

BNY Mellon Municipal Bond Infrastructure Fund, Inc.

ANNUAL REPORT

February 28, 2025

BNY Mellon Municipal Bond Infrastructure Fund, Inc.

**Protecting Your Privacy
Our Pledge to You**

THE FUND IS COMMITTED TO YOUR PRIVACY. On this page, you will find the fund's policies and practices for collecting, disclosing, and safeguarding "nonpublic personal information," which may include financial or other customer information. These policies apply to individuals who purchase fund shares for personal, family, or household purposes, or have done so in the past. This notification replaces all previous statements of the fund's consumer privacy policy, and may be amended at any time. We'll keep you informed of changes as required by law.

YOUR ACCOUNT IS PROVIDED IN A SECURE ENVIRONMENT. The fund maintains physical, electronic and procedural safeguards that comply with federal regulations to guard nonpublic personal information. The fund's agents and service providers have limited access to customer information based on their role in servicing your account.

THE FUND COLLECTS INFORMATION IN ORDER TO SERVICE AND ADMINISTER YOUR ACCOUNT. The fund collects a variety of nonpublic personal information, which may include:

- Information we receive from you, such as your name, address, and social security number.
- Information about your transactions with us, such as the purchase or sale of fund shares.
- Information we receive from agents and service providers, such as proxy voting information.

THE FUND DOES NOT SHARE NONPUBLIC PERSONAL INFORMATION WITH ANYONE, EXCEPT AS PERMITTED BY LAW.

Thank you for this opportunity to serve you.

The views expressed in this report reflect those of the portfolio manager(s) only through the end of the period covered and do not necessarily represent the views of BNY Mellon Investment Adviser, Inc. or any other person in the BNY Mellon Investment Adviser, Inc. organization. Any such views are subject to change at any time based upon market or other conditions and BNY Mellon Investment Adviser, Inc. disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a fund in the BNY Mellon Family of Funds are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any fund in the BNY Mellon Family of Funds.

DISCUSSION OF FUND PERFORMANCE AND DISTRIBUTION INFORMATION (Unaudited)

How did the Fund perform last year?

For the 12-month period ended February 28, 2025, BNY Mellon Municipal Bond Infrastructure Fund, Inc. (the “fund”) produced a total return of 3.92% on a net-asset-value basis and 8.65% on a market basis.¹ Over the same period, the fund provided aggregate income dividends of \$.36 per share, which reflects a distribution rate of 3.32%.² In comparison, the Bloomberg U.S. Municipal Bond Index (the “Index”), the fund’s benchmark, posted a total return of 2.96% for the same period.³

What affected the Fund’s performance?

- Markets experienced volatility as investors focused on inflation expectations and monetary policy.
- While markets benefited from interest rate cuts late in 2024, in December investors were surprised by the Fed’s indications that further rate cuts would be on hold for the foreseeable future.
- Sector allocation and security selections in certain segments added most to the fund’s performance. Selections among the education, healthcare and airports segments were positive overall.
- Performance was hampered by the fund’s long duration as rates increased; however, longer bond curve positioning partially offset the duration impact.

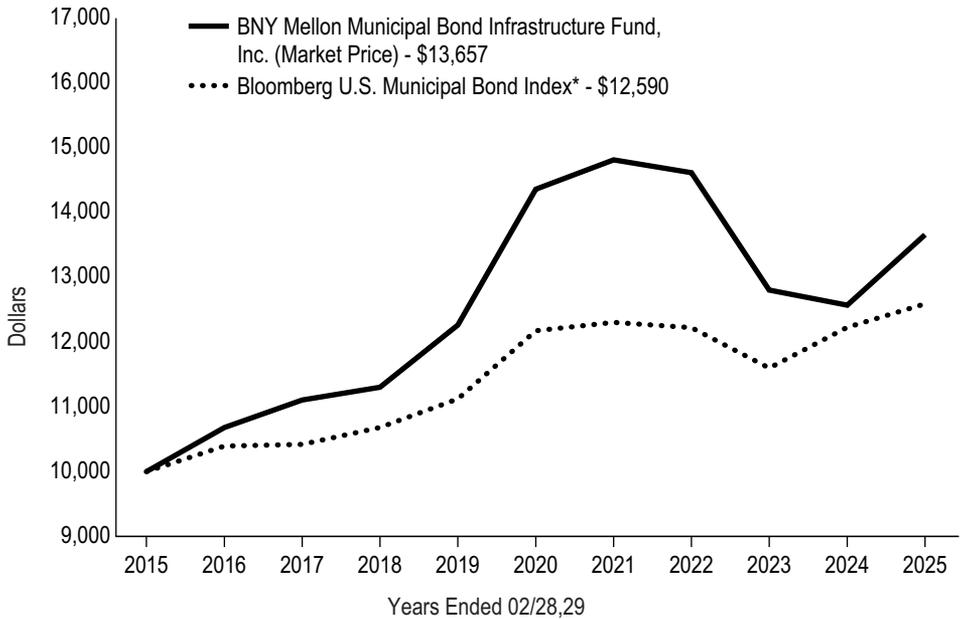

¹ Total return includes reinvestment of dividends and any capital gains paid, based upon net asset value per share or market price per share, as applicable. Past performance is no guarantee of future results. Market price per share, net asset value per share and investment return fluctuate.

² Distribution rate per share is based upon dividends per share paid from net investment income during the period, divided by the market price per share at the end of the period, adjusted for any capital gain distributions.

³ Source: Lipper, Inc. — The Bloomberg U.S. Municipal Bond Index covers the U.S. dollar-denominated long-term tax-exempt bond market. Unlike a fund, the Index is not subject to fees and other expenses. Investors cannot invest directly in any Index.

Cumulative Performance from February 28, 2015 through February 28, 2025

Initial Investment of \$10,000

* Source: Lipper Inc.

Past performance is not predictive of future performance.

The above graph compares a hypothetical investment of \$10,000 made in BNY Mellon Municipal Bond Infrastructure Fund, Inc. on 2/28/2015 to a hypothetical investment of \$10,000 made in the Index on that date. All figures for the fund are based on market price. All dividends and capital gain distributions are reinvested.

The fund invests primarily in municipal securities and its performance shown in the line graph takes into account fees and expenses.

The Index covers the U.S. dollar-denominated long-term tax-exempt bond market. Unlike a fund, the Index is not subject to charges, fees and other expenses. Investors cannot invest directly in any index. Further information relating to fund performance, including expense reimbursements, if applicable, is contained in the Financial Highlights within this report and elsewhere in this report.

DISCUSSION OF FUND PERFORMANCE AND DISTRIBUTION INFORMATION
(Unaudited) (continued)

Average Annual Total Returns as of 2/28/2025

	1 Year	5 Years	10 Years
BNY Mellon Municipal Bond Infrastructure Fund, Inc.- Market Price	8.65%	(1.00%)	3.17%
BNY Mellon Municipal Bond Infrastructure Fund, Inc.- Net Asset Value	3.92%	0.00%	3.49%
Bloomberg U.S. Municipal Bond Index	2.96%	0.67%	2.33%

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate and an investor's shares may be worth more or less than original cost upon sale of the shares. Current performance may be lower or higher than the performance quoted. Go to www.bny.com/investments for the fund's most recent month-end returns.

The fund's performance shown in the graph and table does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the sale of fund shares.

DISTRIBUTION INFORMATION

The following information regarding the fund's distributions is current as of February 28, 2025, the fund's fiscal year end. The fund's returns during the period were sufficient to meet fund distributions.

The fund's distribution policy is intended to provide shareholders with stable, but not guaranteed, cash flow, independent of the amount or timing of income earned or capital gains realized by the fund. The fund intends to distribute all or substantially all of its net investment income through its regular monthly distribution and to distribute realized capital gains at least annually. In addition, in any monthly period, in order to try to maintain a level distribution amount, the fund may pay out more or less than its net investment income during the period. As a result, distributions sources may include net investment income, realized gains and return of capital. You should not draw any conclusions about the fund's investment performance from the amount of the distribution or from the terms of the level distribution program. A return of capital is a non-taxable distribution of a portion of the fund's capital. A return of capital distribution does not necessarily reflect a fund's investment performance and should not be confused with "yield" or "income."

The amounts and sources of distributions reported below are for financial reporting purposes and are not being provided for tax reporting purposes. The actual amounts and character of the distributions for tax reporting purposes will be reported to shareholders on Form 1099-DIV, which will be sent to shareholders shortly after calendar year-end. Because distribution source estimates are updated throughout the current fiscal year based on the fund's performance, those estimates may differ from both the tax information reported to you in your fund's 1099 statement, as well as the ultimate economic sources of distributions over the life of your investment. The figures in the table below provide the sources of distributions and may include amounts attributed to realized gains and/or returns of capital.

Distributions	Current Month Percentage of Distributions			Fiscal Year Ended Per Share Amounts			
	Net Investment Income	Realized Gains	Return of Capital	Total Distributions	Net Investment Income	Realized Gains	Return of Capital
BNY Mellon Municipal Bond Infrastructure Fund, Inc.	100.00%	.00%	.00%	\$.36	\$.36	\$.00	\$.00

^(a) These securities have a put feature; the date shown represents the put date and the bond holder can take a specific action to retain the bond after the put date.

^(b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At February 28, 2025, these securities amounted to \$91,419,079 or 41.0% of net assets applicable to Common Stockholders.

^(c) Non-income producing—security in default.

^(d) The Variable Rate is determined by the Remarketing Agent in its sole discretion based on prevailing market conditions and may, but need not, be established by reference to one or more financial indices.

- (e) Collateral for floating rate borrowings. The coupon rate given represents the current interest rate for the inverse floating rate security.*
- (f) Security issued with a zero coupon. Income is recognized through the accretion of discount.*
- (g) These securities are prerefunded; the date shown represents the prerefunded date. Bonds which are prerefunded are collateralized by U.S. Government securities which are held in escrow and are used to pay principal and interest on the municipal issue and to retire the bonds in full at the earliest refunding date.*

See notes to financial statements.

FINANCIAL HIGHLIGHTS

The following table describes the performance for the fiscal periods indicated. Market price total return is calculated assuming an initial investment made at the market price at the beginning of the period, reinvestment of all dividends and distributions at market price during the period, and sale at the market price on the last day of the period. These figures have been derived from the fund's financial statements, and with respect to common stock, market price data for the fund's common shares.

NOTES TO FINANCIAL STATEMENTS

NOTE 1—Significant Accounting Policies:

BNY Mellon Municipal Bond Infrastructure Fund, Inc. (the “fund”), which is registered under the Investment Company Act of 1940, as amended (the “Act”), is a diversified closed-end management investment company. The fund’s investment objective is to seek to provide as high a level of current income exempt from regular federal income tax as is consistent with the preservation of capital. BNY Mellon Investment Adviser, Inc. (the “Adviser”), a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY”), serves as the fund’s investment adviser. Insight North America, LLC (the “Sub-Adviser”), an indirect wholly-owned subsidiary of BNY and an affiliate of the Adviser, serves as the fund’s sub-adviser. The fund’s common stock (“Common Stock”) trades on the New York Stock Exchange (the “NYSE”) under the ticker symbol DMB.

The fund has outstanding 750 shares of Remarketable Variable Rate MuniFund Term Preferred Shares (“RVMTP Shares”). The fund is subject to certain restrictions relating to the RVMTP Shares. Failure to comply with these restrictions could preclude the fund from declaring any distributions to shareholders of Common Stock (“Common Stockholders”) or repurchasing shares of Common Stock and/or could trigger the mandatory redemption of RVMTP Shares at their liquidation value (i.e., \$100,000 per share). Thus, redemptions of RVMTP Shares may be deemed to be outside of the control of the fund.

The RVMTP Shares have a mandatory redemption date of October 16, 2049, and are subject to mandatory tender upon each 42 month anniversary of October 16, 2020, the effective date of their refinancing, or upon the end of a Special Terms Period (as defined in the fund’s articles supplementary) (each an Early Term Redemption Date (as defined in the fund’s articles supplementary)), subject to the option of the holders to retain the RVMTP Shares. On October 16, 2023, the RVMTP Shares were successfully remarketed during their first Early Term Redemption Date, and the RVMTP Shares were extended through the 42 month anniversary of October 16, 2023. RVMTP Shares that are neither retained by the holders nor successfully remarketed by the Early Term Redemption Date will be redeemed by the fund. The fund is subject to a Tender and Paying Agent Agreement with the Bank of New York Mellon, with respect to the RVMTP Shares.

The shareholders of RVMTP Shares, voting as a separate class, have the right to elect at least two directors. The shareholders of RVMTP Shares will vote as a separate class on certain other matters, as required by law. The fund’s Board of Directors (the “Board”) has designated Nathan Leventhal and Benaree Pratt Wiley as directors to be elected by the shareholders of RVMTP Shares.

Dividends on RVMTP Shares are normally declared daily and paid monthly. The Dividend Rate on the RVMTP Shares is, except as otherwise provided, equal to the rate per annum that results from the sum of (1) the Index Rate plus (2) the Applicable Spread as determined for the RVMTP Shares on the Rate Determination Date immediately

preceding such Subsequent Rate Period plus (3) the Failed Remarketing Spread (all defined terms as defined in the fund's articles supplementary).

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") is the exclusive reference of authoritative U.S. generally accepted accounting principles ("GAAP") recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal laws are also sources of authoritative GAAP for SEC registrants. The fund is an investment company and applies the accounting and reporting guidance of the FASB ASC Topic 946 Financial Services-Investment Companies. The fund's financial statements are prepared in accordance with GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

The fund enters into contracts that contain a variety of indemnifications. The fund's maximum exposure under these arrangements is unknown. The fund does not anticipate recognizing any loss related to these arrangements.

(a) Portfolio valuation: The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). GAAP establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. This hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

Additionally, GAAP provides guidance on determining whether the volume and activity in a market has decreased significantly and whether such a decrease in activity results in transactions that are not orderly. GAAP requires enhanced disclosures around valuation inputs and techniques used during annual and interim periods.

Various inputs are used in determining the value of the fund's investments relating to fair value measurements. These inputs are summarized in the three broad levels listed below:

Level 1—unadjusted quoted prices in active markets for identical investments.

Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3—significant unobservable inputs (including the fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. Valuation techniques used to value the fund's investments are as follows:

The Board has designated the Adviser as the fund's valuation designee to make all fair value determinations with respect to the fund's portfolio investments, subject to the Board's oversight and pursuant to Rule 2a-5 under the Act.

Investments in municipal securities are valued each business day by an independent pricing service (the "Service") approved by the Board. Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Municipal investments (which constitute a majority of the portfolio securities) are carried at fair value as determined by the Service, based on methods which include consideration of the following: yields or prices of municipal securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. The Service is engaged under the general oversight of the Board. All of the preceding securities are generally categorized within Level 2 of the fair value hierarchy.

When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the fund calculates its net asset value, the fund may value these investments at fair value as determined in accordance with the procedures approved by the Board. Certain factors may be considered when fair valuing investments such as: fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold, and public trading in similar securities of the issuer or comparable issuers. These securities are either categorized within Level 2 or 3 of the fair value hierarchy depending on the relevant inputs used.

For securities where observable inputs are limited, assumptions about market activity and risk are used and such securities are generally categorized within Level 3 of the fair value hierarchy.

The following is a summary of the inputs used as of February 28, 2025 in valuing the fund's investments:

	Level 1 - Unadjusted Quoted Prices	Level 2- Other Significant Observable Inputs	Level 3- Significant Unobservable Inputs	Total
Assets (\$)				
Investments in Securities: [†]				
Municipal Securities	—	336,904,997	—	336,904,997
	—	336,904,997	—	336,904,997
Liabilities (\$)				
Other Financial Instruments:				
Inverse Floater Notes ^{††}	—	(43,455,000)	—	(43,455,000)
RVMTSP Shares ^{††}	—	(75,000,000)	—	(75,000,000)
	—	(118,455,000)	—	(118,455,000)

[†] See Statement of Investments for additional detailed categorizations, if any.

^{††} Certain of the fund's liabilities are held at carrying amount, which approximates fair value for financial reporting purposes.

(b) Securities transactions and investment income: Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the identified cost basis. Interest income, adjusted for accretion of discount and amortization of premium on investments, is earned from settlement date and is recognized on the accrual basis. Securities purchased or sold on a when-issued or delayed delivery basis may be settled a month or more after the trade date.

(c) Market Risk: The value of the securities in which the fund invests may be affected by political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. The value of a security may also decline due to general market conditions that are not specifically related to a particular company or industry, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, changes to inflation, adverse changes to credit markets or adverse investor sentiment generally.

The Additional Information section within this annual report provides more details about the fund's principal risk factors.

(d) Dividends and distributions to Common Stockholders: Dividends and

distributions are recorded on the ex-dividend date. Dividends from net investment income are normally declared and paid monthly. Dividends from net realized capital gains, if any, are normally declared and paid annually, but the fund may make distributions on a more frequent basis to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the “Code”). To the extent that net realized capital gains can be offset by capital loss carryovers, it is the policy of the fund not to distribute such gains. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Common Stockholders will have their distributions reinvested in additional shares of the fund, unless such Common Stockholders elect to receive cash, at the lower of the market price or net asset value per share (but not less than 95% of the market price). If market price is equal to or exceeds net asset value, shares will be issued at net asset value. If net asset value exceeds market price, Computershare Inc., the transfer agent for the fund’s Common Stock, will buy fund shares in the open market and reinvest those shares accordingly.

On February 4, 2025, the Board declared a cash dividend of \$.03 per share from net investment income, payable on March 3, 2025 to Common Stockholders of record as of the close of business on February 19, 2025. The ex-dividend date was February 19, 2025.

(e) Dividends to holders of RVMTP Shares: Dividends on RVMTP Shares are normally declared daily and paid monthly. The Dividend Rate on the RVMTP Shares is, except as otherwise provided, equal to the rate per annum that results from the sum of (1) the Index Rate plus (2) the Applicable Spread as determined for the RVMTP Shares on the Rate Determination Date immediately preceding such Subsequent Rate Period plus (3) the Failed Remarketing Spread. The Applicable Rate of the RVMTP Shares was equal to the sum of 1.30% per annum plus the Securities Industry and Financial Markets Association Municipal Swap Index rate of 1.86% on February 28, 2025. The dividend rate as of February 28, 2025 for the RVMTP Shares was 3.16% (all defined terms as defined in the fund’s articles supplementary).

(f) Federal income taxes: It is the policy of the fund to continue to qualify as a regulated investment company, which can distribute tax-exempt dividends, by complying with the applicable provisions of the Code, and to make distributions of taxable income and net realized capital gain sufficient to relieve it from substantially all federal income and excise taxes.

As of and during the period ended February 28, 2025, the fund did not have any liabilities for any uncertain tax positions. The fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of Operations. During the period ended February 28, 2025, the fund did not incur any interest or penalties.

Each tax year in the four-year period ended February 28, 2025 remains subject to examination by the Internal Revenue Service and state taxing authorities.

At February 28, 2025, the components of accumulated earnings on a tax basis were as follows: undistributed tax-exempt income \$2,314,292, accumulated capital losses \$43,489,301 and unrealized appreciation \$2,155,132.

The fund is permitted to carry forward capital losses for an unlimited period. Furthermore, capital loss carryovers retain their character as either short-term or long-term capital losses.

The accumulated capital loss carryover is available for federal income tax purposes to be applied against future net realized capital gains, if any, realized subsequent to February 28, 2025. The fund has \$34,049,322 of short-term capital losses and \$9,439,979 of long-term capital losses which can be carried forward for an unlimited period.

The tax character of distributions paid to Common Stockholders during the fiscal years ended February 28, 2025 and February 29, 2024 were as follows: tax-exempt income \$6,626,150 and \$8,098,628, respectively.

(g) RVMTP Shares: The fund's RVMTP Shares aggregate liquidation preference is shown as a liability, since they have a stated mandatory redemption date of October 16, 2049. Dividends paid on RVMTP Shares are treated as interest expense and recorded on the accrual basis. Costs directly related to the issuance of the RVMTP Shares are considered debt issuance costs which has been fully amortized into expense over the life of the RVMTP Shares.

During the period ended February 28, 2025, total fees pursuant to RVMTP Shares amounted to \$3,404,610. These fees are included in RVMTP Shares interest expense in the Statement of Operations.

The average amount of borrowings outstanding for the RVMTP Shares during the period ended February 28, 2025 was approximately \$75,000,000, with a related weighted average annualized interest rate of 4.54%.

(h) Operating segment reporting: In this reporting period, the fund adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the new standard impacted financial statement disclosures only and did not affect the fund's financial position or the results of its operations. The ASU 2023-07 is effective for public entities for fiscal years beginning after December 15, 2023, and requires retrospective application for all prior periods presented within the financial statements.

Since its commencement, the fund operates and is managed as a single reportable segment deriving returns in the form of dividends, interest and/or gains from the investments made in pursuit of its single stated investment objective as outlined in the fund's prospectus. The accounting policies of the fund are consistent with those described in these Notes to Financial Statements. The chief operating decision maker ("CODM") is represented by BNY Investments, the management of the Adviser, comprising Senior Management and

Directors. The CODM considers net increase in net assets resulting from operations in deciding whether to purchase additional investments or to make distributions to fund shareholders. Detailed financial information for the fund is disclosed within these financial statements with total assets and liabilities disclosed on the Statement of Assets and Liabilities, investments held on the Statement of Investments, results of operations and significant segment expenses on the Statement of Operations and other information about the fund's performance, including total return, portfolio turnover and ratios within the Financial Highlights.

NOTE 2—Management Fee, Sub-Advisory Fee and Other Transactions with Affiliates:

(a) Pursuant to a management agreement with the Adviser, the management fee is computed at the annual rate of .65% of the value of the fund's daily total assets, including any assets attributable to effective leverage, minus certain defined accrued liabilities (the "Managed Assets") and is payable monthly.

Pursuant to a sub-investment advisory agreement between the Adviser and the Sub-Adviser, the Adviser pays the Sub-Adviser a monthly fee at an annual rate of .27% of the value of the fund's average daily Managed Assets.

(b) The fund has an arrangement with The Bank of New York Mellon (the "Custodian"), subsidiary of BNY and an affiliate of the Adviser, whereby the fund may receive earnings credits when positive cash balances are maintained, which are used to offset Custodian fees. For financial reporting purposes, the fund includes custody net earning credits as an expense offset in the Statement of Operations.

The fund compensates the Custodian, under a custody agreement, for providing custodial services for the fund. These fees are determined based on net assets, geographic region and transaction activity. During the period ended February 28, 2025, the fund was charged \$6,786 pursuant to the custody agreement. These fees were offset by earnings credits of \$6,786.

The fund compensates The Bank of New York Mellon under a Tender and Paying Agent Agreement for providing certain transfer agency and payment services with respect to the RVMTP Shares. During the period ended February 28, 2025, the fund was charged \$8,125 for the services provided by the Tender and Paying Agent.

During the period ended February 28, 2025, the fund was charged \$16,563 for services performed by the fund's Chief Compliance Officer and his staff. These fees are included in Chief Compliance Officer fees in the Statement of Operations.

The components of “Due to BNY Mellon Investment Adviser, Inc. and affiliates” in the Statement of Assets and Liabilities consist of: Management fee of \$169,370, Custodian fees of \$1,500, Tender and Paying Agent fees of \$4,813 and Chief Compliance Officer fees of \$3,348.

During the year ended February 28, 2025, the fund received \$5,182 related to short-swing profits pursuant to Section 16(b) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). This amount is included in interest income in the Statement of Operations.

(c) Each board member of the fund also serves as a board member of other funds in the BNY Mellon Family of Funds complex. Annual retainer fees and attendance fees are allocated to each fund based on net assets.

NOTE 3—Securities Transactions:

The aggregate amount of purchases and sales (including paydowns) of investment securities, excluding short-term securities and secured borrowings of inverse floater securities, during the period ended February 28, 2025, amounted to \$74,310,604 and \$71,666,116, respectively.

Inverse Floater Securities: The fund participates in secondary inverse floater structures in which fixed-rate, tax-exempt municipal bonds are transferred to a trust (the “Inverse Floater Trust”). The Inverse Floater Trust typically issues two variable rate securities that are collateralized by the cash flows of the fixed-rate, tax-exempt municipal bonds. One of these variable rate securities pays interest based on a short-term floating rate set by a remarketing agent at predetermined intervals (“Trust Certificates”). A residual interest tax-exempt security is also created by the Inverse Floater Trust, which is transferred to the fund, and is paid interest based on the remaining cash flows of the Inverse Floater Trust, after payment of interest on the other securities and various expenses of the Inverse Floater Trust. An Inverse Floater Trust may be collapsed without the consent of the fund due to certain termination events such as bankruptcy, default or other credit event.

The fund accounts for the transfer of bonds to the Inverse Floater Trust as secured borrowings, with the securities transferred remaining in the fund’s investments, and the Trust Certificates reflected as fund liabilities in the Statement of Assets and Liabilities.

The fund may invest in inverse floater securities on either a non-recourse or recourse basis. These securities are typically supported by a liquidity facility provided by a bank or other financial institution (the “Liquidity Provider”) that allows the holders of the Trust Certificates to tender their certificates in exchange for payment from the Liquidity Provider of par plus accrued interest on any business day prior to a termination event. When the fund invests in inverse floater securities on a non-recourse basis, the Liquidity Provider is required to make a payment under the liquidity facility due to a termination event to the holders of the Trust Certificates. When this occurs, the Liquidity Provider

typically liquidates all or a portion of the municipal securities held in the Inverse Floater Trust. A liquidation shortfall occurs if the Trust Certificates exceed the proceeds of the sale of the bonds in the Inverse Floater Trust (“Liquidation Shortfall”). When a fund invests in inverse floater securities on a recourse basis, the fund typically enters into a reimbursement agreement with the Liquidity Provider where the fund is required to repay the Liquidity Provider the amount of any Liquidation Shortfall. As a result, a fund investing in a recourse inverse floater security bears the risk of loss with respect to any Liquidation Shortfall.

The average amount of borrowings outstanding under the inverse floater structure during the period ended February 28, 2025, was approximately \$35,165,589, with a related weighted average annualized interest rate of 3.86%.

At February 28, 2025, the cost of investments for federal income tax purposes was \$291,294,865; accordingly, accumulated net unrealized appreciation on investments was \$2,155,132, consisting of \$11,162,805 gross unrealized appreciation and \$9,007,673 gross unrealized depreciation.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of BNY Mellon Municipal Bond Infrastructure Fund, Inc.

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of BNY Mellon Municipal Bond Infrastructure Fund, Inc. (the “Fund”), including the statement of investments, as of February 28, 2025, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund at February 28, 2025, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund’s internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of February 28, 2025, by correspondence with the custodian, brokers and others; when replies were not received from brokers and others, we performed other auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Ernst & Young LLP

We have served as the auditor of one or more investment companies in the BNY Mellon Family of Funds since at least 1957, but we are unable to determine the specific year.

New York, New York
April 22, 2025

ADDITIONAL INFORMATION (Unaudited)

Dividend Reinvestment Plan

The fund's Dividend Reinvestment Plan (the "Plan") is commonly referred to as an "opt-out" plan. Each Common Stockholder who participates in the Plan will have all distributions of dividends and capital gains automatically reinvested in additional Common Shares by Computershare Inc. as agent (the "Plan Agent"). Common Stockholders who elect not to participate in the Plan will receive all distributions in cash, which will be paid by check and mailed directly to the shareholder of record (or if the shares are held in street or other nominee name, then to the nominee) by the Plan Agent, as dividend disbursing agent. Common Stockholders whose shares are held in the name of a broker or nominee should contact the broker or nominee to determine whether and how they may participate in the Plan. The Plan Agent serves as agent for the Common Stockholders in administering the Plan. After the fund declares a dividend or makes a capital gain distribution, the Plan Agent will, as agent for the Stockholders, either (i) receive the cash payment and use it to buy Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts or (ii) distribute newly issued Common Shares of the fund on behalf of the participants. The Plan Agent will receive cash from the fund with which to buy Common Shares in the open market if, on the distribution payment date, the net asset value per share exceeds the market price per Common Share plus estimated brokerage commissions on that date. The Plan Agent will receive the dividend or distribution in newly issued Common Shares of the fund if, on the payment date, the market price per share plus estimated brokerage commissions equals or exceeds the net asset value per share of the fund on that date. The number of shares to be issued will be computed at a per share rate equal to the greater of (i) the net asset value or (ii) 95% of the closing market price per Common Share on the payment date.

Participants in the Plan may withdraw from the Plan at any time upon written notice to the Plan Agent. Such withdrawal will be effective immediately if received not less than ten days prior to a distribution record date; otherwise, it will be effective for all subsequent distributions. When a participant withdraws from the Plan or the Plan is terminated, such participant will receive whole Common Shares in his or her account under the Plan and will receive a cash payment for any fraction of a Common Share credited to such account. If any participant elects to have the Plan Agent sell all or part of his or her Common Shares and remit the proceeds, the Plan Agent is authorized to deduct a \$15.00 fee plus \$0.10 per share in brokerage commissions.

In the case of Stockholders, such as banks, brokers or nominees, which hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record Stockholders as representing the total amount registered in the record shareholder's name and held for the account of beneficial owners who are participants in the Plan.

The Plan Agent's fees for the handling of reinvestment of dividends and other distributions will be paid by the fund. Each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of distributions. There are no other charges to participants for reinvesting

dividends or capital gain distributions. Purchases and/or sales are usually made through a broker affiliated with the Plan Agent.

Experience under the Plan may indicate that changes are desirable. Accordingly, the fund reserves the right to amend or terminate the Plan as applied to any distribution paid subsequent to written notice of the change sent to all Stockholders of the fund at least 90 days before the record date for the dividend or distribution. The Plan also may be amended or terminated by the Plan Agent by at least 90 days' written notice to all Stockholders of the fund. All correspondence concerning the Plan should be directed to the Plan Agent by calling 1-855-866-0953, or writing P.O. Box 534434, Pittsburgh, Pennsylvania 15253-4442.

The automatic reinvestment of dividends and other distributions will not relieve participants of any income tax that may be payable or required to be withheld on such dividends or distributions. See "Tax Matters."

Level Distribution Policy

The fund's dividend policy is to distribute substantially all of its net investment income to its Stockholders on a monthly basis. In order to provide Stockholders with a more consistent yield to the current trading price of shares of Common Stock of the fund, the fund may at times pay out more or less than the entire amount of net investment income earned in any particular month and may at times in any month pay out any accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the fund for any particular month may be more or less than the amount of net investment income earned by the fund during such month. The fund's current accumulated but undistributed net investment income, if any, is disclosed within Note 1(f) of this report, which comprises part of the Financial Information included in this report.

Investment Objective and Principal Investment Strategies

Investment Objective. The fund's investment objective is to seek to provide as high a level of current income exempt from regular federal income tax as is consistent with the preservation of capital. The fund's investment objective is fundamental and may not be changed without the affirmative vote of the holders of a majority (as defined in the Act) of the fund's outstanding voting securities. There is no assurance the fund will achieve its investment objective.

Principal Investment Strategies. The fund seeks to achieve its investment objective by investing in municipal bonds that the Sub-Adviser has identified as financing the development, support or improvement of infrastructure in the United States, its territories and possessions (such as Puerto Rico and Guam). Under normal circumstances, the fund will invest at least 80% of its Managed Assets in municipal bonds issued to finance infrastructure sectors and projects in the United States. Infrastructure sectors and projects include transportation (e.g., roads, tunnels and bridges, airports, seaports, railways and mass transit systems), energy and utilities (e.g., natural gas transmission and distribution, power plants, water treatment and distribution centers, wastewater treatment facilities, oil and gas pipelines), social infrastructure (e.g., schools, healthcare facilities, public facilities, convention centers), water and environment (e.g., drinking water, wastewater, solid waste, flood control, coastal management), and other similar

ADDITIONAL INFORMATION (Unaudited) *(continued)*

public sectors and projects that support or facilitate the development or improvement of economic, health, and cultural and social standards in the United States.

The fund may not change its investment policy to invest at least 80% of its Managed Assets in municipal bonds without the approval of the holders of a “majority of the outstanding” Common Stock and preferred stock (if any) voting together as a single class, and of the holders of a “majority of the outstanding” preferred stock (if any) voting as a separate class. Upon 60 days’ prior written notice to Common Stockholders (and holders of preferred stock, if any), however, the fund may change its investment policy to permit it to invest less than 80% of its Managed Assets in municipal bonds issued to finance infrastructure sectors and projects in the United States. When used with respect to the fund as a whole or particular shares of the fund, a “majority of the outstanding” shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy or (ii) more than 50% of the shares, whichever is less.

The fund will invest 25% or more of its Managed Assets in infrastructure sectors or projects and, from time to time, the fund may have 25% or more of its Managed Assets invested in any one of the infrastructure sectors or invested across similar projects described herein. The Sub-Adviser retains broad discretion to allocate the fund’s investments across various infrastructure sectors and projects.

In addition, under normal circumstances, the fund:

- will invest at least 50% of its Managed Assets in municipal bonds that, at the time of investment, are rated investment grade (i.e., BBB- or Baa3 or higher) by at least one of the NRSROs (as defined below) that rate such securities, or, if unrated, determined to be of comparable quality by the Sub-Adviser;
- may invest up to 50% of its Managed Assets in municipal bonds that are rated below investment grade or are the unrated equivalent as determined by the Sub-Adviser at the time of investment. Municipal bonds of below investment grade quality are regarded as having predominately speculative characteristics with respect to an obligor’s capacity to pay interest and repay principal (commonly referred to as “high yield” or “junk” bonds);
- will not invest more than 10% of its Managed Assets in municipal bonds that are rated below B-/B3 by an NRSRO or are the unrated equivalent as determined by the Sub-Adviser at the time of investment. The fund may invest in municipal bonds that, at the time of investment, are distressed, but will not invest in municipal bonds that, at the time of investment, are in default or involved in bankruptcy or insolvency proceedings;
- may invest up to 30% of its Managed Assets in municipal bonds the income from which is subject to the federal alternative minimum tax applicable to individuals; and
- will invest no more than 25% of its Managed Assets in securities and other instruments that, at the time of investment, are illiquid.

“NRSRO” means (a) each of Fitch Ratings, Inc., Moody’s Investors Service, Inc. and S&P Global Ratings, so long as such entity is a nationally recognized statistical rating organization within the meaning of Section 3(a)(62) of the Exchange Act and (b) any other nationally

recognized statistical rating organization within the meaning of Section 3(a)(62) of the Exchange Act that is not an “affiliated person” (as defined in Section 2(a)(3) of the Act) of the fund.

The fund seeks to maintain a levered effective duration of up to 14 years, which takes into account the effects of the fund’s use of effective leverage and optional call provisions of the municipal bonds in the fund’s portfolio. In the event that the fund does not engage in leverage to a material degree, the fund will seek to maintain an effective duration of up to 10 years, accounting for the effect of optional call provisions of the municipal bonds in the fund’s portfolio.

The fund also may invest in certain derivative instruments in pursuit of its investment objective. Such instruments include financial futures contracts, swap contracts (including interest rate and credit default swaps) and options, including options on financial futures and options on swap contracts. The Sub-Adviser may use derivative instruments as a substitute for investing directly in an underlying asset, to increase returns, to manage credit or interest rate risk, or as part of a hedging strategy. These types of strategies may generate taxable income.

The fund may employ leverage to enhance its potential for achieving its investment objective. The fund may employ leverage by issuing preferred stock, such as the RVMTP shares, or debt securities, or by borrowing funds from banks or other financial institutions, including through the use of municipal tender option bond programs (i.e., “structural leverage”). The fund, subject to the restrictions imposed by the fund’s organizational documents and the terms of the RVMTP shares, also may employ leverage by using certain portfolio techniques that have the economic effect of leverage, such as through the use of derivative instruments or reverse repurchase agreements, or by engaging in when-issued, delayed delivery or forward commitment transactions (i.e., “portfolio leverage”). The fund generally expects to employ effective leverage through a combination of preferred stock and residual interest municipal tender option bonds.

“Effective leverage” is the combination of the amount of any structural leverage and any portfolio leverage used by the fund. The fund anticipates that its effective leverage, including the allocation between structural and portfolio leverage, will vary from time to time, based upon changes in market conditions and variations in the value of its portfolio holdings. Under current market conditions, the fund intends to utilize effective leverage in an amount up to 35% of its Managed Assets. However, the fund reserves the right to utilize effective leverage in an amount up to 45% of its Managed Assets. The fund’s organizational documents and the terms of the RVMTP shares, however, may impose requirements on the fund with respect to its asset coverage or portfolio composition that would be more stringent than those imposed on the fund by the Act and might limit the ability of the fund to utilize effective leverage in a manner and in the amounts permitted by its investment policies.

The fund also may borrow for temporary, emergency or other purposes as permitted by the Act. The use of leverage involves increased risk, including increased variability of the fund’s net income, distributions and net asset value in relation to market changes. The fund’s leverage strategy may not work as planned or achieve its goal.

Principal Risk Factors

An investment in the fund involves special risk considerations, which are described below. The fund is a diversified, closed-end management investment company designed primarily as a long-term investment and not as a vehicle for short-term trading purposes. An investment in the fund's Common Stock may be speculative and it involves a high degree of risk. The fund should not constitute a complete investment program. Due to the uncertainty in all investments, there can be no assurance that the fund will achieve its investment objective. Different risks may be more significant at different times depending on market conditions. Your Common Stock at any point in time may be worth less than your original investment.

Municipal Bonds Risk. Investing in municipal bonds involves certain risks. The amount of public information available about municipal bonds is generally less than that for corporate equities or bonds. Special factors, such as legislative changes and state and local economic and business developments, may adversely affect the yield and/or value of the fund's investments in municipal bonds. The yields on and market prices of municipal bonds are dependent on a variety of factors.

Changes in economic, business or political conditions relating to a particular municipality or state in which the fund invests may have an effect on the fund's net asset value. The secondary market for certain municipal bonds, particularly below investment grade municipal bonds, tends to be less well-developed or liquid than many other securities markets, which may adversely affect the fund's ability to sell its portfolio securities at attractive prices. The ability of issuers of municipal bonds to make timely payments of interest and repayments of principal may be diminished during general economic downturns and as governmental cost burdens are reallocated among federal, state and local governments. In addition, laws enacted in the future by Congress or state legislatures or referenda could extend the time for payment of principal and/or interest, or impose other constraints on enforcement of such obligations, or on the ability of municipal issuers to levy taxes. Issuers of municipal bonds might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, the fund could experience delays in collecting principal and interest and the fund may not be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, the fund may take possession of, and manage, the assets securing the issuer's obligations on such securities, which may increase the fund's operating expenses. Any income derived from the fund's ownership or operation of such assets may not be tax-exempt. The fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in the securities of similar infrastructure projects, industrial development bonds, or in particular types of municipal bonds (such as revenue bonds, general obligation bonds or private activity bonds). Such developments may adversely affect a specific industry or local political and economic conditions, and thus may lead to declines in the securities' creditworthiness and value.

The fund may invest in municipal leases and certificates of participation in such leases that involve special risks because the issuers of those securities may not be obligated to appropriate money annually to make payments. Leases and installment purchase or conditional sale

contracts have evolved as a means for governmental issuers to acquire property and equipment without meeting the constitutional and statutory requirements for the issuance of debt.

Below Investment Grade Municipal Bonds Risk. Because the fund may invest a significant portion of its portfolio in below investment grade municipal bonds, its portfolio is subject to heightened credit risk. Below investment grade municipal bonds (commonly referred to as “high yield” or “junk” bonds) involve substantial risk of loss and are considered predominantly speculative with respect to the issuer’s or obligor’s ability to pay interest and repay principal and are susceptible to default or decline in market value due to adverse economic and business developments. The market values for high yield municipal bonds tend to be very volatile, and those bonds are less liquid than investment grade municipal bonds.

Because there is no established retail secondary market for many of these bonds, it may be anticipated that such bonds could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these bonds does exist, it generally is not as liquid as the secondary market for higher-rated municipal bonds. The lack of a liquid secondary market may have an adverse impact on market price and yield and the fund’s ability to dispose of particular issues in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain bonds also may make it more difficult for the fund to obtain accurate market quotations for purposes of valuing the fund’s portfolio and calculating its net asset value. In such cases, the Sub-Adviser’s judgment may play a greater role in valuation because less reliable, objective data may be available.

For these reasons, an investment in the fund is subject to the following specific risks: (i) increased price sensitivity to a deteriorating economic environment; (ii) greater risk of loss due to default or declining credit quality; (iii) adverse issuer or obligor specific events are more likely to render the issuer or obligor unable to make interest and/or principal payments; and (iv) if a negative perception of the high yield market develops, the price and liquidity of high yield bonds may be depressed, which may last for a significant period of time. Adverse changes in economic conditions are more likely to lead to a weakened capacity of a high yield issuer to make principal and interest payments than of an investment grade issuer.

Distressed municipal bonds are speculative and involve substantial risks in addition to the risks of investing in below investment grade municipal bonds. The fund will generally not receive interest payments on the distressed municipal bonds it holds and may incur costs to protect its investment. In addition, distressed municipal bonds involve the substantial risk that principal will not be repaid. It may be more difficult to value such bonds and the spread between the bid and asked prices of such securities may be greater than expected. Distressed municipal bonds and any bonds or other securities received in an exchange for such distressed municipal bonds may be subject to restrictions on resale.

Infrastructure Investments Risk. Infrastructure sectors and projects may be subject to a variety of factors that may adversely affect their development, including: (i) high amounts of leverage and high interest costs in connection with capital construction and improvement programs; (ii) difficulty in raising capital in adequate amounts on reasonable terms in periods of high inflation and unsettled capital markets; (iii) inexperience with and potential losses resulting

ADDITIONAL INFORMATION (Unaudited) (continued)

from the deregulation of a particular industry or sector; (iv) costs associated with compliance with and changes in environmental and other regulations; (v) regulation by various government authorities, including government regulation of rates charged to customers; (vi) the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards; (vii) susceptibility to terrorist attacks; (viii) surplus capacity; (ix) increased competition; (x) technological innovations that may render existing plants, equipment or products obsolete; and (xi) general changes in market sentiment towards infrastructure assets.

Credit Risk. Credit risk is the risk that one or more municipal bonds in the fund's portfolio will decline in price, or the issuer or obligor thereof will fail to pay interest or repay principal when due, because the issuer or obligor experiences a decline or there is a perception of a decline in its financial status. Below investment grade municipal bonds involve greater credit risk than investment grade municipal bonds.

The two principal classifications of municipal bonds are "general obligations" and "revenue obligations." General obligations are secured by the issuer's pledge of its credit and taxing power for the payment of principal and interest. Revenue obligations are payable from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source but not from the general taxing power. Sizable investments in these obligations could involve an increased risk to the fund should any of the related facilities experience financial difficulties.

Interest Rate Risk. Prices of municipal obligations and other fixed-income securities tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect fixed-income securities and, accordingly, will cause the value of the fund's investments in these securities to decline. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. During periods of very low interest rates, which occur from time to time due to market forces or actions of governments and/or their central banks, including the Board of Governors of the Federal Reserve System in the U.S., the fund may be subject to a greater risk of principal decline from rising interest rates. When interest rates fall, the values of already-issued fixed-income securities generally rise. However, when interest rates fall, the fund's investments in new securities may be at lower yields and may reduce the fund's income. The magnitude of these fluctuations in the market price of fixed-income securities is generally greater for securities with longer effective maturities and durations because such instruments do not mature, reset interest rates or become callable for longer periods of time. The change in the value of a fixed-income security or portfolio can be approximated by multiplying its duration by a change in interest rates. For example, the market price of a fixed-income security with a duration of three years would be expected to decline 3% if interest rates rose 1%. Conversely, the market price of the same security would be expected to increase 3% if interest rates fell 1%. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from fund performance.

Because the values of lower-rated and comparable unrated municipal bonds are affected both by credit risk and interest rate risk, the price movements of such lower grade municipal bonds

in response to changes in interest rates typically have not been highly correlated to the fluctuations of the prices of investment grade municipal bonds in response to changes in market interest rates.

The fund's use of leverage may increase its interest rate risk. The fund may use certain strategies to seek to reduce the interest rate sensitivity of the fund's portfolio and decrease its exposure to interest rate risk. However, there is no assurance that the fund will do so or that such strategies will be successful.

Call Risk. Some municipal bonds give the issuer the option to "call," or prepay, the securities before their maturity date. If interest rates fall, it is possible that issuers of callable bonds with high interest coupons will call their bonds. If a call were exercised by the issuer of a bond held by the fund during a period of declining interest rates, the fund is likely to replace such called bond with a lower yielding bond. If that were to happen, it could decrease the fund's distributions and possibly could affect the market price of the Common Stock. Similar risks exist when the fund invests the proceeds from matured, traded or prepaid bonds at market interest rates that are below the fund's current earnings rate. A decline in income could affect the market price or overall return of the Common Stock. During periods of market illiquidity or rising interest rates, prices of "callable" issues are subject to increased price fluctuation.

Liquidity Risk. The secondary market for certain municipal bonds tends to be less well developed or liquid than many other securities markets, which may adversely affect the fund's ability to sell such municipal bonds at attractive prices. When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's net asset value may fall dramatically, even during periods of declining interest rates. Trading opportunities are more limited for municipal bonds that have not received any credit ratings, have received ratings below investment grade or are not widely held. There are fewer dealers in the market for high yield municipal bonds than investment grade municipal bonds. The prices quoted by different dealers may vary significantly, and the spread between the bid and ask price is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for high yield municipal bonds could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these instruments may become illiquid.

Floating Rate Securities Risk. The fund may invest in floating rate securities. The interest rate on a floating rate security is a variable rate which is tied to another interest rate, such as a money-market index or U.S. Treasury bill rate. The interest rate on a floating rate security resets periodically, typically every six months. Because of the interest rate reset feature, floating rate securities provide the fund with a certain degree of protection against rises in interest rates, although the fund will participate in any declines in interest rates as well.

The fund also may invest in inverse floating rate securities. The interest rate on an inverse floating rate security resets in the opposite direction from the market rate of interest to which the security is indexed or inversely to a multiple of the applicable index. An inverse floating rate

ADDITIONAL INFORMATION (Unaudited) (continued)

security may exhibit greater price volatility than a fixed rate obligation of similar credit quality. Investing in these types of securities involves the use of effective leverage, which may magnify the fund's gains or losses.

Residual Interest Bonds Risk. An investment in a residual interest bond sold as part of a municipal tender option bond program typically will involve greater risk than an investment in a fixed rate municipal bond. Distributions on residual interest bonds, similar to other types of inverse floating rate securities, will bear an inverse relationship to short-term municipal bond interest rates. Distributions on residual interest bonds paid to the fund will be reduced or, in the extreme, eliminated as short-term municipal interest rates rise and will increase when short-term municipal interest rates fall. The greater the amount of short-term floating rate notes sold relative to the residual interest bond, the more volatile the distributions on the residual interest bond will be. The value of a residual interest bond also is generally more volatile than that of a fixed rate municipal bond. In addition, the market for these residual interest bonds may not be liquid, which increases the volatility of these bonds and means that the fund may not be able to sell them when it desires to do so. Investing in residual interest bonds involves the use of economic leverage which may magnify the fund's gains or losses. If the fund invests in highly leveraged residual interest bonds, the fund may lose money in excess of the amount of its investment, up to an amount equal to the value of the municipal bonds underlying the residual interest bonds owned by the fund.

Insurance Risk. The fund may purchase municipal bonds that are secured by insurance, bank credit agreements or escrow accounts. The credit quality of the companies that provide such credit enhancements will affect the value of those bonds. Certain significant providers of insurance for municipal bonds recently have incurred significant losses as a result of exposure to sub-prime mortgages and other lower credit quality investments that have experienced defaults or otherwise suffered extreme credit deterioration. As a result, such losses have reduced the insurers' capital and called into question their ability to perform their obligations under such insurance if they are called upon to do so in the future. While an insured municipal bond will typically be deemed to have the rating of its insurer, if the insurer of a municipal bond suffers a downgrade in its credit rating or the market discounts the value of the insurance provided by the insurer, the rating of the underlying municipal bond will be more relevant and the value of the municipal bond would more closely, if not entirely, reflect such rating. In such a case, the value of insurance associated with a municipal bond would decline and may not add any value. The insurance feature of a municipal bond does not guarantee the full payment of principal and interest through the life of an insured obligation, the market value of the insured obligation or the net asset value of the Common Stock represented by such insured obligation.

When-Issued, Delayed Delivery and Forward Commitment Transactions Risk. When purchasing a security on a forward commitment basis, the fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. Because the fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the fund's other investments. Securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of

interest rates. Securities purchased on a forward commitment, when-issued or delayed-delivery basis may expose the fund to risks because they may experience such fluctuations prior to their actual delivery.

Leverage Risk. The fund expects to employ primarily structural leverage through a combination of preferred stock (e.g., the RVMTP shares) and by investing in residual interest bonds that will constitute borrowings for purposes of the Act. The fund is authorized to utilize structural leverage through other forms of borrowings or the issuance of debt securities. The fund also may employ portfolio leverage by using certain portfolio techniques that have the economic effect of leverage, such as through the use of derivative instruments or reverse repurchase agreements, or by engaging in when-issued, delayed delivery or forward commitment transactions. There is no assurance that the fund's leveraging strategies will be successful.

Derivatives Transactions Risk. Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the fund's performance. If the fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the fund's return or result in a loss. The fund also could experience losses if its derivatives were poorly correlated with the underlying instruments or the fund's other investments, or if the fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Although the fund intends to purchase or sell futures contracts or options only if there is an active market for such contracts or options, no assurance can be given that a liquid market will exist for any particular contract or option at any particular time. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives. Additionally, some derivatives the fund may use may involve economic leverage, which may increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, or other economic variable.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives, such as futures contracts and certain options, generally are guaranteed by the clearing agency that is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. In contrast, no clearing agency guarantees over-the-counter derivatives, including some options and most swap agreements (e.g., credit default swaps), and, therefore, there is a risk the counterparty will default. Accordingly, the Sub-Adviser will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. In addition, mandatory margin requirements have been imposed on over-the-counter derivative instruments, which will add to the costs of such transactions.

ADDITIONAL INFORMATION (Unaudited) (continued)

Some derivatives may involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable.

The SEC adopted Rule 18f-4 under the Act which regulates the use of derivatives for certain funds registered under the Act. The fund is required to limit its derivatives exposure so that the total notional value of derivatives does not exceed 10% of the fund's net assets, and is subject to certain reporting requirements.

Market Risk. The value of the securities in which the fund invests may be affected by political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets may negatively affect many issuers, which could adversely affect the fund. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies worldwide. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. The COVID-19 pandemic has had, and any other outbreak of an infectious disease or other serious public health concern could have, a significant negative impact on economic and market conditions and could trigger a prolonged period of global economic slowdown. To the extent the fund may overweight its investments in certain companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those companies, industries or sectors.

Risk of Market Price Discount from Net Asset Value. Shares of closed-end funds, such as the fund, frequently trade at a discount from their net asset value. This characteristic is a risk separate and distinct from the risk that net asset value could decrease as a result of investment activities. The fund cannot predict whether its Common Stock will trade at, above or below net asset value.

Management Risk. The fund is subject to management risk because the Sub- Adviser actively manages the fund. The Sub-Adviser will apply investment techniques and risk analyses in making investment decisions for the fund, but there can be no guarantee that these will produce the desired results.

Cybersecurity Risk. The fund and its service providers are susceptible to operational and information security risks due to cybersecurity incidents. In general, cybersecurity incidents can result from deliberate attacks or unintentional events. Cybersecurity attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or

malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks also may be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make services unavailable to intended users). Cybersecurity incidents affecting the Adviser or other service providers, as well as financial intermediaries, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with the fund's ability to calculate its net asset value; impediments to trading for the fund's portfolio; the inability of Common Stockholders to transact business with the fund; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which the fund invests, counterparties with which the fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cybersecurity, there are inherent limitations in any cybersecurity risk management systems or business continuity plans, including the possibility that certain risks have not been identified. Given the risks described above, an investment in Common Stock may not be appropriate for all investors. You should carefully consider your ability to assume these risks before making an investment in the fund.

Recent Changes & Supplemental Information

During the period ended February 28, 2025, there were: (i) no material changes in the fund's investment objectives or policies that have not been approved by Stockholders, (ii) no changes in the fund's charter or by-laws that would delay or prevent a change of control of the fund that have not been approved by Stockholders, (iii) no material changes to the principal risk factors associated with investment in the fund, and (iv) no change in the persons primarily responsible for the day-to-day management of the fund's portfolio.

IMPORTANT TAX INFORMATION (Unaudited)

In accordance with federal tax law, the fund hereby reports all the dividends paid from net investment income during the fiscal year ended February 28, 2025 as “exempt-interest dividends” (not subject to regular federal income tax). Where required by federal tax law rules, shareholders will receive notification of their portion of the fund’s taxable ordinary dividends (if any), capital gains distributions (if any) and tax-exempt dividends paid for the 2025 calendar year on Form 1099-DIV, which will be mailed in early 2026.
