated on 31 December 2024. They may vary from year to year.

	%	Per £1,000 invested
Ongoing charges	0.69	£6.90

Other fees

In addition to ongoing charges, the expenses that arise from selling or buying investments in the Fund will also be deducted from the Fund and reflected in its performance. These costs will vary from year to year.

When investing in the Fund through a platform or financial adviser, investors may have to pay additional fees. Please ask your financial adviser for details.

INTRODUCTION

Access to the best of both worlds: the growth opportunities of equities, and the income and lower risk of bonds.

Investing doesn't have to involve choosing between shares and bonds, or between income and growth. With a "balanced" fund, you have access to the best of both worlds: the growth opportunities of equities, and the income and lower risk of bonds.

The BNY Mellon Multi-Asset Balanced Fund invests in a mix of individual shares and bonds, as well as cash.

The Fund offers a twice-yearly income while also aiming to provide long-term capital growth.

It invests globally and flexibly, with the managers able to change the percentage of equities and other assets in the Fund to suit market conditions and to take advantage of opportunities.

This brochure summarises the features and benefits of the BNY Mellon Multi-Asset Balanced Fund and its investment process.

Your financial adviser, using their knowledge of your savings goals and appetite for investment risk, will be able to suggest if this is an appropriate fund for your needs.

There is no guarantee the Fund will achieve its objectives.

Investments can be affected by interest rates and inflation trends, which may negatively affect the value of the Fund.

This Fund invests in international markets. This means it is exposed to changes in currency rates, which could affect the value of the Fund.

BNY MELLON MULTI-ASSET BALANCED FUND AT A GLANCE

Balancing income and growth

Offering twice-yearly income while aiming for long-term capital growth. You can choose to receive the income twice a year, or reinvest it in the fund.

Active, direct investment

Seeking to outperform by investing in individual shares and bonds, rather than passively tracking a market index.

Global diversification

Investing globally in a mix of individual shares and bonds, along with cash and alternative assets such as property and renewable energy.

Experienced team

Managed by an expert team from BNY Investments Newton which has a long track record of performance through multiple market cycles.

Competitively priced

You pay just £6.90 a year per £1,000 invested* (plus any fees to your adviser).

WHAT IS A MULTI-ASSET FUND?

Multi-asset funds offer a well-established, convenient way for investors to save for and during retirement. They combine a mix of assets, including shares, bonds and cash, with investments spread across a range of countries and business sectors. This wide diversification helps reduce risk as investors are not “putting all their eggs in one basket”.

WHO IS NEWTON?

BNY Investments Newton seeks to deliver strong investment outcomes to its clients by taking an active, multidimensional and engaged approach, applied across four key disciplines: income and value equities, growth and core equities, specialist equities and multi-asset strategies.

* As at 10 February 2025. Based on the ongoing charge figure (OCF) for the BNY Mellon Multi-Asset Balanced Fund's Institutional Shares W (Income) share class. The OCF represents the amount an investor will pay for the service provided by a fund. It is made up of the manager's fees along with other costs, such as administration.

WHERE THE FUND INVESTS

Regional allocation may not sum to 100% as Other International regions and Cash & others are excluded.

HOW THE FUND WORKS

The Fund is managed using a disciplined four-step investment process for a combination of income and long-term capital growth.

STEP 1:

Identifying big-picture themes

The Fund's investment process starts with the big picture: what are the global themes and long-term trends that are creating opportunities and risk for investors? From the *internet of things* to *financialisation* to *big government*¹, this top-down perspective helps to narrow the universe of companies and markets the managers may wish to invest in.

STEP 2:

Picking the right investments

The managers draw on Newton's global multidimensional research, to help identify attractive investments to tap into specific sector trends. The Fund invests directly in individual shares and bonds, with the managers deciding where best to invest for income and where to seek capital growth.

STEP 3:

Putting it all together

Generally, the Fund will invest a half or more of its portfolio in shares, with the remainder in bonds and cash. This wide diversification helps reduce its overall risk. The amount invested in each individual holding reflects the managers' view on how strong its prospects are versus the risks, as well as how it helps to diversify the Fund.

STEP 4:

Staying flexible

The managers decide the overall mix of investments in the Fund as well as choosing the individual stocks. The Fund is invested without country or sector constraints, and the managers have the flexibility to increase or decrease its equity and other exposures as market conditions change.

GLOSSARY

ABSOLUTE RETURN Aims to achieve a positive return over a set timeframe and in all market conditions, although this is never guaranteed.

ACTIVE MANAGEMENT A process whereby an investment professional actively makes buy, hold and sell decisions and aims to outperform the overall market.

ASSET(S) In this context, investments held in a portfolio, for example stocks, bonds, property and cash.

ASSET ALLOCATION An investment strategy that aims to balance risk and reward by apportioning a portfolio's assets according to an individual's goals, risk tolerance, and investment horizon.

ASSET CLASS A grouping of investments that exhibit similar characteristics and are subject to the same laws and regulations.

BASIC MATERIALS The sector of companies involved in the discovery, development and processing of raw materials. The sector includes the mining and refining of metals, chemical products and forestry products.

BENCHMARK A baseline for comparison against which a fund can be measured.

BOND(S) A loan of money by an investor to a company or government for a stated period of time in exchange for a fixed interest rate payment and the repayment of the initial amount at its conclusion.

CAPITAL GROWTH When the current value of an investment is greater than the initial amount invested.

CONSUMER DISCRETIONARY Goods and services considered non-essential by consumers but desirable if their income is sufficient to purchase them.

CONSUMER STAPLES Goods and services that people are unable or unwilling to cut out of their budgets regardless of their financial situation.

CONVERTIBLE(S)/BOND(S) A convertible bond is a fixed income debt security that yields interest payments, but can be converted into a predetermined number of equity shares. The conversion from the bond to stock can be done at certain times during the bond's life and is usually at the discretion of the bondholder.

DERIVATIVES Financial contracts, set between two or more parties, that derive their value from an underlying asset, group of assets, or benchmark.

DIVERSIFIED/DIVERSIFICATION Investing in a variety of companies or financial instruments, which typically perform differently from one another.

DIVIDEND(S) A sum paid regularly by a company to its investors as a reward for holding their shares.

EQUITY/EQUITIES Shares issued by a company, representing an ownership interest.

FINANCIALS A sector made up of companies that provide financial services.

INDEX/INDICES A portfolio of investments representing a particular market or a portion of it. For example: The FTSE 100 is an index of the shares of the 100 largest companies on the London Stock Exchange.

INDUSTRIALS The industrial goods sector includes stocks of companies that mainly produce capital goods used in manufacturing, resource extraction, and construction.

INFLATION/INFLATIONARY The rate of increase in the cost of living. Inflation is usually quoted as an annual percentage, comparing the average price this month with the same month a year earlier.

MULTI-ASSET An investment containing more than one asset class, such as cash, equity or bond.

PORTFOLIO A collection of investments.

RETURN(S)/RETURNED The gain or loss from an investment over a stated period of time – expressed in either percentage or cash terms.

SECTORS An area of the economy in which businesses share the same or related business activity, product, or service.

STOCK Also known as equity, is a security that represents the ownership of a fraction of the issuing corporation.

YIELD Income received from investments, either expressed as a percentage of the investment's current market value, or dividends received by the holder.
