What were the Fund's costs for the last year?

Investor Shares	\$85	0.82%

How did the Fund perform last year?

- For the 12-month period ended August 31, 2024, the Fund's Investor shares returned 6.94%.
- In comparison, the Bloomberg U.S. Aggregate Bond Index returned 7.30% for the same period.

What affected the Fund's performance?

- Bond prices generally gained ground as inflation moderated, and the U.S. Federal Reserve paused its rate hiking cycle. Corporate bonds outperformed U.S. Treasury bonds, agencies and mortgage-backed securities.
- The Fund's performance relative to the Index benefited from slightly overweight exposure to corporate bonds and solid duration management.
- Overweight exposure to finance-related corporate bonds enhanced relative returns, as did a bias toward lower-coupon mortgage-backed securities.
- A small position in Treasury Inflation-Protected Securities detracted slightly from relative performance.

How did the Fund perform over the past 10 years?

The Fund's past performance is not a good predictor of the Fund's future performance. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.
