The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Data assumes the reinvestment of dividends and capital gains, if any. Performance for periods less than 1 year is not annualized. Go to bny.com/investments for the fund's most recent month-end returns.

A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding.

Market Price Performance is calculated using the most recent NASDAQ Official Closing Price. Market Price returns do not represent investors' returns had they traded shares at other times.

[†]Gross expenses is the total annual operating expense ratio for the fund, before any fee waivers or expense reimbursements. ^{††}Net Expenses is the total annual operating expense ratio for the fund, after any applicable fee waivers or expense reimbursements. The Net Expenses is the actual fund expense ratio applicable to investors.

The performance information shown before January 9, 2026 reflects that of Class M shares of the BNY Mellon Municipal Opportunities Fund ("Predecessor Fund"), which had a different fee structure than the fund. The fund's investment strategies are similar to those of the Predecessor Fund; however, while each fund may invest in derivatives as a part of its principal investment strategy, unlike the Predecessor Fund, the fund's investments in derivatives may also include options on futures and interest rate swaps such as MMD Rate Locks. The performance returns shown are based on the Predecessor Fund's fee structure and investment strategies. Past performance may have been different if the fund's current fee structure and investment strategies had been in place during the period. The NAV and market price performance of the ETF use the predecessor mutual fund's NAV from inception to listing.

¹Source: FactSet. The **Bloomberg U.S. Municipal Bond** Index covers the U.S. dollar-denominated long-term tax-exempt bond market. Investors cannot invest directly in any index. The **S&P Municipal Bond Index** is a broad, market value-weighted index that seeks to measure the performance of the U.S. municipal bond market. The Bloomberg U.S. Municipal Bond Index is the broad-based benchmark for the BNY Mellon Municipal Opportunities ETF. The S&P Municipal Bond Index was the broad-based benchmark for the Predecessor Fund. Investors should consider the investment objectives, risks, charges and expenses of an ETF carefully before investing. To obtain a prospectus, or a summary prospectus, if available, that contains this and other information about an ETF, contact your financial professional. For more information, call 1-800-373-9387 or visit bny.com/investments. Please read the prospectus carefully before investing.

²Portfolio composition is as of 3/31/2026 and is subject to change at any time. ³Credit ratings reflect only those assigned by S&P, Moody's, and/or Fitch. Split-rated securities if any, are reported in the higher rating category. ⁴Bond ratings reflect the rating entity's evaluation of the issuer's ability to pay interest and repay principal on the bond on a timely basis. Bonds rated BBB/Baa or higher are considered investment grade, while bonds rated BB/Ba or lower are considered speculative as to the timely payment of interest and principal. ⁵Source: Insight Investment.

ETF shares are listed on an exchange, and shares are generally purchased and sold in the secondary market at market price. At times, the market price may be at a premium or discount to the ETF's per share NAV. In addition, ETFs are subject to the risk that an active trading market for an ETF's shares may not develop or be maintained. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions.

Market Price is the most recent NASDAQ Official Closing Price. **Premium/Discount** Shareholders may pay more than net asset value when they buy Fund shares and receive less than net asset value when they sell those shares, because shares are bought and sold at current market prices. **20-Day Average Volume** is the sum of last 20 days of trading volume divided by 20 days. **30-Day Median Bid-Ask Spread** gives investors the midpoint within the spread between an ETF's selling price and buying price. It is calculated over the last 30 days in 10 second intervals by dividing the difference between the bid (sell price) and offer (buy price) by the midpoint of the National Best Bid Offer (NBBO) and identifying the median of those values. **SEC 30-day yield** is based upon dividends per share from net investment income during the past 30 days, divided by the period ended maximum offering price per share and annualized. **Average Effective Maturity** is the weighted average of the effective maturity dates of the fixed-income securities in the fund's holdings. It does not take into account the fund's use of leverage. **Modified Duration to Worst** — Yield change calculated to the priced to worst date, including all call features.

Risks: Bonds are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **High yield bonds** involve increased credit and liquidity risk than higher-rated bonds and are considered speculative in terms of the issuer's ability to pay interest and repay principal on a timely basis. **Municipal income** may be subject to state and local taxes. Some income may be subject to the federal alternative minimum tax for certain investors. **ETFs trade like stocks, are subject to investment risk, including possible loss of principal.** The risks of investing in this ETF, typically reflect the risks associated with the types of instruments in which the ETFs invest.

The fund will issue (or redeem) fund shares to certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of fund shares known as "Creation Units." BNY Mellon Securities Corporation ("BNYSC"), a subsidiary of the BNY, serves as distributor of the fund. BNYSC does not distribute fund shares in less than Creation Units, nor does it maintain a secondary market in fund shares. BNYSC may enter into selected dealer agreements with Authorized Participants for the sale of Creation Units of fund shares.

The information being provided is general information about our firm and its products and services. It should not be construed as investment advice or a recommendation with respect to any product or service and should not serve as a primary basis for investment decisions. Please consult a legal, tax or financial professional in order to determine whether an investment product or service is appropriate for a particular situation.

The investment adviser for the fund is BNY Mellon ETF Investment Adviser, LLC (BNYETF). BNYETF has engaged its affiliate, Insight North America LLC, to serve as the fund's sub-adviser. All are subsidiaries of BNY. BNY is the corporate brand of The Bank of New York Mellon Corporation.
