BNY Mellon ETF Trust

BNY Mellon Women's Opportunities ETF

*Supplement to the Summary Prospectus, Prospectus
and Statement of Additional Information*

The Board of Trustees of BNY Mellon ETF Trust (the "Trust") has approved the closing and liquidation of BNY Mellon Women's Opportunities ETF (the "Fund"), a series of the Trust.

The Fund will create and redeem creation units through the close of business on September 12, 2025, which will also be the last day of trading of the Fund's shares on The NASDAQ Stock Market LLC, the Fund's principal U.S. listing exchange. The Fund intends to complete the liquidation of its assets, cease operations, and distribute proceeds to shareholders of record on or about September 19, 2025 (the "Liquidation Date"). Shareholders of record of the Fund on the Liquidation Date will receive cash equal to the net asset value of their shares as of such date (the "Liquidating Distribution").

Prior to the Liquidation Date, the Fund will be in the process of closing down and liquidating its portfolio. During this time, all or a portion of the Fund's portfolio may not be invested in a manner consistent with its stated investment strategy, which may prevent the Fund from achieving its investment objective. Fund shareholders may sell their Fund holdings on The NASDAQ Stock Market LLC through September 12, 2025, after which the Fund's shares will no longer trade on The NASDAQ Stock Market LLC. Customary brokerage charges may apply to such transactions. From September 12, 2025 through the Liquidation Date, shareholders will be unable to sell their shares on The NASDAQ Stock Market LLC.

While shareholders remaining in the Fund on the Liquidation Date will not incur transaction fees, shareholders generally will recognize a capital gain or loss in connection with the Liquidating Distribution. Shareholders should contact their tax adviser to discuss the income tax consequences of the liquidation. The Liquidation Date and payment of the Liquidating Distribution may occur prior to the date listed above.

STATEMENT OF ADDITIONAL INFORMATION

June 30, 2025

This Statement of Additional Information ("SAI"), which is not a prospectus, supplements and should be read in conjunction with the current prospectus dated June 30, 2025, of BNY Mellon Women's Opportunities ETF (the "fund"), a series of BNY Mellon ETF Trust (the "Trust"), as such prospectus may be revised from time to time. To obtain a copy of the fund's prospectus, annual report or semi-annual report to shareholders, or Form N-CSR, please call your financial adviser, or write to the fund at 240 Greenwich Street, New York, New York 10286, visit at www.bny.com/investments, or call 1-833-ETF-BNYM (383-2696) (inside the U.S. only).

The most recent annual report and semi-annual report to shareholders and Form N-CSR for the fund are separate documents, and the financial statements, accompanying notes and reports of the independent registered public accounting firm appearing in the Form N-CSR are incorporated by reference into this SAI and can be accessed by clicking [here](#). Capitalized but undefined terms used in this SAI are defined in the Glossary at the end of this SAI.

The fund's Principal U.S. Listing Exchange: The NASDAQ Stock Market LLC

The fund's Ticker: BKWO

¹ Serves on the board's audit committee and nominating committee

² Represents the number of separate portfolios comprising the investment companies in the "Fund Complex," including the fund, for which the board member served as of the date of this SAI. "Fund complex" comprises registered investment companies for which the Adviser or an affiliate of the Adviser serves as investment adviser.

Additional information about each board member follows (supplementing the information provided in the table above) that describes some of the specific experiences, qualifications, attributes or skills that each board member possesses which the board believes has prepared them to be effective board members. The board believes that the significance of each board member's experience, qualifications, attributes or skills is an individual matter (meaning that experience that is important for one board member may not have the same value for another) and that these factors are best evaluated at the board level, with no single board member, or particular factor, being indicative of board effectiveness. However, the board believes that board members need to have the ability to critically review,

evaluate, question and discuss information provided to them, and to interact effectively with fund management, service providers and counsel, in order to exercise effective business judgment in the performance of their duties; the board believes that its members satisfy this standard. Experience relevant to having this ability may be achieved through a board member's educational background; business, professional training or practice (e.g., medicine, accounting or law), public service or academic positions; experience from service as a board member or as an executive of investment funds, public companies or significant private or not-for-profit entities or other organizations; and/or other life experiences.

J. Charles Cardona – Mr. Cardona has served as the Chairman of the Board for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. He currently also serves as an independent board member for certain funds in the BNY Mellon Family of Funds. Mr. Cardona was the President and a Director of The Dreyfus Corporation, the predecessor company of BNY Mellon Investment Adviser, Inc., and the Chief Executive Officer of Cash Investment Strategies, a division of Dreyfus Corp., until he retired in 2016. From 2013 to 2016, Mr. Cardona served as Chairman of MBSC Securities Corporation, a predecessor firm to the Distributor, and he previously served as an Executive Vice President from 1997 to 2013. He also served as President of the Institutional Services Division of MBSC Securities Corporation. He joined the Institutional Services Division in 1985 with management responsibility for all Institutional Operations and Client Service units. Prior to joining the Institutional Services Division, he served as Assistant Director of Sales and Services in the Dreyfus Retail Division of MBSC Securities Corporation (formerly, Dreyfus Service Corporation), which he joined in 1981.

Kristen M. Dickey – Ms. Dickey has served as an Independent Board Member for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. Ms. Dickey's career spans over 20 years of experience in the investment management industry, before her retirement in 2017. She served in various roles at BlackRock, Inc. over the course of her career, including as Managing Director—Global Head of Index Strategy from 2014 to 2017, Managing Director—Head of Corporate Investor Relations from 2012 to 2014 and Managing Director—Global Head of Financial Institutions Group from 1996 to 2011. Ms. Dickey has served as the lead non-executive director for Aperture Investors, LLC, an investment management firm, since 2018. She has also served as an independent board director of Marstone, Inc., a financial technology company, since 2018, and as a non-executive director of AIMIA, Inc. since 2022. Ms. Dickey has served as a trustee for the New York City park nonprofits Friends of the High Line from 2006, where she is also the head of the investment committee, and the Battery Conservancy, where she is also the treasurer, since 2005 and 2011, respectively. She has served as an advisory board member for the nonprofits Girls Who Invest and the Council for Economic Education since 2018 and 2017, respectively.

F. Jack Liebau, Jr. – Mr. Liebau has served as an Independent Board Member for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. Mr. Liebau has over 30 years of experience in the investment management industry. He has served in various roles over the course of his career, including as a partner, portfolio manager and head of compliance at Primecap Management Co. from 1986 to 2003, president, portfolio manager and head of compliance at Liebau Asset Management from 2003 to 2011, portfolio manager and partner at Davis Advisors from 2011 to 2013, President and Chief Executive Officer at Roundwood Asset Management from 2013 to 2015, a Managing Director at Beach Investment Counsel from 2020 to 2024, and a private investor and corporate director since 2015. Mr. Liebau has served as a board member of numerous organizations, including as a director of media company Media General from 2008 to 2009, a director of defense firm Herley Industries from 2010 to 2011, a corporate director of automotive aftermarket retailer Pep Boys from 2015 to 2016, a director of industrial company Myers Industries since 2015 and the Chairman of the Board of Myers Industries since 2016, the Non-Executive Chairman of the Board of information technology and investigations firm Special Investigations Limited Company since 2017, an independent director of S3 Software, an unlisted software company serving media companies, since 2020, a director of automotive power and security solutions company STRATTEC Security Corp. since 2023 and the Chairman of the Board of STRATTEC Security Corp. since 2024, and a director of automotive parts company Motorcar Parts of America since 2024.

Jill I. Mavro – Ms. Mavro has served as an Independent Board Member for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. She brings over 30 years of experience in the asset management industry, having held a variety of leadership roles throughout her career. From 1995 to 2018, Ms. Mavro was with State Street Global Advisors (SSGA), where she initially worked in the

asset servicing division from 1995 to 1997 before transitioning to the asset management division from 1997 to 2018. During her tenure, she held several senior positions, ultimately serving as Senior Managing Director, responsible for developing and managing strategic relationships with the firm's largest clients. Ms. Mavro is currently President and Founder of Spoondrift Advisory, LLC, an investment management consulting firm, since 2018. She also currently serves as an independent trustee for GoldenTree Opportunistic Credit Fund since 2025. From 2020 to 2025, she was a Managing Director at Transaction Strategies, LLC (formerly CapWGlobal, LLC). Her board service includes past and present roles with several organizations: Sectoral Asset Management from 2013 to 2015, Women in ETFs, Inc. since 2013, and the Overseers Board of Beth Israel Deaconess Medical Center since 2014. She also served on the SPDR Executive Committee at SSGA from 2014 to 2018.

Kevin W. Quinn – Mr. Quinn has served as an Independent Board Member for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. Mr. Quinn gained over 35 years of experience in the audit, tax and accounting field before his retirement in 2019. He served as a partner at PricewaterhouseCoopers, LLC from 1997 to 2019. He is a Certified Public Accountant and holds the Chartered Financial Analyst designation from the CFA Institute. Mr. Quinn has also served as trustee as part of the Catholic Charities – Archdiocese of Boston, MA from 2001 to 2013, Mutual Funds Against Cancer from 2003 to 2008 and INROADS, an organization that seeks to promote ethnic and racial diversity in the corporate workplace, from 1997 to 2000.

Stacy L. Schaus – Ms. Schaus has served as an Independent Board Member for the funds in the BNY Mellon ETF Trust since 2020 and the funds in the BNY Mellon ETF Trust II since 2024. Ms. Schaus has over 37 years of experience in the financial and investment management industries. She served as a vice president at Merrill Lynch Capital Markets from 1981 to 1989, as the founder and Chief Executive Officer/Chief Operating Officer of Hewitt Financial Services, a registered investment adviser and brokerage, from 1992 to 2006, as the President of the Hewitt Series Trust from 1992 to 2006, as Executive Vice President—Defined Contribution Practice Founder at PIMCO Investment Management from 2006 to 2018, and has served as the founder and Chief Executive Officer of the Schaus Group LLC, a consulting firm, since 2019. Ms. Schaus has served as a board member of several organizations, including as a board member of the nonprofit Financial Planning Association from 2005 to 2007, the founder and chairwoman of the nonprofit Defined Contribution Institutional Investment Association from 2010 to 2012 and the chairwoman (from 2018 to 2020) and executive committee member (from 2018 to 2021) of the nonprofit Employee Benefit Research Institute. She has served as a member of the financial technology committee of the nonprofit Society of Actuaries since 2019 and as an advisory board member of A&P Capital, a consulting firm, from 2019 until 2021.

Committee Meetings

The board has the following standing committees: audit committee and nominating committee. The Board's audit and nominating committees met during the fiscal year ended February 28, 2025 as indicated below:

Fund	Audit	Nominating
BKWO	3	0

Board Members' Fund Share Ownership

The table below indicates the dollar range of each board member's ownership of fund shares, in each case as of December 31, 2024.

Fund	J. Charles Cardona	Kristen M. Dickey	F. Jack Liebau	Jill I. Mavro	Kevin W. Quinn	Stacy L. Schaus
BKWO	None	None	None	None	None	None

Fund	J. Charles Cardona	Kristen M. Dickey	F. Jack Liebau	Jill I. Mavro	Kevin W. Quinn	Stacy L. Schaus
Aggregate holdings of funds in the Trust	None	None	\$50,001 - \$100,000	Over \$100,001	\$10,001 - \$50,000	Over \$100,001

As of December 31, 2024, none of the independent board members or their immediate family members owned securities of the Adviser, the Sub-Adviser, the sub-sub-adviser, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Adviser, the Sub-Adviser, the sub-sub-adviser, or the Distributor.

Board Members' Compensation

The Independent Board Members are not compensated directly by the fund. The Independent Board Members are paid by the Adviser from the unitary management fee paid to the Adviser by the fund. The Independent Board Members are also reimbursed for their covered expenses. For the fiscal year ended February 28, 2025, the Adviser paid the Independent Board Members the following:

Name of Independent Board Member	Aggregate Compensation from the Trust	Pension of Retirement Benefits Accrued as Part of Trust Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From the Trust and Fund Complex Paid to Independent Board Members⁽¹⁾
J. Charles Cardona	\$96,923	N/A	N/A	\$271,700
Kristen M. Dickey	\$77,538	N/A	N/A	\$77,538
F. Jack Liebau, Jr.	\$77,538	N/A	N/A	\$77,538
Jill I. Mavro	\$77,538	N/A	N/A	\$77,538
Kevin W. Quinn	\$89,982	N/A	N/A	\$89,982
Stacy L. Schaus	\$77,538	N/A	N/A	\$77,538

- ⁽¹⁾ Represents total compensation from all investment companies in the fund complex, including the fund, for which the board member served as of the date of this SAI. "Fund complex" comprises registered investment companies for which the Adviser or an affiliate of the Adviser serves as investment adviser.

² "Fund complex" comprises registered investment companies for which the Adviser or an affiliate of the Adviser serves as investment adviser.

The address of each officer is 240 Greenwich Street, New York, New York 10286.

CERTAIN PORTFOLIO MANAGER INFORMATION

The following table lists the number and types of accounts advised by the fund's primary portfolio managers and assets under management in those accounts as of the end of the fund's last fiscal year, February 28, 2025.

Primary Portfolio Managers	Registered Investment Companies	Total Assets Managed (in millions)	Other Pooled Investment Vehicles	Total Assets Managed (in millions)	Other Accounts	Total Assets Managed (in millions)
Karen Behr	9	\$6,063	4	\$357	8	\$1,743
Julianne McHugh	3	\$3,173	3	\$645	4	\$369

The following table provides information on accounts managed (included within the table above) by the primary portfolio managers that are subject to performance-based advisory fees.

Primary Portfolio Managers	Registered Investment Companies	Total Assets Managed (in millions)	Other Pooled Investment Vehicles	Total Assets Managed (in millions)	Other Accounts	Total Assets Managed (in millions)
Karen Behr	None	N/A	None	N/A	None	N/A
Julianne McHugh	None	N/A	None	N/A	None	N/A

The following table lists the dollar range of fund shares beneficially owned by the fund's primary portfolio managers as of the end of the fund's last fiscal year, February 28, 2025.

Primary Portfolio Manager	Fund	Dollar Range of Fund Shares Beneficially Owned
Karen Behr	BKWO	\$10,001 - \$50,000
Julianne McHugh	BKWO	\$1 - \$10,000

ADVISER'S AND SUB-ADVISER'S COMPENSATION; COMPLIANCE SERVICES

Adviser's Compensation

The fund pays a monthly management fee to the Adviser at the annual rate of 0.50% of the value of the fund's average daily net assets. For the fund's fiscal period from May 18, 2023 (commencement of operations) to February 29, 2024 and the fiscal year ended February 28, 2025, the management fees payable by the fund, the reduction, if any, in the amount of the fee paid due to fee waivers and/or expense reimbursements by the Adviser and the net fees paid by the fund were as follows:

Fund	2025 Fiscal Year				2024 Fiscal Period ¹		
	Fee rate	Fee payable	Reduction in fee	Net fee paid	Fee payable	Reduction in fee	Net fee paid
BKWO	0.50%	\$67,640	\$0	\$67,640	\$42,577	\$0	\$42,577

¹ The fund commenced operations on May 18, 2023.

Sub-Adviser's Compensation

The Adviser pays a monthly sub-advisory fee to NIMNA, as Sub-Adviser, at the annual rate of 0.25% of the value of the fund's average daily net assets. The Adviser, and not the fund, pays the Sub-Adviser's fee rate. For the fund's fiscal period from May 18, 2023 (commencement of operations) through February 29, 2024, and the fiscal year ended February 28, 2025, the fees payable by the Adviser to the Sub-Adviser, the reduction, if any, in the amount of the fee paid due to fee waivers and/or expense reimbursements by the Sub-Adviser and the net fees paid by the fund were as follows:

Fund	2025 Fiscal Year				2024 Fiscal Period ¹		
	Fee rate	Fee payable	Reduction in fee	Net fee paid	Fee payable	Reduction in fee	Net fee paid
BKWO	0.25%	\$33,723	\$0	\$33,723	\$21,288	\$0	\$21,288

¹ The fund commenced operations on May 18, 2023.

Compliance Services

The fund's compliance program is developed, implemented and maintained by the fund's CCO and his staff. The CCO's staff works on the compliance program and related matters for the fund. There will be no allocation to the fund of compensation expenses for the CCO and his staff. Because the fund is a unitary fee fund, such compliance compensation and expenses are borne by the Adviser.

SECURITIES LENDING ACTIVITIES

The board has approved participation in a securities lending program for the fund. Under the securities lending program, The Bank of New York Mellon serves as the fund's securities lending agent ("Securities Lending Agent"). The following table shows the dollar amounts of income and fees/compensation related to the securities lending activities of the fund during the fiscal year ended February 28, 2025.

Fund	BKWO
Gross income from securities lending activities (including income from cash collateral reinvestment)	\$30.47
<i>Fees and/or compensation for securities lending activities and related</i>	

Fund	BKWO
<i>services</i>	
Fees paid to securities lending agent from a revenue split	(\$3.58)
Fees paid for any cash collateral management service (including fees deducted from a pooled cash collateral reinvestment vehicle) that are not included in the revenue split	\$0
Administrative fees not included in revenue split	\$0
Indemnification fees not included in revenue split	\$0
Rebate (paid to borrower)	(\$0.49)
Rebate (due from borrower)	\$0
Other fees not included in revenue split	\$0
Aggregate fees/compensation for securities lending activities	(\$4.07)
Net income from securities lending activities	\$26.40

The services provided by The Bank of New York Mellon as Securities Lending Agent were as follows: selection of securities to be loaned; locating borrowers previously approved by the fund's board; negotiation of loan terms; monitoring daily the value of the loaned securities and collateral; requiring additional collateral as necessary; investing cash collateral in accordance with the fund's instructions; marking to market non-cash collateral; maintaining custody of non-cash collateral; recordkeeping and account servicing; monitoring dividend activity and material proxy votes relating to loaned securities; transferring loaned securities; recalling loaned securities in accordance with the fund's instructions; and arranging for return of loaned securities to the fund at loan termination.

OFFERING PRICE

The fund offers and issues its shares at their net asset value ("NAV") only in aggregations of a specified number of shares (each, a "Creation Unit"). The fund generally offers and issues its shares either in exchange for (i) a basket of securities designated by the fund ("Deposit Securities") together with the deposit of a specified cash payment ("Cash Component") or (ii) a cash payment equal in value to the Deposit Securities ("Deposit Cash") together with the Cash Component. The primary consideration accepted by the fund (*i.e.*, Deposit Securities or Deposit Cash) is set forth under "Purchase and Redemption of Creation Units" later in this SAI. The Trust reserves the right to permit or require the substitution of a "cash in lieu" amount to be added to the Cash Component to replace any Deposit Security and reserves the right to permit or require the substitution of Deposit Securities in lieu of Deposit Cash (subject to applicable legal requirements). The Trust also reserves the right to deviate from a representative selection of the fund's portfolio holdings as part of the Deposit Securities if such deviation is in the best interests of the fund and its shareholders. The shares have been approved for listing and secondary trading on a national securities exchange ("Exchange"). The shares will trade on the Exchange at market prices. These prices may differ from the shares' NAVs. The shares are also redeemable only in Creation Unit aggregations, and generally in exchange either for (i) portfolio securities and a specified cash payment or (ii) cash (subject to applicable legal requirements). For the preceding, the Trust reserves the right to deviate from a representative selection of the fund's portfolio holdings if such deviation is in the best interests of the fund and its shareholders.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the Participant Agreement. See "Purchase and Redemption of

Creation Units." The Trust may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities. In addition to the fixed creation or redemption transaction fee, an additional transaction fee of up to three times the fixed creation or redemption transaction fee and/or an additional variable charge may apply as discussed in the section "Purchase and Redemptions of Creation Units" in Part II of this SAI below.

CONTINUOUS OFFERING

The method by which Creation Units of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Trust on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus-delivery obligation with respect to shares of the fund are reminded that under Securities Act Rule 153, a prospectus-delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on an exchange is satisfied by the fact that the fund's prospectus is available at the exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

The Adviser or its affiliates (the "Selling Shareholder") may purchase Creation Units through a broker-dealer to "seed" (in whole or in part) funds as they are launched, or may purchase shares from broker-dealers or other investors that have previously provided "seed" for funds when they were launched or otherwise in secondary market transactions, and because the Selling Shareholder may be deemed an affiliate of such funds, the fund shares are being registered to permit the resale of these shares from time to time after purchase. The fund will not receive any of the proceeds from the resale by the Selling Shareholders of these fund shares.

The Selling Shareholder intends to sell all or a portion of the fund shares owned by it and offered hereby from time to time directly or through one or more broker-dealers, and may also hedge such positions. The fund shares may be sold on any national securities exchange on which the fund shares may be listed or quoted at the time of sale, in the over-the-counter market or in transactions other than on these exchanges or systems at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of sale, or at negotiated prices. These sales may be effected in transactions, which may involve cross or block transactions.

The Selling Shareholder may also loan or pledge fund shares to broker-dealers that in turn may sell such fund shares, to the extent permitted by applicable law. The Selling Shareholder may also enter into options or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of fund shares, which fund shares such broker-dealer or other financial institution may resell.

The Selling Shareholder and any broker-dealer or agents participating in the distribution of fund shares may be deemed to be "underwriters" within the meaning of Section 2(a)(11) of the Securities Act in connection with such sales. In such event, any commissions paid to any such broker-dealer or agent and any profit on the resale of the fund shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities

Act. The Selling Shareholder who may be deemed an "underwriter" within the meaning of Section 2(a)(11) of the Securities Act will be subject to the applicable prospectus delivery requirements of the Securities Act.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the fund is contained in the fund's prospectus under "Purchase and Sale of Fund Shares" and "Additional Purchase and Sale Information." The discussion below supplements, and should be read in conjunction with, such sections of the prospectus.

Shares are approved for listing and trading on the Exchange, subject to notice of issuance. Shares trade on the Exchange at prices that may differ to some degree from their NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares of the fund will continue to be met.

The Exchange may consider the suspension of trading in, and may initiate delisting proceedings of, the shares of the fund under any of the following circumstances: (i) if the Exchange becomes aware that the fund is no longer eligible to operate in reliance on Rule 6c-11 under the 1940 Act; (ii) if the fund no longer complies with the applicable listing requirements set forth in the Exchange's rules; (iii) if, following the initial twelve-month period after commencement of trading on the Exchange of the fund, there are fewer than 50 beneficial holders of the fund; or (iv) if such other event shall occur or condition exists which, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares from listing and trading upon termination of the fund. The Trust reserves the right to adjust the share price of the fund in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the fund.

As in the case of other publicly traded securities, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The base and trading currencies of the fund is the U.S. dollar. The base currency is the currency in which the fund's NAV per share is calculated and the trading currency is the currency in which shares of the fund are listed and traded on the Exchange.

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the prospectus entitled "Additional Purchase and Sale Information."

The DTC acts as securities depository for the shares. Shares of the fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC. Except in the limited circumstance provided below, certificates will not be issued for shares. DTC, a limited-purpose trust company, was created to hold securities of its participants (the "DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the depository agreement between the Trust and DTC, DTC is required to make available to the Trust

upon request and for a fee to be charged to the Trust a listing of the shares of the fund held by each DTC Participant. The Trust, either directly or through a third party service, shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust, either directly or through a third party service, shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant and/or third party service a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

SECURITIES OF REGULAR BROKERS OR DEALERS

The fund may acquire securities issued by one or more of its "regular brokers or dealers," as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1 provides that a "regular broker or dealer" is one of the ten brokers or dealers that, during the fund's last fiscal year: (1) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the fund's portfolio transactions, (2) engaged as principal in the largest dollar amount of the fund's portfolio transactions, or (3) sold the largest dollar amount of the fund's securities. The following is a list of the issuers of the securities and the aggregate value per issuer, of the fund's regular brokers or dealers held by the fund as of February 28, 2025, the end of its most recent fiscal year:

Regular Broker or Dealer	Aggregate Value Per Issuer Held By the Fund
JPMorgan Chase & Co.	\$670,623
Bank of America Securities, Inc.	\$284,345

COMMISSIONS

The following table sets forth the approximate aggregate amounts of commissions paid by the fund for brokerage for the fiscal period May 18, 2023 (commencement of operations) to February 29, 2024 and fiscal year ended February 28, 2025:

Fund	2025 Fiscal Year Commissions	2024 Fiscal Period Commissions¹
BKWO	\$1,670	\$656

¹ The fund commenced operations on May 18, 2023.

The aggregate amount of transactions during the fund's most recent fiscal year in securities effected on an agency basis through a broker-dealer for, among other things, research services and the commissions related to such transactions were as follows:

Fund	Transactions	Related Commissions
BKWO	\$8,448,162	\$514

PORTFOLIO TURNOVER VARIATION

The fund's portfolio turnover rate for its two most recent fiscal periods is shown in the prospectus. There was no significant variation in the fund's portfolio turnover rate over the last two fiscal periods nor is there any anticipated significant variation in the portfolio turnover rate from that reported for the most recently completed fiscal year.

SHARE OWNERSHIP

Although the Trust does not have information concerning the beneficial ownership of shares held in the names of DTC participants, as of June 2, 2025, the name and percentage ownership of each DTC participant that owned of record 5% or more outstanding shares of the fund were as follows:

Date	Fund	Name and Address	Percent Owned
June 2, 2025	BKWO	The Bank of New York Mellon 525 William Penn Place Suite 153 Pittsburgh, PA 15259	85.11%
		Charles Schwab & Company, Inc. 211 Main Street San Francisco, CA 94105	5.53%

A shareholder who beneficially owns, directly or indirectly, more than 25% of the fund's voting securities may be deemed to "control" (as defined in the 1940 Act) the fund. An Authorized Participant may hold of record more than 25% of the outstanding shares of the fund. From time to time, Authorized Participants may be a beneficial and/or legal owner of the fund, may be deemed to have control of the fund and/or may be able to affect the outcome of matters presented for a vote of the shareholders of the fund. Authorized Participants may execute an irrevocable

proxy granting the Distributor or an affiliate of the Distributor (the "Agent") power to vote or abstain from voting such Authorized Participant's beneficially or legally owned shares of the fund. In such cases, the Agent shall mirror vote (or abstain from voting) such shares in the same proportion as all other beneficial owners of the fund.

Board members and officers, as a group, owned less than 1% of the fund's voting securities outstanding as of June 2, 2025.

Certain shareholders of the fund may from time to time own or control a significant percentage of the fund's shares ("Large Shareholders"). Large Shareholders may include, for example, institutional investors, funds of funds, affiliates of the Adviser, and discretionary advisory clients whose buy-sell decisions are controlled by a single decision-maker, including separate accounts and/or funds managed by the Adviser or its affiliates. Large Shareholders may sell all or a portion of their shares of the fund at any time or may be required to sell all or a portion of their shares in order to comply with applicable regulatory restrictions (including, but not limited to, restrictions that apply to U.S. banking entities and their affiliates, such as the Adviser). Sales by Large Shareholders of their shares of the fund may cause Authorized Participants to engage in redemption requests, which in turn may force the fund to sell securities at an unfavorable time and/or under unfavorable conditions, or sell more liquid assets of the fund, in order to meet redemption requests for any redemptions in cash as opposed to in-kind. These sales for any cash redemption baskets may adversely affect both the fund's market price and NAV and may result in increasing the fund's liquidity risk, transaction costs and/or taxable distributions.

From time to time, BNY Investments' managers, and the Adviser, may sponsor and/or manage a fund in which a BNY affiliate invests seed capital ("Seed Capital"). Such investments may raise potential conflicts of interest because a BNY affiliate, as an investor in the fund, may possess material information about the fund that may not be available to other fund investors. This informational advantage could be perceived as enabling a BNY affiliate to invest or redeem Seed Capital in a manner that conflicts with the interests of other fund investors and/or benefits BNY or its affiliates. In order to mitigate such conflicts, BNY has implemented a policy (the "Seed Capital Investment and Redemption Policy") that governs its affiliates' investment and redemption of Seed Capital in the fund. The Seed Capital Investment and Redemption Policy includes specific parameters that govern the timing and extent of the investment and redemption of Seed Capital, which may be set according to one or more objective factors expressed in terms of timing, asset level, investment performance goals or other criteria approved by BNY. In extraordinary circumstances and subject to certain conditions, BNY will have the authority to modify the application of the Seed Capital Investment and Redemption Policy to a particular investment of Seed Capital after the investment has been made. The Seed Capital Investment and Redemption Policy does not apply (i) in cases where Seed Capital is invested in a fund that has no third party investors and (ii) to investments or redemptions that are required in order to comply with applicable regulatory restrictions (including, but not limited to, restrictions that apply to U.S. banking entities and their affiliates, such as the Adviser).

PURCHASE AND REDEMPTION OF CREATION UNITS

The fund issues and redeems its shares on a continuous basis, at NAV, only in a large, specified number of shares called a "Creation Unit." The value of the fund is determined once each business day. The Creation Unit size for the fund may change. Authorized Participants will be notified of such change. Creation Unit transactions may be made in-kind, for cash, or for a combination of securities and cash. The principal consideration for creations and redemptions for the fund is in-kind, although this may be revised at any time without notice.

PURCHASE (CREATION). The Trust issues and sells shares of the fund only: in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees), at their NAV per share next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement ("Participant Agreement").

FUND DEPOSIT. The consideration for purchase of a Creation Unit of the fund generally consists of either (i) the Deposit Securities and the Cash Component (defined below), computed as described below; or (ii) the cash value of the Deposit Securities and the Cash Component, computed as described below. When accepting purchases of Creation Units for cash, the fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the "Fund Deposit," which represents the minimum initial and subsequent investment amount for a Creation Unit of the fund. The Cash Component, which may include a Dividend Equivalent Payment, is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the market value of the Deposit Securities or Deposit Cash, as applicable. The "Dividend Equivalent Payment" enables the fund to make a complete distribution of dividends on the day preceding the next dividend payment date, and is an amount equal, on a per Creation Unit basis, to the dividends on all the portfolio securities of the fund ("Dividend Securities") with ex-dividend dates within the accumulation period for such distribution (the "Accumulation Period"), net of expenses and liabilities for such period, as if all of the Dividend Securities had been held by the fund for the entire Accumulation Period. The Accumulation Period begins on the ex-dividend date for the fund and ends on the day preceding the next ex-dividend date. If the Cash Component is a positive number (i.e., the NAV per Creation Unit exceeds the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (i.e., the NAV per Creation Unit is less than the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant (as defined below).

The Custodian, through NSCC, makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current standard Fund Deposit (based on information at the end of the previous Business Day) for the fund. Such standard Fund Deposit is subject to any applicable adjustments as described below, in order to effect purchases of Creation Units of the fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for a Fund Deposit for the fund may be changed from time to time with a view to the investment objective of the fund. Information regarding the Fund Deposit necessary for the purchase of a Creation Unit is made available to Authorized Participants and other market participants seeking to transact in Creation Unit aggregations.

As noted above, the Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component, including, without limitation, in situations where the

Deposit Security: (i) may not be available in sufficient quantity for delivery, (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities or the Federal Reserve System for U.S. Treasury securities; (iii) may not be eligible for trading by an Authorized Participant or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws, or (v) in certain other situations (collectively, "non-standard orders"). The Trust also reserves the right to: (i) permit or require the substitution of Deposit Securities in lieu of Deposit Cash; and (ii) include or remove Deposit Securities from the basket in anticipation of portfolio changes.

PROCEDURES FOR PURCHASE OF CREATION UNITS. To be eligible to place orders with the Distributor, as facilitated via the Transfer Agent, to purchase a Creation Unit of the fund, an entity must be (i) a "Participating Party", i.e., a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the "Clearing Process"), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see "Book Entry Only System"). In addition, each Participating Party or DTC Participant (each, an "Authorized Participant") must execute a Participant Agreement that has been agreed to by the Distributor and the Transfer Agent, and that has been accepted by the Trust, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the creation transaction fee (described below) and any other applicable fees, taxes and additional variable charge.

All orders to purchase shares directly from the fund, including non-standard orders, must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or the applicable order form. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the "Order Placement Date."

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase shares directly from the fund in Creation Units have to be placed by the investor's broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, the fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the fund's investments are primarily traded is closed, the fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. Those placing orders through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order by the cut-off time. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash and U.S. government securities), or through DTC (for corporate securities and municipal securities), through a subcustody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the subcustodian of the fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities. Foreign Deposit Securities must be delivered to an account maintained at the applicable local subcustodian. The Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the fund or its agents by no later than the Settlement Date. The "Settlement Date" for the fund is generally the first Business Day ("T+1") after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as

to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Distributor, such canceled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the fund. The delivery of Creation Units so created generally will occur no later than the first Business Day following the day on which the purchase order is deemed received by the Distributor.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited with the Custodian on the Settlement Date per applicable instructions. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received on the Settlement Date per applicable instructions, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the fund for losses, if any, resulting therefrom. A creation request is considered to be in "proper form" if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

ISSUANCE OF A CREATION UNIT. Except as provided herein, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the subcustodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant subcustodian or subcustodians, the Distributor and the Adviser shall be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units.

In instances where the Trust accepts Deposit Securities for the purchase of a Creation Unit, the Creation Unit may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the market value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the "Additional Cash Deposit"), which shall be maintained in a general non-interest bearing collateral account. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily marked to market value of the missing Deposit Securities. The Trust may use such Additional Cash Deposit to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for all costs, expenses, dividends, income and taxes associated with missing Deposit Securities, including the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee as set forth below under "Creation and Redemption Transaction Fees" will be charged in all cases and an additional variable charge may also be applied. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

ACCEPTANCE OF ORDERS OF CREATION UNITS. The Trust reserves the right to reject an order for Creation Units transmitted in respect of the fund at its discretion for any legally permissible reason, including, but not limited to, if (a) the order is not in proper form or the Deposit Securities delivered do not consist of the securities that the Custodian specified; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Authorized Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the fund; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (f) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent, the Distributor and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units. Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts;

systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Trust or its agents shall communicate to the Authorized Participant its rejection of an order. The Trust, the Transfer Agent, the Custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units. Given the importance of the ongoing issuance of Creation Units to maintaining a market price that is at or close to the underlying net asset value of a fund, the Trust does not intend to suspend acceptance of orders for Creation Units.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

REDEMPTION. Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the fund through the Transfer Agent and only on a Business Day. Except upon liquidation of the fund, the Trust will not redeem shares in amounts less than Creation Units. Investors must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

The Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m. Eastern time) on each Business Day, the list of the names and share quantities of securities designated by the fund that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Redemption Securities"). Redemption Securities received on redemption may not be identical to Deposit Securities. The identity and number of shares of the Redemption Securities or the Cash Redemption Amount (defined below) may be changed from time to time with a view to the investment objective of the fund.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash or a combination thereof, as determined by the Trust. With respect to in-kind redemptions of the fund, redemption proceeds for a Creation Unit will consist of Redemption Securities plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Redemption Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee and any applicable additional variable charge as set forth below. In the event that the Redemption Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Redemption Securities.

PROCEDURES FOR REDEMPTION OF CREATION UNITS. After the Trust has deemed an order for redemption received, the Trust will initiate procedures to transfer the requisite Redemption Securities and the Cash Redemption Amount to the Authorized Participant by the Settlement Date. The Settlement Date for orders to redeem shares is generally the first Business Day (T+1) after the Order Placement Date. With respect to in-kind redemptions of the fund, the calculation of the value of the Redemption Securities and the Cash Redemption Amount to be delivered upon redemption will be made by the Custodian computed on the Business Day on which a redemption order is deemed received by the Trust. Therefore, if a redemption order in proper form is submitted to the Distributor by a DTC Participant by the specified time on the Order Placement Date, and the requisite number of shares of the fund are delivered to the Custodian per applicable instructions on the Settlement Date, then the value of the Redemption Securities and the Cash Redemption Amount to be delivered will be determined by the Custodian on such Order Placement Date. If the requisite number of shares of the fund are not delivered on the Settlement Date per applicable instructions, the fund will not release the underlying securities for delivery unless collateral is posted in such percentage amount of missing shares as set forth in the Participant Agreement (marked to market daily).

With respect to in-kind redemptions of the fund, in connection with taking delivery of shares of Redemption Securities upon redemption of Creation Units, an Authorized Participant must maintain appropriate custody

arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Redemption Securities are customarily traded (or such other arrangements as allowed by the Trust or its agents), to which account such Redemption Securities will be delivered. The Fund generally intends to effect deliveries of redemption proceeds on a T+1 basis. Due to the schedule of holidays in certain countries, however, the delivery of in-kind redemption proceeds may take longer than the standard settlement period following the day on which the redemption request is received in proper form. If the Authorized Participant has not made appropriate arrangements to take delivery of the Redemption Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Redemption Securities in such jurisdiction, the Trust may, in its discretion, exercise its option to redeem such shares in cash, and the Authorized Participant will be required to receive its redemption proceeds in cash. If it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Redemption Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions described below, to offset the Trust's brokerage and other transaction costs associated with the disposition of Redemption Securities). The fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Redemption Securities but does not differ in NAV.

An Authorized Participant submitting a redemption request is deemed to represent to the Trust that, as of the close of the Business Day on which the redemption request was submitted, it (or its client) will own (within the meaning of Rule 200 of Regulation SHO) or has arranged to borrow for delivery to the Trust on or prior to the Settlement Date of the redemption request, the requisite number of shares of the fund to be redeemed as a Creation Unit. In either case, the Authorized Participant is deemed to acknowledge that: (i) it (or its client) has full legal authority and legal right to tender for redemption the requisite number of shares of the fund and to receive the entire proceeds of the redemption; and (ii) if such shares submitted for redemption have been loaned or pledged to another party or are the subject of a repurchase agreement, securities lending agreement or any other arrangement affecting legal or beneficial ownership of such shares being tendered, there are no restrictions precluding the tender and delivery of such shares (including borrowed shares, if any) for redemption, free and clear of liens, on the redemption Settlement Date. The Trust reserves the right to verify these representations at its discretion, but will typically require verification with respect to a redemption request from the fund in connection with higher levels of redemption activity and/or short interest in the fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of its representations as determined by the Trust, the redemption request will not be considered to have been received in proper form and may be rejected by the Trust.

Redemptions of shares for Redemption Securities will be subject to compliance with applicable federal and state securities laws and the fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Redemption Securities upon redemptions or could not do so without first registering the Redemption Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Redemption Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an Authorized Participant that is not a "qualified institutional buyer," ("QIB") as such term is defined under Rule 144A of the Securities Act, will not be able to receive Redemption Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status in order to receive Redemption Securities.

The right of redemption may be suspended or the date of payment postponed for the fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the fund or determination of the NAV of the shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

REQUIRED EARLY ACCEPTANCE OF ORDERS FOR CERTAIN INTERNATIONAL FUNDS.

Notwithstanding the foregoing, as described in the Participant Agreement and/or the applicable order form, the fund may require orders to be placed prior to the trade date, as described in the Participant Agreement or the applicable order form, in order to receive the trade date's NAV. The cut-off time to receive the trade date's NAV will not precede the calculation of the NAV of the fund's shares on the prior Business Day. Orders to purchase shares of the fund that are submitted on the Business Day immediately preceding a holiday or a day (other than a weekend) that the equity markets in the relevant foreign market are closed may not be accepted. Authorized Participants may be notified that the cut-off time for an order may be earlier on a particular Business Day, as described in the Participant Agreement and the applicable order form.

CREATION AND REDEMPTION TRANSACTION FEES. A transaction fee, as set forth in the tables below, is imposed for the transfer and other transaction costs associated with the purchase or redemption of Creation Units, as applicable. Authorized Participants will be required to pay a fixed creation transaction fee and/or a fixed redemption transaction fee, as applicable, on a given day regardless of the number of Creation Units created or redeemed on that day. The fund may adjust the transaction fee from time to time. An additional charge or a variable charge (discussed below) will be applied to certain creation and redemption transactions, including non-standard orders and whole or partial cash purchases or redemptions. With respect to creation orders, Authorized Participants are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Trust and with respect to redemption orders, Authorized Participants are responsible for the costs of transferring the Redemption Securities from the Trust to their account or on their order. Investors who use the services of a broker or other such intermediary may also be charged a fee for such services.

The transaction fee for purchases and redemptions of Creation Units of the fund is \$150.

From time to time, the fund may waive all or a portion of its applicable transaction fee(s). An additional charge of up to three (3) times the standard transaction fee may be charged to the extent a transaction is outside of the clearing process.

In addition to the transaction fees noted above, the fund may charge an additional variable fee for transactions in cash to offset brokerage and impact expenses associated with the cash transaction. The variable transaction fee will be calculated based on historical transaction cost data and the Adviser's view of current market conditions; however, the actual variable fee charged for a given transaction may be lower or higher than the trading expenses incurred by the fund with respect to that transaction.

INVESTMENTS, INVESTMENT TECHNIQUES AND RISKS

The following charts, which supplement and should be read together with the information in the prospectus, indicate some of the specific investments and investment techniques applicable to the fund. Additional policies and restrictions are described in the prospectus and below in the next section (see "Investment Restrictions"). *See "Additional Information About Investments, Investment Techniques and Risks" in Part III of this SAI for more information, including important risk disclosure, about the investments and investment techniques applicable to the fund.*

BNY Mellon Women's Opportunities ETF	✓	✓	✓	✓	✓	✓	✓	✓

- ¹ Money market instruments consist of high quality, short-term debt obligations, including U.S. Government securities, bank obligations, repurchase agreements and commercial paper. For the fund, (1) when the Adviser determines that adverse market conditions exist, the fund may adopt a temporary defensive position and invest up to 100% of its assets in money market instruments, and (2) the fund also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position. When the fund has adopted a temporary defensive position, it may not achieve its investment objective. The commercial paper purchased by the fund will consist only of obligations which, at the time of their purchase, are (a) rated at least Prime-1 by Moody's or A-1 by S&P; (b) issued by companies having an outstanding unsecured debt issue currently rated at least Aa by Moody's or AA- by S&P; or (c) if unrated, determined by the Adviser to be of comparable quality to those rated obligations which may be purchased by the fund.

INVESTMENT RESTRICTIONS

"Fundamental Policies" may not be changed without approval of the holders of a majority of the fund's outstanding voting securities (as defined in the 1940 Act). Under the 1940 Act, the vote of a majority of the fund's outstanding

voting securities means the vote of (A) 67% or more of the voting securities present at a meeting, if the holders of more than 50% of the outstanding voting securities of the fund are present or represented by proxy; or (B) more than 50% of the outstanding voting securities of the fund, whichever is less. "Nonfundamental Policies" may be changed at any time, without shareholder approval, by a vote of a majority of the board members and in compliance with applicable law and regulatory policy. Notwithstanding investments and activities referenced in the Fundamental and Nonfundamental Policies of the fund, the fund will not invest in a manner, or engage in activities, inconsistent with or not permitted by the fund's investment strategy and policies as described in the fund's prospectus and this SAI.

Fundamental Policies

As a matter of Fundamental Policy, the fund may not:

1. Borrowing

Borrow money, except to the extent permitted under the 1940 Act. For purposes of this Fundamental Policy, the entry into options, forward contracts, futures contracts, including those related to indices, other derivatives and options on futures contracts or indices or other derivatives shall not constitute borrowing, to the extent covered in accordance with applicable SEC and staff guidance.

2. Commodities

Invest in physical commodities, except that the fund may purchase and sell commodity-linked or index-linked structured notes, commodity-related ETFs or ETNs, options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices and enter into swap agreements and other derivative instruments.

3. Industry Concentration

Invest more than 25% of its assets in the securities of issuers in any single industry, provided that there shall be no limitation on the purchase of obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities or shares of other investment companies.

4. Loans

Lend any securities or make loans to others, except to the extent permitted under the 1940 Act (which currently limits such loans to no more than 33-1/3% of the value of the fund's total assets) or as otherwise permitted by the SEC. For purposes of this Fundamental Policy, the purchase of debt obligations (including acquisitions of loans, loan participations or other forms of debt instruments) and the entry into repurchase agreements shall not constitute loans by the fund. Any loans of portfolio securities will be made according to guidelines established by the SEC and the board.

5. Real Estate

Purchase, hold or deal in real estate, but the fund may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate or REITs and may acquire and hold real estate or interests therein through exercising rights or remedies with regard to such securities.

6. Senior Securities

Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except insofar as the fund may be deemed to have issued a senior security by reason of borrowing money in accordance with the fund's borrowing policies or otherwise to the extent permitted under the 1940 Act. For purposes of this Fundamental Policy, collateral, escrow, or margin or other deposits with respect to the making of short sales, the purchase or sale of futures contracts or options and other derivative instruments, purchase or sale of forward foreign currency contracts and the writing of options are not deemed to be an issuance of a senior security, to the extent covered in accordance with applicable SEC and staff guidance.

7. Underwriting

Act as an underwriter of securities of other issuers, except to the extent the fund may be deemed an underwriter under the Securities Act by virtue of disposing of portfolio securities.

References to "commodities" in the Fundamental Policy described above are to physical commodities, typically natural resources or agricultural products, and are not intended to refer to instruments that are strictly financial in nature and are not related to the purchase or delivery of physical commodities.

For purposes of the Fundamental Policy regarding industry concentration, the fund will not invest more than 25% of the fund's total assets in securities issued or guaranteed by a single foreign government or by a single foreign supranational entity.

For purposes of the Fundamental Policy regarding senior securities, the 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, with appropriate asset coverage.

With respect to the Fundamental Policies regarding borrowing and senior securities, in October 2020, the SEC adopted Rule 18f-4 under the 1940 Act, which governs registered funds' use of derivatives. Should the fund engage in derivatives transactions, the fund will comply with Rule 18f-4, which does not include asset segregation or coverage requirements.

The fund's Fundamental Policies will be interpreted broadly. For example, the policies will be interpreted to refer to the 1940 Act and the related rules as they are in effect from time to time, and to interpretations and modifications of or relating to the 1940 Act by the SEC and others as they are given from time to time. When a Fundamental Policy provides that an investment practice may be conducted as permitted by the 1940 Act, this will be interpreted to mean that the investment practice is either (i) expressly permitted by the 1940 Act or the rules thereunder, or (ii) not expressly prohibited by the 1940 Act or the rules thereunder.

For both Fundamental and Nonfundamental Policies, if a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction, except as otherwise required by the 1940 Act. With respect to the fund's policies pertaining to borrowing, however, if borrowings exceed 33-1/3% of the value of the fund's total assets as a result of a change in values or assets, the fund must take steps to reduce such borrowings within three days (not including Sundays and holidays) thereafter at least to the extent of such excess.

Other Investment Restriction Policies

Investment Objective. The fund's investment objective is disclosed in its prospectus. The fund's investment objective is a Nonfundamental Policy.

Diversification Classification. The fund is classified as "non-diversified" under the 1940 Act.

Funds-of-Funds. The fund has adopted a Nonfundamental policy prohibiting it from acquiring shares of other funds in reliance on Section 12(d)(1)(F) or Section 12(d)(1)(G) of the 1940 Act.

INFORMATION ABOUT THE FUND'S ORGANIZATION AND STRUCTURE

The Trust is an open-end management investment company, registered under the 1940 Act, consisting of multiple fund series. The fund is a series of the Trust, and investments are made through, and shareholders invest in, the fund. The offering of the fund's shares is registered under the Securities Act. References in this SAI to the "fund" generally refer to a series of the Trust. The Trust was organized as a Massachusetts business trust on June 4, 2010.

CERTAIN EXPENSE ARRANGEMENTS

The fund's management agreement provides that the Adviser will pay substantially all expenses of the fund, except for the management fees, payments under the fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions, costs of holding shareholder meetings, fees and expenses associated with any

securities lending program adopted by the fund, and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the fund's business.

The Adviser may from time to time voluntarily waive and/or reimburse fees or expenses in order to limit total annual fund operating expenses. Any such voluntary waiver or reimbursement may be eliminated by the Adviser at any time.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue, NW, Washington, DC 20004 serves as counsel to the fund.

Ernst & Young LLP, One Manhattan West, New York, NY, 10001, an independent registered public accounting firm, has been selected to serve as the independent registered public accounting firm for the fund.

ADDITIONAL INFORMATION ABOUT BUYING AND SELLING SHARES

The Code imposes various limitations on the amount that may be contributed by fund shareholders to certain Retirement Plans or government sponsored programs. These limitations apply to participants at the Retirement Plan level and, therefore, do not directly affect the amount that may be invested in the fund by a Retirement Plan or government sponsored programs. Participants and Retirement Plan or program sponsors should consult their tax advisors for details.

Frequent Purchases and Exchanges

Unlike frequent trading of shares of a traditional open-end mutual fund (i.e., not exchange-traded shares), frequent trading of shares on the secondary market does not disrupt portfolio management, increase the fund's trading costs, lead to realization of capital gains, or otherwise harm fund shareholders because these trades do not involve the fund directly. A few institutional investors are authorized to purchase and redeem the fund's shares directly with the fund. When these trades are effected in-kind (i.e., for securities, and not for cash), the potential for harmful effects that may result from frequent cash trades is not as present. Moreover, the fund imposes transaction fees on in-kind purchases and redemptions of the fund intended to cover the custodial and other costs incurred by the fund in effecting in-kind trades. These fees may increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the fund's trading costs increase in those circumstances, although transaction fees are subject to certain limits and therefore may not cover all related costs incurred by the fund. For these reasons, the board has determined that it is not necessary to adopt policies and procedures to detect and deter frequent trading and market-timing in shares of the fund.

INFORMATION ABOUT SHAREHOLDER SERVICES

Broker dealers or other financial intermediaries, at their own discretion, may offer a dividend reinvestment service under which shares are purchased in the secondary market at current market prices. Investors should consult their broker dealer or other financial intermediary for further information regarding any dividend reinvestment service offered.

INFORMATION ABOUT DISTRIBUTION AND SERVICE PLANS

The board of the Trust has adopted a Plan pursuant to Rule 12b-1 under the 1940 Act for the fund. Under the 12b-1 Plan, the fund is authorized to pay shareholder services and distribution fees in connection with the sale and distribution of its shares in an amount up to 0.25% of its average daily net assets each year. No payments pursuant to the 12b-1 Plan will be made through at least the next twelve (12) months of operation. Additionally, the implementation of any such payments would have to be approved by the board prior to implementation. Because these fees would be paid out of the fund's assets on an ongoing basis, if payments are made in the future, these fees will increase the cost of your investment and may cost you more over time.

A written quarterly report of the amounts expended under the fund's 12b-1 Plan, and the purposes for which such expenditures were incurred, must be made to the fund's board for its review. Currently, only a Plan pursuant to Rule 12b-1 has been adopted, but other Plans may be adopted in the future not pursuant to Rule 12b-1 (although none are currently intended to be adopted). For a Plan adopted pursuant to Rule 12b-1, such Plan provides that it may not be amended to increase materially the costs that holders of the fund's shares may bear pursuant to the Plan without the approval of the holders of such shares; other material amendments of the Plan must be approved by the board and by the Independent Board Members of the fund who have no direct or indirect financial interest in the operation of the Plan or in any agreements entered into in connection with the Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The 12b-1 Plan is subject to annual approval by such vote of the board members cast in person at a meeting called for the purpose of voting on the Plan. The 12b-1 Plan is generally terminable at any time by vote of a majority of the Independent Board Members of the fund who have no direct or indirect financial interest in the operation of the Plan or in any agreements related to the Plan or by vote of a majority of the outstanding voting securities of the fund.

ADDITIONAL INFORMATION ABOUT INVESTMENTS, INVESTMENT TECHNIQUES AND RISKS

Equity Securities

Equity securities include common stocks, tracking stocks, depositary receipts, and certain preferred stocks, convertible securities, warrants, IPOs, and shares of real estate investment trusts. See "Real Estate Investment Trusts ("REITs")" and "Depositary Receipts and New York Shares" below for a discussion of real estate investment trusts and depositary receipts, respectively. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced. Changes in the value of the fund's investments will result in changes in the value of its shares and thus the fund's total return to investors.

Investing in equity securities poses risks specific to an issuer as well as to the particular type of company issuing the equity securities. For example, equity securities of small- or mid-capitalization companies tend to have more abrupt or erratic price swings than equity securities of larger, more established companies because, among other reasons, they trade less frequently and in lower volumes and their issuers typically are more subject to changes in earnings and prospects in that they are more susceptible to changes in economic conditions, may be more reliant on singular products or services and are more vulnerable to larger competitors. Equity securities of these types of companies may have a higher potential for gains, but also may be subject to greater risk of loss. If the fund, together with other investment companies and other clients advised by the Adviser and its affiliates, owns significant positions in portfolio companies, depending on market conditions, the fund's ability to dispose of some or all positions at a desirable time may be adversely affected. While common stockholders usually have voting rights on a number of significant matters, other types of equity securities, such as preferred stock, common limited partnership units and limited liability company interests, may not ordinarily have voting rights.

An investment in securities of companies that have no earnings or have experienced losses is generally based on a belief that actual or anticipated products or services will produce future earnings. If the anticipated event is delayed or does not occur, or if investor perception about the company changes, the company's stock price may decline sharply and its securities may become less liquid.

Investing in equity securities also poses risks specific to a particular industry, market or sector, such as healthcare, technology, financial services, consumer goods or natural resources (e.g., oil and gas). To some extent, the prices of equity securities tend to move by industry, market or sector. When market conditions favorably affect, or are expected to favorably affect, an industry, the share prices of the equity securities of companies in that industry tend to rise. Conversely, negative news or a poor outlook for a particular industry can cause the share prices of such securities of companies in that industry to decline quickly.

Common Stock. Stocks and similar securities, such as common limited partnership units and limited liability company interests, represent shares of ownership in a company. After other claims are satisfied, common stockholders and other common equity owners participate in company profits on a pro-rata basis; profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decreases in earnings are usually reflected in a company's common stocks, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities. Common stock may be received upon the conversion of convertible securities.

Preferred Stock. Preferred stock is a form of equity ownership in a corporation. Generally, preferred stock has a specified dividend and ranks after bonds and before common stocks in its claim on income for dividend payments and on assets should the company be liquidated. The market value of preferred stock generally increases when interest rates decline and decreases when interest rates rise, but, as with debt securities, also is affected by the issuer's ability or perceived ability to make payments on the preferred stock. While most preferred stocks pay a dividend, the fund may purchase preferred stock where the issuer has omitted, or is in danger of omitting, payment of its dividend. Such investments would be made primarily for their capital appreciation potential. Certain classes of preferred stock are convertible, meaning the preferred stock is convertible into shares of common stock of the issuer. Holding convertible preferred stock can provide a steady stream of dividends and the option to convert the preferred stock to common stock.

Certain convertible preferred stocks may offer enhanced yield features. These preferred stocks may feature a mandatory conversion date and may have a capital appreciation limit expressed in terms of a stated price. Other types of convertible securities may be designed to provide the investor with high current income with some prospect of future capital appreciation and may have some built-in call protection. Investors may have the right to convert such securities into shares of common stock at a preset conversion ratio or hold them until maturity. Upon maturity they may convert into either cash or a specified number of shares of common stock.

Trust preferred securities are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. These securities typically bear a market rate coupon comparable to interest rates available on debt of a similarly rated company. Holders of trust preferred securities have limited voting rights to control the activities of the trust and no voting rights with respect to the parent company.

Tracking Stock. A tracking stock is a type of common stock that "tracks" or depends on the financial performance of a specific business unit or operating division of a company rather than the operations of the company as a whole. Tracking stocks trade as separate securities. As a result, if the unit or division does poorly, the value of the tracking stock may decrease even if the company as a whole performs well. The opposite may also be true. Shareholders of tracking stocks have a financial interest only in that unit or division of the company. Unlike the common stock of the company itself, a tracking stock usually has limited or no voting rights. In the event of a company's liquidation, tracking stock shareholders typically do not have a legal claim on the company's assets. If a tracking stock pays dividends, the amounts paid will solely depend on the performance of the business unit or division.

Convertible Securities. Convertible securities include bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio or predetermined price (the conversion price). Convertible securities have characteristics similar to both equity and fixed-income securities.

Convertible securities generally are subordinated to other similar but non-convertible securities of the same issuer, although convertible bonds, as corporate debt obligations, enjoy seniority in right of payment to all equity securities, and convertible preferred stock is senior to common stock of the same issuer. Because of the subordination feature, however, convertible securities typically have lower ratings than similar non-convertible securities.

Although to a lesser extent than with fixed-income securities, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. A unique feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Convertible securities provide for a stable stream of income with generally higher yields than common stocks, but there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. A convertible security, in addition to providing fixed-income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. There can be no assurance of capital appreciation, however, because securities prices fluctuate. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality because of the potential for capital appreciation.

Warrants and Stock Purchase Rights Warrants or stock purchase rights ("rights") give the holder the right to subscribe to equity securities at a specific price for a specified period of time. Warrants and rights are subject to the same market risk as stocks, but may be more volatile in price. The fund's investment in warrants and rights will not entitle it to receive dividends or exercise voting rights, provide no rights with respect to the assets of the issuer and will become worthless if not profitably exercised before the expiration date. Warrants, rights or other non-income producing equity securities may be received in connection with the fund's investments in corporate debt securities, or restructuring of investments. Bonds with warrants attached to purchase equity securities have many

characteristics of convertible bonds and their prices may, to some degree, reflect the performance of the underlying stock.

IPOs

IPOs Generally. IPOs of securities may be over-subscribed and subsequently trade at a premium in the secondary market. When the Adviser, Sub-Adviser or sub-sub-adviser is given an opportunity to invest in such an initial offering or "new" or "hot" issue, the supply of securities available for client accounts is often less than the amount of securities the accounts would otherwise take. In order to allocate these investments fairly and equitably among client accounts over time, each portfolio manager or a member of his or her respective investment team will indicate to the applicable trading desk their level of interest in a particular offering with respect to eligible clients' accounts for which that team is responsible.

Equity IPOs. An equity IPO is a corporation's first offering of stock to the public. Shares are given a market value reflecting expectations for the corporation's future growth. Special rules of FINRA apply to the distribution of IPOs. Corporations offering IPOs generally have limited operating histories and may involve greater investment risk than companies with longer operating histories. Special risks associated with IPOs may include a limited number of shares available for trading, unseasoned trading, lack of investor knowledge of the company, and limited operating history, all of which may contribute to price volatility. The limited number of shares available for trading in some IPOs may make it more difficult for the fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. In addition, some IPOs are involved in relatively new industries or lines of business, which may not be widely understood by investors. Some of the companies involved in new industries may be regarded as developmental stage companies, without revenues or operating income, or the near-term prospects of such. Foreign IPOs are subject to foreign political and currency risks. Many IPOs are issued by undercapitalized companies of small or microcap size. The prices of these companies' securities can be very volatile, rising and falling rapidly, sometimes based solely on investor perceptions rather than economic reasons.

Real Estate Investment Trusts ("REITs")

A U.S. REIT is a corporation, or a business trust that would otherwise be taxed as a corporation for federal income tax purposes, which meets the definitional requirements of Section 856 of the Code. The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating entity level federal income tax. To meet the definitional requirements provided by the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs and hybrid REITs. Equity REITs invest primarily in the fee ownership or leasehold ownership of land and buildings and derive their income primarily from rental income. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can hold REMIC regular interests and can hold or make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans or REMIC interests. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs is affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the 1940 Act. The fund will indirectly bear its proportionate share of expenses, including management fees, paid by each REIT in which it invests in addition to the expenses of the fund.

U.S. Government Securities

U.S. Government securities, which are interest-bearing securities that promise a stable stream of income, are issued or guaranteed by the U.S. Government or its agencies or instrumentalities. U.S. Government securities include Treasury bills, Treasury notes and Treasury bonds, which differ in their interest rates, maturities and times of issuance. Treasury bills have initial maturities of one year or less; Treasury notes have initial maturities of one to ten years; and Treasury bonds generally have initial maturities of greater than ten years. The prices of U.S.

Government securities are inversely affected by changes in interest rates and, therefore, are subject to interest rate risk, as well as the risk of unrelated market price fluctuations. In general, the longer a security's maturity, the more it will fluctuate in response to changing interest rates. Some obligations issued or guaranteed by U.S. Government agencies and instrumentalities are supported by the full faith and credit of Treasury; others by the right of the issuer to borrow from Treasury; others by discretionary authority of the U.S. Government to purchase certain obligations of the agency or instrumentality; and others only by the credit of the agency or instrumentality. These securities bear fixed, floating or variable rates of interest. While the U.S. Government currently provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it will always do so, since it is not so obligated by law. A security backed by Treasury or the full faith and credit of the United States is guaranteed only as to timely payment of interest and principal when held to maturity. Neither the market value nor the fund's share price is guaranteed.

TIPS are issued by Treasury and are designed to provide investors a long-term investment vehicle that is not vulnerable to inflation. The interest rate paid by TIPS is fixed, while the principal value rises or falls semi-annually based on changes in a published Consumer Price Index. Thus, if inflation occurs, the principal and interest payments on the TIPS are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the TIPS' principal will not drop below its face value at maturity. In exchange for the inflation protection, TIPS generally pay lower interest rates than typical Treasury securities. Only if inflation occurs will TIPS offer a higher real yield than a conventional Treasury bond of the same maturity. The secondary market for TIPS may not be as active or liquid as the secondary market for conventional Treasury securities. Principal appreciation and interest payments on TIPS generally will be taxed annually as ordinary interest income or original issue discount for federal income tax calculations. As a result, any appreciation in principal generally will be counted as income in the year the increase occurs, even though the investor will not receive such amounts until the TIPS are sold or mature. Principal appreciation and interest payments will be exempt from state and local income taxes.

Many states grant tax-free status to dividends paid to shareholders of a fund from interest income earned by that fund from direct obligations of the U.S. Government, subject in some states to minimum investment requirements that must be met by the fund. Investments in securities issued by GNMA, bankers' acceptances, commercial paper and repurchase agreements collateralized by U.S. Government securities do not generally qualify for tax-free treatment.

On August 5, 2011, S&P lowered its long-term sovereign credit rating for the United States of America to "AA+" from "AAA." On August 1, 2023, Fitch lowered the United States of America's long-term foreign-currency issuer default rating to "AA+" from "AAA." On May 16, 2025, Moody's lowered the United States of America's long-term issuer rating to "Aa1" from "Aaa." The value of shares of a fund that may invest in U.S. Government obligations may be adversely affected by any future downgrades of the U.S. Government's credit rating.

Money Market Instruments

The fund also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position.

Investing in money market instruments is subject to certain risks. Money market instruments (other than certain U.S. Government securities) are not backed or insured by the U.S. Government, its agencies or its instrumentalities. Accordingly, only the creditworthiness of an issuer, or guarantees of that issuer, support such instruments.

Bank Obligations. Bank obligations include certificates of deposit ("CDs"), time deposits ("TDs"), bankers' acceptances and other short-term obligations issued by domestic or foreign banks or thrifts or their subsidiaries or branches and other banking institutions. CDs are negotiable certificates evidencing the obligation of a bank to repay funds deposited with it for a specified period of time. TDs are non-negotiable deposits maintained in a banking institution for a specified period of time (in no event longer than seven days) at a stated interest rate. Bankers' acceptances are credit instruments evidencing the obligation of a bank to pay a draft drawn on it by a customer. These instruments reflect the obligation both of the bank and the drawer to pay the face amount of the instrument upon maturity. The other short-term obligations may include uninsured, direct obligations bearing fixed, floating or variable interest rates. TDs and CDs may be issued by domestic or foreign banks or their subsidiaries or branches. The fund may purchase CDs issued by banks, savings and loan associations and similar institutions with less than \$1

billion in assets, the deposits of which are insured by the FDIC, provided the fund purchases any such CD in a principal amount of no more than an amount that would be fully insured by the Deposit Insurance Fund administered by the FDIC. Interest payments on such a CD are not insured by the FDIC. The fund would not own more than one such CD per such issuer.

Domestic commercial banks organized under federal law are supervised and examined by the Comptroller of the Currency and are required to be members of the Federal Reserve System and to have their deposits insured by the FDIC. Domestic banks organized under state law are supervised and examined by state banking authorities but are members of the Federal Reserve System only if they elect to join. In addition, state banks whose CDs may be purchased by the fund are insured by the FDIC (although such insurance may not be of material benefit to the fund, depending on the principal amount of the CDs of each bank held by the fund) and are subject to federal examination and to a substantial body of federal law and regulation. As a result of federal and state laws and regulations, domestic branches of domestic banks whose CDs may be purchased by the fund generally, among other things, are required to maintain specified levels of reserves and are subject to other supervision and regulation designed to promote financial soundness. However, not all of such laws and regulations apply to the foreign branches of domestic banks.

Obligations of foreign subsidiaries or branches of domestic banks may be general obligations of the parent banks in addition to the issuing subsidiary or branch, or may be limited by the terms of a specific obligation and governmental regulation. Such obligations and obligations of foreign banks or their subsidiaries or branches are subject to different risks than are those of domestic banks. These risks include foreign economic and political developments, foreign governmental restrictions that may adversely affect payment of principal and interest on the obligations, foreign exchange controls, seizure of assets, declaration of a moratorium and foreign withholding and other taxes on interest income. Foreign subsidiaries and branches of domestic banks and foreign banks are not necessarily subject to the same or similar regulatory requirements that apply to domestic banks, such as mandatory reserve requirements, loan limitations, and accounting, auditing and financial recordkeeping requirements. In addition, less information may be publicly available about a foreign subsidiary or branch of a domestic bank or about a foreign bank than about a domestic bank.

Obligations of U.S. branches of foreign banks may be general obligations of the parent bank in addition to the issuing branch, or may be limited by the terms of a specific obligation or by federal or state regulation as well as governmental action in the country in which the foreign bank has its head office. A U.S. branch of a foreign bank with assets in excess of \$1 billion may or may not be subject to reserve requirements imposed by the Federal Reserve System or by the state in which the branch is located if the branch is licensed in that state. In addition, federal branches licensed by the Comptroller of the Currency and branches licensed by certain states may be required to: (1) pledge to the regulator, by depositing assets with a designated bank within the state, a certain percentage of their assets as fixed from time to time by the appropriate regulatory authority; and (2) maintain assets within the state in an amount equal to a specified percentage of the aggregate amount of liabilities of the foreign bank payable at or through all of its agencies or branches within the state.

In view of the foregoing factors associated with the purchase of CDs and TDs issued by foreign subsidiaries or branches of domestic banks, or by foreign banks or their branches or subsidiaries, the Sub-Adviser carefully evaluates such investments on a case-by-case basis.

Repurchase Agreements. A repurchase agreement is a contract under which the fund would acquire a security for a relatively short period subject to the obligation of the seller, typically a bank, broker/dealer or other financial institution, to repurchase and the fund to resell such security at a fixed time and at a price higher than the purchase price (representing the fund's cost plus interest). The repurchase agreement thereby determines the yield during the purchaser's holding period, while the seller's obligation to repurchase is secured by the value of the underlying security. The fund's custodian or sub-custodian engaged in connection with tri-party repurchase agreement transactions will have custody of, and will segregate, securities acquired by the fund under a repurchase agreement. In connection with its third party repurchase transactions, the fund will engage only eligible sub-custodians that meet the requirements set forth in Section 17(f) of the 1940 Act. The value of the underlying securities (or collateral) will be at least equal at all times to the total amount of the repurchase obligation, including the interest factor. The fund bears a risk of loss if the other party to the repurchase agreement defaults on its obligations and the fund is delayed or prevented from exercising its rights to dispose of the collateral securities. This risk includes the risk of procedural costs or delays in addition to a loss on the securities if their value should fall below their

repurchase price. Repurchase agreements are considered by the staff of the SEC to be loans by the fund that enters into them. Repurchase agreements could involve risks in the event of a default or insolvency of the other party to the agreement, including possible delays or restrictions upon the fund's ability to dispose of the underlying securities. The fund may engage in repurchase agreement transactions that are collateralized by U.S. Government securities (which are deemed to be "collateralized fully" pursuant to the 1940 Act) or, to the extent consistent with the fund's investment policies, collateralized by securities other than U.S. Government securities (credit and/or equity collateral). Transactions that are collateralized fully enable the fund to look to the collateral for diversification purposes under the 1940 Act. Conversely, transactions secured with credit and/or equity collateral require the fund to look to the counterparty to the repurchase agreement for determining diversification. Because credit and/or equity collateral is subject to certain credit, liquidity, market and/or other additional risks that U.S. Government securities are not subject to, the amount of collateral posted in excess of the principal value of the repurchase agreement is expected to be higher in the case of repurchase agreements secured with credit and/or equity collateral compared to repurchase agreements secured with U.S. Government securities. In an attempt to reduce the risk of incurring a loss on a repurchase agreement, the fund will require that additional securities be deposited with it if the value of the securities purchased should decrease below resale price. The fund may jointly enter into one or more repurchase agreements in accordance with an exemptive order granted by the SEC pursuant to Section 17(d) of the 1940 Act and Rule 17d-1 thereunder. Any joint repurchase agreements must be collateralized fully by U.S. Government securities.

Commercial Paper. Commercial paper represents short-term, unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations and finance companies used to finance short-term credit needs and may consist of U.S. dollar-denominated obligations of domestic issuers and foreign currency-denominated obligations of domestic or foreign issuers. Commercial paper may be backed only by the credit of the issuer or may be backed by some form of credit enhancement, typically in the form of a guarantee by a commercial bank. Commercial paper backed by guarantees of foreign banks may involve additional risk due to the difficulty of obtaining and enforcing judgments against such banks and the generally less restrictive regulations to which such banks are subject.

Foreign Securities

Foreign securities include the securities of companies organized under the laws of countries other than the United States and those issued or guaranteed by governments other than the U.S. Government or by foreign supranational entities. They also include securities of companies whose principal trading market is in a country other than the United States or of companies (including those that are located in the United States or organized under U.S. law) that derive a significant portion of their revenue or profits from foreign businesses, investments or sales, or that have a majority of their assets outside the United States. They may be traded on foreign securities exchanges or in the foreign over-the-counter markets. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the "World Bank"), the European Coal and Steel Community, the Asian Development Bank and the InterAmerican Development Bank. Obligations of the World Bank and certain other supranational organizations are supported by subscribed but unpaid commitments of member countries. There is no assurance that these commitments will be undertaken or complied with in the future.

Investing in the securities of foreign issuers, as well as instruments that provide investment exposure to foreign securities and markets, involves risks that are not typically associated with investing in U.S. dollar-denominated securities of domestic issuers. Investments in foreign issuers may be affected by changes in currency rates (i.e., affecting the value of assets as measured in U.S. dollars), changes in foreign or U.S. laws or restrictions applicable to such investments and in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. A change in the value of such foreign currency against the U.S. dollar also will result in a change in the amount of income available for distribution. If a portion of the fund's investment income may be received in foreign currencies, the fund will be required to compute its income in U.S. dollars for distribution to shareholders, and therefore the fund will absorb the cost of currency fluctuations. After the fund has distributed income, subsequent foreign currency losses may result in the fund having distributed more income in a particular fiscal period than was available from investment income,

which could result in a return of capital to shareholders. In addition, if the exchange rate for the currency in which the fund receives interest payments declines against the U.S. dollar before such income is distributed as dividends to shareholders, the fund may have to sell portfolio securities to obtain sufficient cash to enable the fund to pay such dividends. Commissions on transactions in foreign securities may be higher than those for similar transactions on domestic stock markets, and foreign custodial costs are higher than domestic custodial costs. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have on occasion been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Many countries throughout the world are dependent on a healthy U.S. economy and are adversely affected when the U.S. economy weakens or its markets decline. For example, in 2007 and 2008, the meltdown in the U.S. subprime mortgage market quickly spread throughout global credit markets, triggering a liquidity crisis that affected fixed-income and equity markets around the world.

Foreign investments involve risks unique to the local political, economic, and regulatory structures in place, as well as the potential for social instability, military unrest or diplomatic developments that could prove adverse to the interests of U.S. investors. Individual foreign economies can differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. In addition, significant external political and economic risks currently affect some foreign countries. For example, both Taiwan and China claim sovereignty over Taiwan and there is a demilitarized border and hostile relations between North and South Korea. Russia's military invasion of Ukraine in February 2022, the resulting response by the United States and other countries, and the potential for wider conflict have increased volatility and uncertainty in the financial markets and adversely affected regional and global economies. War and terrorism affect many countries, especially those in Africa and the Middle East. A number of countries in Europe have suffered terror attacks. The future proliferation and effects of these and similar events and other socio-political or geographical issues are not known but could suddenly and/or profoundly affect global economies, markets, certain industries and/or specific securities.

Because evidences of ownership of foreign securities usually are held outside the United States, additional risks of investing in foreign securities include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions that might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage, exchange control regulations or otherwise. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when shareholders have no access to the fund.

Investing in Europe. Ongoing concerns regarding the economies of certain European countries and/or their sovereign debt, as well as the possibility that one or more countries might leave the European Union (the "EU"), create risks for investing in the EU. A number of countries in Europe have experienced severe economic and financial difficulties. Many non-governmental issuers, and even certain governments, have defaulted on, or been forced to restructure, their debts. Many other issuers have faced difficulties obtaining credit or refinancing existing obligations. Financial institutions have in many cases required government or central bank support, have needed to raise capital, and/or have been impaired in their ability to extend credit, and financial markets in Europe and elsewhere have experienced significant volatility and declines in asset values and liquidity. These difficulties may continue, worsen or spread within and outside of Europe. Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not be effective, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and others of outstanding debt could have additional adverse effects on economies, financial markets and asset valuations around the world.

A number of countries within the EU are also members of the Economic and Monetary Union (the "eurozone") and have adopted the Euro as their currency. Eurozone membership requires member states to comply with restrictions

on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Changes in import or export tariffs, changes in governmental or EU regulations on trade, changes in the exchange rate of the Euro and other currencies of certain EU countries which are not in the eurozone, the default or threat of default by an EU member state on its sovereign debt, and/or an economic recession in an EU member state may have a significant adverse effect on the economies of other EU member states and their trading partners. Further, eurozone membership controls may potentially limit the ability of an EU member state to respond to financial market volatility, economic downturns, rising government debt levels and the possible default of government debt with appropriate fiscal measures.

In June 2016, citizens of the United Kingdom voted in a referendum to leave the EU (known as "Brexit"), creating economic and political uncertainty in its wake. In March 2017, the United Kingdom formally notified the European Council of the United Kingdom's intention to withdraw from the EU pursuant to Article 50 of the Treaty on European Union. This formal notification began negotiations regarding the terms of the United Kingdom's exit from the EU. On January 31, 2020, the U.K. formally withdrew from the EU and, after a transition period, left the EU single market and customs union under the terms of a new trade agreement on December 31, 2020. The agreement governs the new relationship between the U.K. and EU with respect to trading goods and services, but critical aspects of the relationship remain unresolved and subject to further negotiation and agreement. The full scope and nature of the consequences of the exit are not at this time known and are unlikely to be known for a significant period of time.

Depreciation of the British pound sterling and/or the Euro in relation to the U.S. dollar related to Brexit would adversely affect fund investments denominated in British pound sterling and/or the Euro that are not fully and effectively hedged, regardless of the performance of the investment.

It is unknown whether the U.K.'s exit will increase the likelihood of other countries also departing the EU. Any exits from the EU, or the possibility of such exits, may have a significant impact on the U.K., Europe, and global economies, which may result in increased volatility and illiquidity, new legal and regulatory uncertainties and potentially lower economic growth for such economies that could potentially have an adverse effect on the value of the fund's investments. Whether or not the fund invests in securities of issuers located in Europe or has significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of the fund's investment.

Emerging Markets. Investments in, or economically tied to, emerging market countries may be subject to higher risks than investments in companies in developed countries. Risks of investing in emerging markets and emerging market securities include, but are not limited to (in addition to those described above): less social, political and economic stability; increased potential for market manipulation; less diverse and mature economic structures; the lack of publicly available information, including reports of payments of dividends or interest on outstanding securities; differences in regulatory, accounting, auditing, financial reporting and recordkeeping standards; certain national policies that may restrict the fund's investment opportunities, including restrictions on investment in issuers or industries deemed sensitive to national interests; local taxation; the absence of developed structures governing private or foreign investment or allowing for judicial redress for injury to private property; the absence until recently, in certain countries, of a capital structure or market-oriented economy; the possibility that recent favorable economic developments in certain countries may be slowed or reversed by unanticipated political or social events in these countries; restrictions that may make it difficult or impossible for the fund to vote proxies, exercise shareholder rights, pursue legal remedies, and obtain judgments in foreign courts; the risk of uninsured loss due to lost, stolen, or counterfeit stock certificates; possible losses through the holding of securities in domestic and foreign custodial banks and depositories; heightened opportunities for governmental corruption; large amounts of foreign debt to finance basic governmental duties that could lead to restructuring or default; and heavy reliance on exports that may be severely affected by global economic downturns.

The purchase and sale of portfolio securities in certain emerging market countries may be constrained by limitations as to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. In certain cases, such limitations may be computed based upon the aggregate trading by or holdings of the fund, its Adviser and its affiliates and their respective clients and other service providers. The fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached.

Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of "capital controls." Countries use these controls to restrict volatile movements of capital entering ("inflows") and exiting ("outflows") their country to respond to certain economic conditions. Such controls are mainly applied to short-term capital transactions to counter speculative flows that threaten to undermine the stability of the exchange rate and deplete foreign exchange reserves. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets in such a way that may adversely affect the ability of the fund to repatriate its income and capital. These limitations may have a negative impact on the fund's performance and may adversely affect the liquidity of the fund's investment to the extent that it invests in certain emerging market countries. Some emerging market countries may have fixed or managed currencies which are not free-floating against the U.S. dollar. Further, certain emerging market countries' currencies may not be internationally traded. Certain of these currencies have experienced a steady devaluation relative to the U.S. dollar. If the fund does not hedge the U.S. dollar value of securities it owns denominated in currencies that are devalued, the fund's NAV will be adversely affected. Many emerging market countries have experienced substantial, and in some periods, extremely high rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, adverse effects on the economies and securities markets of certain of these countries. Further, the economies of emerging market countries generally are heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

The fund may invest in companies organized or with their principal place of business, or majority of assets or business, in pre-emerging markets, also known as frontier markets. The risks associated with investments in frontier market countries include all the risks described above for investments in foreign securities and emerging markets, although the risks are magnified for frontier market countries. Because frontier markets are among the smallest, least mature and least liquid of the emerging markets, investments in frontier markets generally are subject to a greater risk of loss than investments in developed markets or traditional emerging markets. Frontier market countries have smaller economies, less developed capital markets, more political and economic instability, weaker legal, financial accounting and regulatory infrastructure, and more governmental limitations on foreign investments than typically found in more developed countries, and frontier markets typically have greater market volatility, lower trading volume, lower capital flow, less investor participation, fewer large global companies and greater risk of a market shutdown than more developed markets. Frontier markets are more prone to economic shocks associated with political and economic risks than are emerging markets generally. Many frontier market countries may be dependent on commodities, foreign trade or foreign aid.

Depository Receipts and New York Shares Securities of foreign issuers in the form of ADRs, EDRs and GDRs and other forms of depository receipts may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a U.S. bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. EDRs are receipts issued in Europe, and GDRs are receipts issued outside the United States typically by non-U.S. banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the U.S. securities markets, EDRs in bearer form are designed for use in Europe, and GDRs in bearer form are designed for use outside the United States. New York Shares are securities of foreign companies that are issued for trading in the United States. New York Shares are traded in the United States on national securities exchanges or in the over-the-counter market.

Depository receipts may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities. Purchases or sales of certain ADRs may result, indirectly, in fees being paid to the Depository Receipts Division of The Bank of New York Mellon, an affiliate of the Adviser, by brokers executing the purchases or sales.

Securities of foreign issuers that are represented by ADRs or that are listed on a U.S. securities exchange or traded in the U.S. over-the-counter markets are not subject to many of the considerations and risks discussed in the

prospectus and this SAI that apply to foreign securities traded and held abroad. A U.S. dollar investment in ADRs or shares of foreign issuers traded on U.S. exchanges may be impacted differently by currency fluctuations than would an investment made in a foreign currency on a foreign exchange in shares of the same issuer.

Investment Companies

The 1940 Act, subject to the fund's own more restrictive limitations, if applicable, currently limits the fund's investment in securities issued by registered and unregistered investment companies, including exchange-traded funds, subject to certain exceptions to: (1) 3% of the total voting stock of any one investment company; (2) 5% of the fund's total assets with respect to any one investment company; and (3) 10% of the fund's total assets in the aggregate. Exemptions in the 1940 Act or the rules thereunder may allow the fund to invest in another investment company in excess of (1), (2) and/or (3). In particular, Rule 12d1-4 under the 1940 Act allows the fund to acquire the securities of another registered investment company, including ETFs, in excess of the limitations above, subject to certain limitations and conditions, including limits on control and voting of acquired funds' shares, evaluations and findings by the Adviser, entering, in most cases, into an investment agreement with the acquired fund, and limits on most three-tier fund structures.

As a shareholder of another investment company, the fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the fund bears directly in connection with its own operations, subject to the conditions of any applicable expense arrangement.

The fund also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the fund's securities lending program, in shares of one or more money market funds advised by the Adviser or an affiliate of the Adviser. In addition, the fund may invest in shares of one or more money market funds advised by the Adviser or an affiliate of the Adviser for strategic purposes related to the management of the fund. Such investments will not be subject to the limitations described above.

Exchange-Traded Notes

ETNs are senior, unsecured, unsubordinated debt securities whose returns are linked to the performance of a particular market benchmark or strategy minus applicable fees. ETNs are traded on an exchange (e.g., the NYSE) during normal trading hours. However, investors can also hold the ETN until maturity. At maturity, the issuer pays to the investor a cash amount equal to the principal amount, subject to adjustment for the market benchmark or strategy factor.

ETNs do not make periodic coupon payments or provide principal protection. ETNs are subject to credit risk, and the value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying market benchmark or strategy remaining unchanged. The value of an ETN may also be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying assets, changes in the applicable interest rates, changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced underlying asset. When a fund invests in an ETN, it will bear its proportionate share of any fees and expenses borne by the ETN. These fees and expenses generally reduce the return realized at maturity or upon redemption from an investment in an ETN; therefore, the value of the index underlying the ETN must increase significantly in order for an investor in an ETN to receive at least the principal amount of the investment at maturity or upon redemption. The fund's decision to sell ETN holdings may be limited by the availability of a secondary market.

Derivatives

Derivatives may be used for a variety of reasons, including to provide a substitute for purchasing or selling particular securities, to reduce portfolio turnover, to seek to obtain a particular desired return at a lower cost to the fund than if the fund had invested directly in an instrument yielding the desired return, such as when the fund "equitizes" available cash balances by using a derivative instrument to gain exposure to relevant equity investments or markets consistent with its investment objective and policies, or for other reasons. The fund may seek to achieve investment exposure to markets and securities through long and short positions in derivatives. Generally, a derivative is a financial contract whose value depends upon, or is derived from, the value of an underlying asset,

reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates and related indexes. Derivatives may provide a cheaper, quicker or more specifically focused way to invest than "traditional" securities would. Examples of derivative instruments include futures contracts, options, swap agreements, contracts for difference, forward volatility agreements, credit linked securities, credit derivatives, structured securities and hybrid instruments, exchange-linked notes, participation notes, custodial receipts and currency forward contracts. In addition, the fund's portfolio managers may decide not to employ some or all of these strategies, and there is no assurance that any derivatives strategy used by the fund will succeed.

Risks. Successful use of certain derivatives may be a highly specialized activity that requires skills that may be different than the skills associated with ordinary portfolio securities transactions. If the Sub-Adviser or sub-sub-adviser is incorrect in its forecasts of market factors, or a counterparty defaults, investment performance would diminish compared with what it would have been if derivatives were not used. Successful use of derivatives by the fund also is subject to the Sub-Adviser's or sub-sub-adviser's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities or position being hedged and the price movements of the corresponding derivative position. For example, if the fund enters into a derivative position to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in the derivative position.

It is possible that developments in the derivatives markets, including potential government regulation, could adversely affect the ability to terminate existing derivatives positions or to realize amounts to be received in such transactions. On October 28, 2020, the SEC adopted Rule 18f-4 (the "Derivatives Rule") under the 1940 Act which replaced prior SEC and staff guidance with an updated, comprehensive framework for registered funds' use of derivatives. The Derivatives Rule requires the fund to trade derivatives and certain other instruments that create future payment or delivery obligations subject to a value-at-risk ("VaR") leverage limit, develop and implement a derivatives risk management program and new testing requirements, and comply with new requirements related to board and SEC reporting. These requirements apply unless the fund qualifies as a "limited derivatives user," as defined in the Derivatives Rule. As of the date of this SAI, the fund intends to qualify as a "limited derivatives user." To the extent the fund uses derivatives, complying with the Derivatives Rule may increase the cost of the fund's investments and cost of doing business, which could adversely affect investors. Other new regulations could adversely affect the value, availability and performance of certain derivative instruments, may make them more costly, and may limit or restrict their use by the fund.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the fund's performance. Derivatives involve greater risks than if the fund had invested in the reference obligation directly.

An investment in derivatives at inopportune times or when market conditions are judged incorrectly may lower return or result in a loss. The fund could experience losses if its derivatives were poorly correlated with underlying instruments or the fund's other investments or if the fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Over-the-Counter Derivatives. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives, primarily futures contracts and options, generally are guaranteed by the clearing agency that is the issuer or counterparty to such derivatives. This guarantee usually is supported by a variation margin payment system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. In contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Sub-Adviser or sub-sub-adviser will consider the creditworthiness of counterparties to

over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. Derivatives that are considered illiquid will be subject to the fund's limit on illiquid investments.

Leverage. Some derivatives may involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable.

Options and Futures Contracts. Options and futures contracts prices can diverge from the prices of their underlying instruments. Options and futures contracts prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument, and the time remaining until expiration of the contract, which may not affect the prices of the underlying instruments in the same way. Imperfect correlation may also result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, or from imposition of daily price fluctuation limits or trading halts. The fund may purchase or sell options and futures contracts with a greater or lesser value than any securities it wishes to hedge or intends to purchase in order to attempt to compensate for differences in volatility between the contract and the securities, although this may not be successful in all cases. If price changes in the fund's options or futures positions used for hedging purposes are poorly correlated with the investments the fund is attempting to hedge, the options or futures positions may fail to produce anticipated gains or result in losses that are not offset by gains in other investments.

Margin. Certain derivatives require the fund to make margin payments, a form of security deposit intended to protect against nonperformance of the derivative contract. The fund may have to post additional margin if the value of the derivative position changes in a manner adverse to the fund, which could affect performance as cash that would otherwise be directly invested is posted as margin. Derivatives may be difficult to value, which may result in increased payment requirements to counterparties or a loss of value to the fund. If the fund has insufficient cash to meet additional margin requirements, it might need to sell securities at a disadvantageous time.

CPO Exemption. The Adviser has claimed an exclusion from the definition of the term "commodity pool operator" pursuant to Regulation 4.5 under the CEA with respect to the fund and, therefore, is not subject to registration or regulation as a CPO under the CEA. The Adviser relies on the exemption in Regulation 4.14(a)(8) to provide commodity interest trading advice with respect to the fund for which the Adviser is an excluded CPO.

The fund may be limited in its ability to use commodity futures or options thereon, engage in certain swap transactions or make certain other investments (collectively, "commodity interests") if the Adviser continues to claim the exclusion from the definition of CPO with respect to the fund. In order to be eligible to continue to claim this exclusion, if the fund uses commodity interests other than for bona fide hedging purposes (as defined by the CFTC), the aggregate initial margin and premiums required to establish those positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options are "in-the-money" at the time of purchase) may not exceed 5% of the fund's NAV, or, alternatively, the aggregate net notional value of those positions, as determined at the time the most recent position was established, may not exceed 100% of the fund's NAV (after taking into account unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the fund may not market itself as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps markets. Even if the fund's direct use of commodity interests complies with the trading limitations described above, the fund may have indirect exposure to commodity interests in excess of such limitations. Such exposure may result from the fund's investment in other investment vehicles, including investment companies that are not managed by the Adviser or one of its affiliates, certain securitized vehicles that may invest in commodity interests and/or non-equity REITs that may invest in commodity interests (collectively, "underlying funds"). Because the Adviser may have limited or no information as to the commodity interests in which an underlying fund invests at any given time, the CFTC has issued temporary no-action relief permitting registered investment companies, such as the fund, to continue to allow

their commodity pool operators to rely on the exclusion from the definition of CPO. The Adviser, on behalf of the fund, has filed the required notice to claim this no-action relief. In order to rely on the temporary no-action relief, the Adviser must meet certain conditions and the fund must otherwise comply with the trading and market limitations described above with respect to their direct investments in commodity interests.

If the fund were to invest in commodity interests in excess of the trading limitations discussed above and/or market itself as a vehicle for trading in the commodity futures, commodity options or swaps markets, the Adviser would withdraw its exclusion from the definition of CPO with respect to the fund and the Adviser would become subject to regulation as a CPO, and would need to comply with the harmonization rules adopted by the CFTC for funds that are dually registered, with respect to the fund, in addition to all applicable SEC regulations.

Specific Types of Derivatives.

Futures Contracts. A futures contract is an agreement between two parties to buy and sell a security or other asset for a set price on a future date. When the fund sells a futures contract, it incurs an obligation to deliver a specified amount of the obligation underlying the futures contract at a specified time in the future for an agreed upon price. With respect to index futures, no physical transfer of the securities underlying the index is made. Rather, the parties settle by exchanging in cash an amount based on the difference between the contract price and the closing value of the index on the settlement date. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date. When the fund writes an option on a futures contract, it becomes obligated, in return for the premium paid, to assume a position in a futures contract at a specified exercise price at any time during the term of the option. If the fund has written a call option, it assumes a short futures position. If the fund has written a put option, it assumes a long futures position. When the fund purchases an option on a futures contract, it acquires the right, in return for the premium it pays, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put). The purchase of futures or call options on futures can serve as a long hedge, and the sale of futures or the purchase of put options on futures can serve as a short hedge. Writing call options on futures contracts can serve as a limited short hedge, using a strategy similar to that used for writing call options on securities or indexes. Similarly, writing put options on futures contracts can serve as a limited long hedge.

Futures contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security or other asset. Although some futures contracts call for making or taking delivery of the underlying securities or other asset, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying asset, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the fund realizes a capital gain, or if it is more, the fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the fund realizes a capital gain, or if it is less, the fund realizes a capital loss. Transaction costs also are included in these calculations.

Engaging in these transactions involves risk of loss to the fund which could adversely affect the value of the fund's net assets. No assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially leading to substantial losses.

The fund may engage in futures transactions in foreign markets to the extent consistent with applicable law and the fund's ability to invest in foreign securities. Foreign futures markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for

performance of the contract. In addition, any profits that the fund might realize in trading could be eliminated by adverse changes in the currency exchange rate, or the fund could incur losses as a result of those changes.

Futures contracts and options on futures contracts include those with respect to securities, securities indexes, interest rates and foreign currencies, to the extent the fund can invest in the underlying reference security, instrument or asset.

- *Security Futures Contract.* A security future obligates the fund to purchase or sell an amount of a specific security at a future date at a specific price.
- *Index Futures Contract.* An index future obligates the fund to pay or receive an amount of cash based upon the change in value of the index based on the prices of the securities that comprise the index.
- *Interest Rate Futures Contract.* An interest rate future obligates the fund to purchase or sell an amount of a specific debt security at a future date at a specific price (or, in some cases, to settle an equivalent amount in cash).
- *Foreign Currency Futures Contract.* A foreign currency future obligates the fund to purchase or sell an amount of a specific currency at a future date at a specific price.

Options. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security, securities or other asset at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security, securities or other asset at the exercise price at any time during the option period, or at a specific date. The fund receives a premium from writing an option which it retains whether or not the option is exercised.

A covered call option written by the fund is a call option with respect to which the fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. The principal reason for writing covered call options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone.

Options may be traded on U.S. or, to the extent the fund may invest in foreign securities, foreign securities exchanges or in the over-the-counter market. There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Purchases or sales of options on exchanges owned by The NASDAQ OMX Group, Inc. may result, indirectly, in a portion of the transaction and other fees assessed on options trading being paid to The Bank of New York Mellon, an affiliate of the Adviser, as the result of an arrangement between The NASDAQ OMX Group, Inc. and The Bank of New York Mellon.

Call and put options in which the fund may invest include the following, in each case, to the extent that the fund can invest in such securities or instruments (or securities underlying an index, in the case of options on securities indexes).

- *Options on Securities.* Call and put options on specific securities (or groups or "baskets" of specific securities), including equity securities (including convertible securities) or U.S. Government securities, convey the right to buy or sell, respectively, the underlying securities at prices which are expected to be lower or higher than the current market prices of the securities at the time the options are exercised.
- *Options on Securities Indexes.* An option on an index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the index upon which the option is based is greater in the case of a call, or less, in the case of a put, than the exercise price of the option. Thus, the effectiveness of purchasing or writing index options will depend upon price movements in the level of the index rather than the price of a particular security.
- *Foreign Currency Options.* Call and put options on foreign currency convey the right to buy or sell the underlying currency at a price which is expected to be lower or higher than the spot price of the currency at the time the option is exercised or expires.

Swap Agreements. Swap agreements involve the exchange by the fund with another party of their respective commitments to pay or receive payments at specified dates based upon or calculated by reference to changes in specified prices or rates (e.g., interest rates in the case of interest rate swaps) based on a specified amount (the "notional") amount. Some swaps are, and more in the future will be, centrally cleared. Swaps that are centrally cleared are subject to the creditworthiness of the clearing organizations involved in the transaction. For example, the fund could lose margin payments it has deposited with a clearing organization as well as the net amount of gains not yet paid by the clearing organization if the clearing organization breaches its agreement with the fund or becomes insolvent or goes into bankruptcy. In the event of bankruptcy of the clearing organization, the fund may be entitled to the net amount of gains the fund is entitled to receive plus the return of margin owed to it only in proportion to the amount received by the clearing organization's other customers, potentially resulting in losses to the fund. Swap agreements also may be two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year.

Swap agreements will tend to shift investment exposure from one type of investment to another. For example, if the fund agreed to exchange payments in U.S. dollars for payments in a foreign currency, the swap agreement would tend to decrease the fund's exposure to U.S. interest rates and increase its exposure to foreign currency and interest rates. Depending on how they are used, swap agreements may increase or decrease the overall volatility of the fund's investments and its share price and yield.

Most swap agreements entered into are cash settled and calculate the obligations of the parties to the agreement on a "net basis." Thus, the fund's current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The fund will enter into swap agreements only with counterparties that meet certain standards of creditworthiness based on the Sub-Adviser's or sub-sub-adviser's internal guidelines.

A swap option is a contract (sometimes called "swaptions") that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are entered into with institutions, including securities brokerage firms. Depending on the terms of the particular option agreement, the fund generally will incur a greater degree of risk when it writes a swap option than it will incur when it purchases a swap option. When the fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the fund writes a swap option, upon exercise of the option the fund will become obligated according to the terms of the underlying agreement.

The swaps market has been an evolving and largely unregulated market. It is possible that developments in the swaps market, including new regulatory requirements, could limit or prevent the fund's ability to utilize swap agreements or options on swaps as part of its investment strategy, terminate existing swap agreements or realize amounts to be received under such agreements, which could negatively affect the fund. As discussed above, some swaps currently are, and more in the future will be, centrally cleared, which affects how swaps are transacted. In particular, the Dodd-Frank Act, has resulted in new clearing and exchange-trading requirements for swaps and other over-the-counter derivatives. The Dodd-Frank Act also requires the CFTC and/or the SEC, in consultation with banking regulators, to establish capital requirements for swap dealers and major swap participants as well as requirements for margin on uncleared derivatives, including swaps, in certain circumstances that will be clarified by rules proposed by the CFTC and/or the SEC. In addition, the CFTC and the SEC may change current requirements applicable to derivatives in the future. For example, some legislative and regulatory proposals would impose limits on the maximum position that could be held by a single trader in certain contracts and would subject certain derivatives transactions to new forms of regulation that could create barriers to certain types of investment activity. Other provisions would expand entity registration requirements; impose business conduct, reporting and disclosure requirements on dealers, recordkeeping on counterparties such as the fund; and require banks to move some derivatives trading units to a non-guaranteed (but capitalized) affiliate separate from the deposit-taking bank or divest them altogether. While some provisions of the Dodd-Frank Act have either already been implemented through rulemaking by the CFTC and/or the SEC or must be implemented through future rulemaking by those and other federal agencies, and any regulatory or legislative activity may not necessarily have a direct, immediate effect upon the fund, it is possible that, when compliance with these rules is required, they could potentially limit or completely restrict the ability of the fund to use certain derivatives as a part of its investment strategy, increase the cost of entering into derivatives transactions or require more assets of the fund to be used for collateral in support of those derivatives than is currently the case. Limits or restrictions applicable to the counterparties with which the fund engages in derivative transactions also could prevent the fund from using derivatives or affect the pricing or other factors relating to these transactions, or may change the availability of certain derivatives.

Specific swap agreements (and options thereon) include currency swaps; index swaps; interest rate swaps (including interest rate locks, caps, floors and collars); credit default swaps; credit default swap indexes, inflation swaps; and total return swaps (including equity swaps), in each case, to the extent that the fund can invest in the underlying reference security, instrument or asset (or fixed-income securities, in the case of interest rate swaps, or securities underlying an index, in the case of index swaps).

- *Currency Swap Transactions.* A currency swap agreement involves the exchange of principal and interest in one currency for the same in another currency.
- *Index Swap Transactions.* An index swap agreement involves the exchange of cash flows associated with a securities or other index.
- *Interest Rate Swap Transactions.* An interest rate swap agreement involves the exchange of cash flows based on interest rate specifications and a specified principal amount, often a fixed payment for a floating payment that is linked to an interest rate.

An interest rate lock transaction (which may also be known as a forward rate agreement) is a contract between two parties to make or receive a payment at a future date determined on the basis of a specified interest rate or yield of a particular security (the "contracted interest rate") over a predetermined time period, with respect to a stated notional amount. These transactions typically are entered as a hedge against interest rate changes. One party to the contract locks in the contracted interest rate to seek to protect against an interest rate increase, while the other party seeks to protect against a possible interest rate decline. The payment at maturity is determined by the difference between the contracted interest rate and the then-current market interest rate.

In an interest rate cap one party receives payments at the end of each period in which a specified interest rate on a specified principal amount exceeds an agreed rate; conversely, in an interest rate floor one party may receive payments if a specified interest rate on a specified principal amount

falls below an agreed rate. Caps and floors have an effect similar to buying or writing options. Interest rate collars involve selling a cap and purchasing a floor, or vice versa, to protect the fund against interest rate movements exceeding given minimum or maximum levels.

- *Credit Default Swap Transactions.* Credit default swap agreements and similar agreements may have as reference obligations debt securities that are or are not currently held by the fund. The protection "buyer" in a credit default contract may be obligated to pay the protection "seller" an up front payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the "par value" (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled.
- *Inflation Swap Transactions.* An inflation swap agreement involves the exchange of cash flows based on interest and inflation rate specifications and a specified principal amount, usually a fixed payment, such as the yield difference between Treasury securities and TIPS of the same maturity, for a floating payment that is linked to the consumer price index (the "CPI"). The following is an example. The swap buyer pays a predetermined fixed rate to the swap seller (or counterparty) based on the yield difference between Treasuries and TIPS of the same maturity. (This yield spread represents the market's current expected inflation for the time period covered by the maturity date.) In exchange for this fixed rate, the counterparty pays the buyer an inflation-linked payment, usually the CPI rate for the maturity period (which represents the actual change in inflation).
- *Total Return Swap Transactions.* In a total return swap agreement one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains, and recovers any capital losses from the first party. The underlying reference asset of a total return swap may include an equity index, loans or bonds.

Contracts for Difference. A contract for difference ("CFD") is a contract between two parties, typically described as "buyer" and "seller," stipulating that the seller will pay to the buyer the difference between the current value of an asset and its value in the future. (If the difference is negative, then the buyer instead pays the seller.) In effect, CFDs are financial derivatives that allow the fund to take advantage of values moving up (long positions) or values moving down (short positions) on underlying assets. For example, when applied to equities, a CFD is an equity derivative that allows the fund to obtain investment exposure to share price movements, without the need for ownership of the underlying shares. CFDs are over-the-counter derivative instruments that are subject to the credit risk of the counterparty. Because CFDs are not traded on an exchange and may not have an expiration date, CFDs generally are illiquid.

Forward Volatility Agreements. Forward volatility agreements are agreements in which two parties agree to exchange a straddle option (holding a position in both call and put options with the same exercise price and expiration date, allowing the holder to profit regardless of whether the price of the underlying asset goes up or down, assuming a significant change in the price of the underlying asset) at a specific expiration date and volatility. Essentially, a forward volatility agreement is a forward contract on the realized volatility of a given underlying asset, which may be, among other things, a stock, stock index, interest rate or currency. Forward volatility agreements are over-the-counter derivative instruments that are subject to the credit risk of the counterparty.

Credit Derivatives. Credit derivative transactions include those involving default price risk derivatives and credit spread derivatives. Default price risk derivatives are linked to the price of reference securities or loans after a default by the issuer or borrower, respectively. Credit spread derivatives are based on the risk that changes in credit spreads and related market factors can cause a decline in the value of a security, loan or index. Credit derivatives may take the form of options, swaps, credit-linked notes and other over-the-counter instruments. The risk of loss in a credit derivative transaction varies with the form of the transaction. For example, if the fund purchases a default option on a security, and if no default occurs with

respect to the security, the fund's loss is limited to the premium it paid for the default option. In contrast, if there is a default by the grantor of a default option, the fund's loss will include both the premium it paid for the option and the decline in value of any underlying security that the default option hedged (if the option was entered into for hedging purposes). If the fund is a buyer of credit protection in a credit default swap agreement and no credit event occurs, the fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller of credit protection, the fund generally receives an upfront payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. Unlike credit default swaps, credit-linked notes are funded balance sheet assets that offer synthetic credit exposure to a reference entity in a structure designed to resemble a synthetic corporate bond or loan. Credit-linked notes are frequently issued by special purpose vehicles that would hold some form of collateral securities financed through the issuance of notes or certificates to the fund. The fund receives a coupon and par redemption, provided there has been no credit event of the reference entity. The vehicle enters into a credit swap with a third party in which it sells default protection in return for a premium that subsidizes the coupon to compensate the fund for the reference entity default risk. The fund will enter into credit derivative transactions only with counterparties that meet certain standards of creditworthiness based on the Sub-Adviser's or sub-sub-adviser's internal guidelines.

Structured Securities and Hybrid Instruments.

- Structured Securities.* Structured securities are securities whose cash flow characteristics depend upon one or more indexes or that have embedded forwards or options or securities where the fund's investment return and the issuer's payment obligations are contingent on, or highly sensitive to, changes in the value of underlying assets, indexes, interest rates or cash flows ("embedded index"). When the fund purchases a structured security, it will make a payment of principal to the counterparty. Some structured securities have a guaranteed repayment of principal while others place a portion (or all) of the principal at risk. Guarantees are subject to the risk of default by the counterparty or its credit provider. The terms of such structured securities normally provide that their principal and/or interest payments are to be adjusted upwards or downwards (but not ordinarily below zero) to reflect changes in the embedded index while the structured securities are outstanding. As a result, the interest and/or principal payments that may be made on a structured security may vary widely, depending upon a variety of factors, including the volatility of the embedded index and the effect of changes in the embedded index on principal and/or interest payments. The rate of return on structured securities may be determined by applying a multiplier to the performance or differential performance of the embedded index. Application of a multiplier involves leverage that will serve to magnify the potential for gain and the risk of loss. Structured securities may be issued in subordinated and unsubordinated classes, with subordinated classes typically having higher yields and greater risks than an unsubordinated class. Structured securities may not have an active trading market, which may have an adverse impact on the fund's ability to dispose of such securities when necessary to meet the fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of an active trading market also may make it more difficult for the fund to obtain accurate market quotations for purposes of valuing the fund's portfolio and calculating its NAV.
- Hybrid Instruments.* A hybrid instrument can combine the characteristics of securities, futures and options. For example, the principal amount or interest rate of a hybrid instrument could be tied (positively or negatively) to the price of a benchmark, e.g., currency, securities index or another interest rate. The interest rate or the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. Hybrids can be used as an efficient means of pursuing a variety of investment strategies, including currency hedging, duration management and increased total return. Hybrids may not bear interest or pay dividends. The value of a hybrid or its interest rate may be a multiple of a benchmark and, as a

result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid. Under certain conditions, the redemption value of a hybrid could be zero. Thus, an investment in a hybrid may entail significant market risks that are not associated with a similar investment in a traditional, U.S. dollar-denominated bond that has a fixed principal amount and pays a fixed rate or floating rate of interest.

Exchange-Linked Notes. Exchange-linked notes ("ELNs") are debt instruments that differ from a more typical fixed-income security in that the final payout is based on the return of the underlying equity, which can be a single stock, basket of stocks, or an equity index. Usually, the final payout is the amount invested times the gain in the underlying stock(s) or index times a note-specific participation rate, which can be more or less than 100%. Most ELNs are not actively traded on the secondary market and are designed to be kept to maturity. However, the issuer or arranger of the notes may offer to buy back the ELNs, although the buy-back price before maturity may be below the original amount invested. As a result, ELNs generally are considered illiquid.

ELNs are generally subject to the same risks as the securities to which they are linked. If the linked securities decline in value, the ELN may return a lower amount at maturity. ELNs involve further risks associated with purchases and sales of notes, including any applicable exchange rate fluctuations and a decline in the credit quality of the note's issuer. ELNs are frequently secured by collateral. If an issuer defaults, the fund would look to any underlying collateral to recover its losses. Ratings of issuers of ELNs refer only to the issuers' creditworthiness and the related collateral. They provide no indication of the potential risks of the linked securities.

Participation Notes. Participation notes are issued by banks or broker-dealers and are designed to replicate the performance of certain equity or debt securities or markets. Participation notes are a type of derivative which generally is traded over-the-counter. The performance results of participation notes will not replicate exactly the performance of the securities or markets that the notes seek to replicate due to transaction costs and other expenses. Risks of investing in participation notes include the same risks associated with a direct investment in the underlying security or market the notes seek to replicate. Participation notes constitute general unsecured contractual obligations of the banks or broker-dealers that issue them, and a fund is relying on the creditworthiness of such banks or broker-dealers and has no rights under a participation note against the issuers of the assets underlying such participation notes, including any collateral supporting a loan participation note. The types of participation notes which the fund may use include low exercise price options ("LEPOs") and low exercise price warrants ("LEPWs"). LEPOs, LEPWs, and other participation notes are offshore derivative instruments issued to foreign institutional investors and their sub-accounts against underlying securities traded in emerging or frontier markets. These securities may be listed on an exchange or traded over-the-counter, and are similar to depositary receipts. As a result, the risks of investing in LEPOs, LEPWs, and other participation notes are similar to depositary receipts risk and foreign securities risk in general. Specifically these securities entail both counterparty risk—the risk that the issuer of the LEPO, LEPW, or participation note may not be able to fulfill its obligations or that the holder and counterparty or issuer may disagree as to the meaning or application of contractual terms—and liquidity risk—the risk that a liquid market may not exist for such securities.

Combined Transactions. The fund may enter into multiple transactions, including multiple options, futures, swap, currency and/or interest rate transactions, and any combination of options, futures, swaps, currency and/or interest rate transactions ("combined transactions"), instead of a single transaction, as part of a single or combined strategy when, in the opinion of the Sub-Adviser or sub-sub-adviser, it is in the best interests of the fund to do so. A combined transaction will usually contain elements of risk that are present in each of its component transactions. Although combined transactions are normally entered into based on the Sub-Adviser's or sub-sub-adviser's judgment that the combined strategies will reduce risk or otherwise more effectively achieve the desired portfolio management goal, it is possible that the combination will instead increase such risks or hinder achievement of the portfolio management objective.

Future Developments. The fund may take advantage of opportunities in derivatives transactions which are not presently contemplated for use by the fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the fund's investment objective and legally permissible for the fund. Before the fund enters into such transactions or makes any such investment, the fund will provide appropriate disclosure in its prospectus or this SAI.

Foreign Currency Transactions

Investments in foreign currencies, including investing directly in foreign currencies, holding financial instruments that provide exposure to foreign currencies, or investing in securities that trade in, or receive revenues in, foreign currencies, are subject to the risk that those currencies will decline in value relative to the U.S. dollar.

Foreign currency transactions could be entered into for a variety of purposes, including: (1) to fix in U.S. dollars, between trade and settlement date, the value of a security the fund has agreed to buy or sell; (2) to hedge the U.S. dollar value of securities the fund already owns, particularly if it expects a decrease in the value of the currency in which the foreign security is denominated; (3) to gain or reduce exposure to the foreign currency for investment purposes; (4) to settle trades in non-base currencies; or (5) to repatriate income. Foreign currency transactions may involve, for example, the fund's purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. A short position would involve the fund agreeing to exchange an amount of a currency it did not currently own for another currency at a future date in anticipation of a decline in the value of the currency sold relative to the currency the fund contracted to receive. The fund may engage in cross currency hedging against price movements between currencies, other than the U.S. dollar, caused by currency exchange rate fluctuations. In addition, the fund might seek to hedge against changes in the value of a particular currency when no derivative instruments on that currency are available or such derivative instruments are more expensive than certain other derivative instruments. In such cases, the fund may hedge against price movements in that currency by entering into transactions using derivative instruments on another currency or a basket of currencies, the values of which the Sub-Adviser or sub-sub-adviser believes will have a high degree of positive correlation to the value of the currency being hedged. The risk that movements in the price of the derivative instrument will not correlate perfectly with movements in the price of the currency being hedged is magnified when this strategy is used.

Currency hedging may substantially change the fund's exposure to changes in currency exchange rates and could result in losses if currencies do not perform as the Sub-Adviser or sub-sub-adviser anticipates. There is no assurance that the fund's currency hedging activities will be advantageous to the fund or that the Sub-Adviser or sub-sub-adviser will hedge at an appropriate time.

The cost of engaging in foreign currency exchange contracts for the purchase or sale of a specified currency at a specified future date ("forward contracts") varies with factors such as the currency involved, the length of the contract period and the market conditions then prevailing. Because forward contracts are usually entered into on a principal basis, no fees or commissions are involved. Generally, secondary markets do not exist for forward contracts, with the result that closing transactions can be made for forward contracts only by negotiating directly with the counterparty to the contract. As with other over-the-counter derivatives transactions, forward contracts are subject to the credit risk of the counterparty.

Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates also can be affected unpredictably by intervention, or failure to intervene, by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad.

The value of derivative instruments on foreign currencies depends on the value of the underlying currency relative to the U.S. dollar. Because foreign currency transactions occurring in the interbank market might involve substantially larger amounts than those involved in the use of foreign currency derivative instruments, the fund could be disadvantaged by having to deal in the odd lot market (generally consisting of transactions of less than \$1 million) for the underlying foreign currencies at prices that are less favorable than for round lots.

There is no systematic reporting of last sale information for foreign currencies or any regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Quotation information generally is representative of very large transactions in the interbank market and thus might not reflect odd-lot transactions where rates might be less favorable. The interbank market in foreign currencies is a global, round-the-clock market.

Settlement of transactions involving foreign currencies might be required to take place within the country issuing the underlying currency. Thus, the fund might be required to accept or make delivery of the underlying foreign currency in accordance with any U.S. or foreign regulations regarding the maintenance of foreign banking arrangements by U.S. residents and might be required to pay any fees, taxes and charges associated with such delivery assessed in the issuing country.

Lending Portfolio Securities

Fund portfolio securities may be lent to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the fund would remain the owner of the loaned securities and continue to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The fund also has the right to terminate a loan at any time. Subject to the fund's own more restrictive limitations, if applicable, an investment company is limited in the amount of portfolio securities it may loan to 33-1/3% of its total assets (including the value of all assets received as collateral for the loan). Except as may be otherwise described in "Investments, Investment Techniques and Risks" in Part II of this SAI, the fund will receive collateral consisting of cash, cash equivalents, U.S. Government securities or irrevocable letters of credit, which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the fund a loan premium fee. If the collateral consists of cash, the fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The fund may participate in a securities lending program operated by the Securities Lending Agent. The Securities Lending Agent will receive a percentage of the total earnings of the fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Adviser to be of good financial standing. In a loan transaction, the fund will also bear the risk of any decline in value of securities acquired with cash collateral. The fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Adviser, repurchase agreements or other high quality instruments with short maturities, in each case to the extent it is a permissible investment for the fund.

Borrowing Money

The 1940 Act, subject to the fund's own more restrictive limitations, if applicable, permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. Such borrowings may be for temporary or emergency purposes or for leveraging. If borrowings are for temporary or emergency (not leveraging) purposes, when such borrowings exceed 5% of the value of the fund's total assets the fund will not make any additional investments.

Forward Commitments

The purchase or sale of securities on a forward commitment (including "TBA" (to be announced)), when-issued or delayed-delivery basis, means delivery and payment take place at a future date at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment basis, the fund assumes the risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its NAV. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. The sale of securities on a forward commitment or delayed-delivery basis involves the risk that the prices available in the market on the delivery date may be greater than those obtained in the sale transaction. Debt securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value based upon the perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates (i.e., appreciating when interest rates decline and depreciating when interest rates rise). Securities purchased on a

forward commitment, when-issued or delayed-delivery basis may expose the fund to risks because they may experience declines in value prior to their actual delivery. The fund will make commitments to purchase such securities only with the intention of actually acquiring the securities, but the fund may sell these securities or dispose of the commitment before the settlement date if it is deemed advisable as a matter of investment strategy. The fund would engage in forward commitments to increase its portfolio's financial exposure to the types of securities in which it invests. If the fund is fully or almost fully invested when forward commitment purchases are outstanding, such purchases may result in a form of leverage. Leveraging the portfolio in this manner will increase the fund's exposure to changes in interest rates and may result in greater potential fluctuation in the value of the fund's net assets and its NAV per share.

Illiquid Investments

The 1940 Act limits funds other than money market funds to 15% of net assets in illiquid investments. Illiquid investments, which are investments that the fund reasonably expects to be unable to sell or dispose of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investments, may include investments that are not readily marketable, such as investments that are subject to legal or contractual restrictions on resale that do not have readily available market quotations, repurchase agreements providing for settlement in more than seven days after notice and certain privately negotiated derivatives transactions and securities used to cover such derivatives transactions. As to these investments, there is a risk that, should the fund desire to sell them, a ready buyer will not be available at a price the fund deems representative of their value, which could adversely affect the value of the fund's net assets.

Section 4(a)(2) Paper and Rule 144A Securities.

"Section 4(a)(2) paper" consists of commercial obligations issued in reliance on the so-called "private placement" exemption from registration afforded by Section 4(a)(2) of the Securities Act. Section 4(a)(2) paper is restricted as to disposition under the federal securities laws, and generally is sold to institutional investors that agree that they are purchasing the paper for investment and not with a view to public distribution. Any resale by the purchaser must be pursuant to registration or an exemption therefrom. Section 4(a)(2) paper normally is resold to other institutional investors through or with the assistance of the issuer or investment dealers who make a market in the Section 4(a)(2) paper, thus providing liquidity. "Rule 144A securities" are securities that are not registered under the Securities Act but that can be sold to qualified institutional buyers in accordance with Rule 144A under the Securities Act. Rule 144A securities generally must be sold to other qualified institutional buyers. If a particular investment in Section 4(a)(2) paper or Rule 144A securities is not determined to be liquid, that investment will be included within the percentage limitation on investment in illiquid investments. Investing in Rule 144A securities could have the effect of increasing the level of fund illiquidity to the extent that qualified institutional buyers become, for a time, uninterested in purchasing these securities from the fund or other holders. Liquidity determinations with respect to Section 4(a)(2) paper and Rule 144A securities will be made by the fund's board or by the Adviser pursuant to guidelines established by the board. The fund's board or the Adviser will consider availability of reliable price information and other relevant information in making such determinations.

Non-Diversified Status

The fund's classification as a "non-diversified" investment company means that the proportion of the fund's assets that may be invested in the securities of a single issuer is not limited by the 1940 Act. The 1940 Act generally requires a "diversified" investment company, with respect to 75% of its total assets, to invest not more than 5% of such assets in securities of a single issuer. Since a relatively high percentage of a non-diversified fund's assets may be invested in the securities of a limited number of issuers or industries, a non-diversified fund may be more sensitive to changes in the market value of a single issuer or industry. However, to meet federal tax requirements for qualification as a RIC, at the close of each quarter of the fund's taxable year, its assets must be diversified so that (a) at least 50% of the market value of its total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested, including through corporations in which the fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of

other RICs) of two or more issuers that it controls and that are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships.

Cybersecurity Risk

The fund and its service providers are susceptible to operational and information security risks due to cybersecurity incidents. In general, cybersecurity incidents can result from deliberate attacks or unintentional events. Cybersecurity attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks also may be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make services unavailable to intended users). Cybersecurity incidents affecting the Adviser, Sub-Adviser, sub-sub-adviser, Transfer Agent or Custodian or other service providers such as financial intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with the fund's ability to calculate its NAV; impediments to trading for the fund's portfolio; the inability of fund shareholders to transact business with the fund; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which the fund invests, counterparties with which the fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cybersecurity, there are inherent limitations in any cybersecurity risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

Recent Market and Economic Developments

An outbreak of a respiratory disease caused by a novel coronavirus was first detected in Wuhan City, Hubei Province, China in December 2019 and spread globally. The virus, named "SARS-CoV-2" (sometimes referred to as the "coronavirus") and the resulting disease, which is referred to as "COVID-19," was declared a pandemic by the World Health Organization. A widespread outbreak of an infectious illness, such as COVID-19, may lead to governments and businesses world-wide taking aggressive measures, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations. As occurred in the wake of COVID-19, the spread of such an illness may result in the disruption of and delays in the delivery of healthcare services and processes, the cancellation of organized events and educational institutions, the disruption of production and supply chains, a decline in consumer demand for certain goods and services, and general concern and uncertainty, all of which may contribute to increased volatility in global markets. COVID-19, and other epidemics and pandemics that may arise in the future, could adversely affect the economies of many nations, the global economy, individual companies, sectors or industries, and capital markets in ways that cannot be foreseen at the present time. In addition, the impact of infectious diseases in developing or emerging market countries may be greater due to limited health care resources. Political, economic and social stresses caused by infectious illness also may exacerbate other pre-existing political, social and economic risks in certain countries. The duration of such an illness and its effects cannot be determined at this time, but the effects could be present for an extended period of time.

In March 2023, the shutdown of certain financial institutions raised economic concerns over disruption in the U.S. banking system. There can be no certainty that the actions taken by the U.S. government to strengthen public confidence in the U.S. banking system will be effective in mitigating the effects of financial institution failures on the economy and restoring public confidence in the U.S. banking system.

ADDITIONAL INFORMATION ABOUT THE BOARD

Board Oversight Role in Management

The board's role in management of the fund is oversight. As is the case with virtually all investment companies (as distinguished from operating companies), service providers to the fund, primarily the Adviser and its affiliates, have responsibility for the day-to-day management of the fund, which includes responsibility for risk management (including management of investment risk, valuation risk, issuer and counterparty credit risk, compliance risk and

operational risk). As part of their oversight, the board, acting at their scheduled meetings, or the Chairman acting between board meetings, regularly interacts with and receives reports from senior personnel of the Adviser and its affiliates, service providers, including the Adviser's Director of Investment Oversight (or a senior representative of his office), the fund's and the Adviser's CCO and portfolio management personnel. The board's audit committee (which consists of all Independent Board Members) meets during its regularly scheduled and special meetings, and between meetings the audit committee chair is available to the fund's independent registered public accounting firm and the fund's Treasurer. The board also receives periodic presentations from senior personnel of the Adviser and its affiliates regarding risk management generally, as well as periodic presentations regarding specific operational, compliance or investment areas, such as cybersecurity, anti-money laundering, personal trading, valuation, investment research and securities lending (if any). As warranted, the board also receives informational reports from the counsel to the fund regarding regulatory compliance and governance matters. The board has adopted policies and procedures designed to address certain risks to the fund. In addition, the Adviser and other service providers to the fund have adopted a variety of policies, procedures and controls designed to address particular risks to the fund. Different processes, procedures and controls are employed with respect to different types of risks. However, it is not possible to eliminate all of the risks applicable to the fund, and the board's risk management oversight is subject to inherent limitations.

Board Composition and Leadership Structure

The 1940 Act requires that at least 40% of the board members be Independent Board Members and as such are not affiliated with the Adviser. To rely on certain exemptive rules under the 1940 Act, a majority of the fund's board members must be Independent Board Members, and for certain important matters, such as the approval of investment advisory agreements or transactions with affiliates, the 1940 Act or the rules thereunder require the approval of a majority of the Independent Board Members. Currently, all of the fund's board members are Independent Board Members. The board has determined that its leadership structure, in which the Chairman of the Board is not affiliated with the Adviser, is appropriate in light of the specific characteristics and circumstances of the fund, including, but not limited to: (i) the services that the Adviser and its affiliates provide to the fund and potential conflicts of interest that could arise from these relationships; (ii) the extent to which the day-to-day operations of the fund are conducted by fund officers and employees of the Adviser and its affiliates; and (iii) the board's oversight role in management of the fund.

Additional Information About the Board and its Committees

Board members are subject to a maximum term of 15 years, provided that the Board shall have the ability to extend the maximum term up to an additional three years pursuant to a policy adopted by the Board or the By-laws. The board has a standing audit committee and nominating committee.

The function of the audit committee is (i) to oversee the fund's accounting and financial reporting processes and the audits of the fund's financial statements and (ii) to assist in the board's oversight of the integrity of the fund's financial statements, the fund's compliance with legal and regulatory requirements and the independent registered public accounting firm's qualifications, independence and performance.

The nominating committee is responsible for selecting and nominating persons as members of the board for election or appointment by the board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Trust, 240 Greenwich Street, New York, New York 10286, which includes information regarding the recommended nominee as specified in the nominating committee charter.

MANAGEMENT ARRANGEMENTS

The Adviser

The Adviser is an investment adviser registered with the SEC as such pursuant to the Advisers Act. The Adviser is the primary ETF business, and a wholly-owned subsidiary, of BNY, a global financial services company focused on helping clients manage and service their financial assets, operating in 35 countries and serving more than 100 markets. BNY is a leading investment management and investment services company, uniquely focused to help

clients manage and move their financial assets in the rapidly changing global marketplace. BNY Investments is one of the world's leading investment management organizations, and one of the top U.S. wealth managers, encompassing BNY's affiliated investment management firms, wealth management services and global distribution companies. Additional information is available at www.bny.com/investments.

Pursuant to a management agreement between the Adviser and the Trust with respect to the fund, the Adviser generally maintains office facilities on behalf of the fund, and furnishes statistical and research data, clerical help, data processing, bookkeeping and internal auditing and certain other required services to the fund.

For the services provided to the fund under the management agreement, the fund pays the Adviser a monthly fee, if any, based on a percentage of the fund's average daily net assets as set forth in the fund's prospectus.

The fund's management agreement provides that the Adviser will pay substantially all expenses of the fund, except for the management fees, payments under the fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions, costs of holding shareholder meetings, fees and expenses associated with any securities lending program adopted by the fund, and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the fund's business.

The Adviser may from time to time voluntarily waive and/or reimburse fees or expenses in order to limit total annual fund operating expenses. Any such voluntary waiver or reimbursement may be eliminated by the Adviser at any time. The Adviser may pay the Distributor or financial intermediaries for shareholder or other services from the Adviser's own assets, including past profits but not including the management fee paid by the fund. The Distributor may use part or all of such payments to pay Service Agents. The Adviser also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate, and may make revenue transfers to affiliates. Service Agents and their representatives generally will be able to accept payments or other compensation only to the extent consistent with applicable law and the Service Agent's own policies, procedures and practices.

Sub-Adviser

The Adviser has entered into a Sub-Advisory Agreement with the Sub-Adviser. The Sub-Adviser provides day-to-day investment management of the fund's portfolio, and certain related services. For NIMNA, which is a subsidiary of BNY, see "The Adviser" above for ownership information.

NIMNA has entered into a sub-sub-investment advisory agreement with Newton Investment Management Limited ("NIM") to enable NIM to provide certain advisory services to NIMNA for the benefit of the fund, including, but not limited to, portfolio management services. NIM is subject to the supervision of NIMNA and the Adviser.

Portfolio Managers and Portfolio Manager Compensation

The Sub-Adviser provides the fund with portfolio managers who are authorized by the board to execute purchases and sales of securities. NIM, as sub-sub-adviser, may also provide the fund with portfolio managers. Portfolio managers are compensated by the company that employs them, and are not compensated by the fund. The fund's portfolio managers are listed in Part I of this SAI. The following provides information as of the date of this SAI about the compensation policies for portfolio managers.

NIMNA/NIM. Each of NIMNA's and NIM's portfolio manager compensation structure is designed to reward those professionals who deliver strong long-term performance and do not create inappropriate risk exposure for the firm or its clients. Portfolio managers may be rewarded using a mix of base salary, discretionary annual cash bonus, discretionary deferred cash incentives linked to performance of funds sub-advised by NIMNA or NIM and/or participation in a long-term incentive plan. Awards are made annually to individuals following a robust assessment of their contribution during the year and over three- and five-year periods, taking into account both team and individual risk-adjusted performance. NIMNA and NIM utilize an online appraisal system to evaluate the performance of all employees (including investment professionals) on an annual basis. The system incorporates the use of multiple appraisers, which may include direct reports, peers or colleagues from within the investment team and other areas of the firm, resulting in an assessment that combines feedback from each individual. Additionally, in seeking to protect against excessive risk-taking and emphasize appropriate conduct/behavior, input from

NIMNA's or NIM's risk and compliance team on employee conduct is collected as part of the appraisal process and can have an impact on discretionary incentive awards. Ultimately, NIMNA's or NIM's remuneration committee decides upon the terms and conditions of remuneration and incentives for NIMNA's or NIM's employees.

Certain Conflicts of Interest with Other Accounts

Portfolio managers may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of private clients or institutions such as pension funds, insurance companies and foundations), private funds, bank collective trust funds or common trust accounts and wrap fee programs that invest in securities in which the fund may invest or that may pursue a strategy similar to the fund's component strategies ("Other Accounts").

Potential conflicts of interest may arise because of the management of the fund and Other Accounts by the Adviser, Sub-Adviser, sub-sub-adviser, or portfolio managers. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as the Adviser, the Sub-Adviser, or the sub-sub-adviser may be perceived as causing accounts it manages to participate in an offering to increase the Adviser's, Sub-Adviser's or sub-sub-adviser's overall allocation of securities in that offering, or to increase the Adviser's, Sub-Adviser's or sub-sub-adviser's ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as the Adviser, Sub-Adviser or sub-sub-adviser may have an incentive to allocate securities that are expected to increase in value to preferred accounts. IPOs, in particular, are frequently of very limited availability. A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in a different account, such as when the fund purchase increases the value of securities previously purchased by the Other Account or when a sale in one account lowers the sale price received in a sale by a second account. Conflicts of interest may also exist with respect to portfolio managers who also manage performance-based fee accounts, which could give the portfolio managers an incentive to favor such Other Accounts over the corresponding funds such as deciding which securities to allocate to the fund versus the performance-based fee account. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the fund, that they are managing on behalf of the Adviser, the Sub-Adviser or a sub-sub-adviser. The Adviser, Sub-Adviser or sub-sub-adviser periodically reviews each portfolio manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the fund. In addition, the Adviser, Sub-Adviser or sub-sub-adviser could be viewed as having a conflict of interest to the extent that the Adviser, Sub-Adviser, sub-sub-adviser or their affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the fund. In addition, the fund, as a registered investment company, is subject to different regulations than certain of the Other Accounts and, consequently, may not be permitted to engage in all the investment techniques or transactions, or to engage in such techniques or transactions to the same degree, as the Other Accounts. For these or other reasons, the portfolio managers may purchase different securities for the fund and the Other Accounts, and the performance of securities purchased for the fund may vary from the performance of securities purchased for Other Accounts. The portfolio managers may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the fund, which could have the potential to adversely impact the fund, depending on market conditions. In addition, if the fund's investment in an issuer is at a different level of the issuer's capital structure than an investment in the issuer by Other Accounts, in the event of credit deterioration of the issuer, there may be a conflict of interest between the fund's and such Other Accounts' investments in the issuer. If the Adviser, Sub-Adviser or sub-sub-adviser sells securities short, it may be seen as harmful to the performance of any funds investing "long" in the same or similar securities whose market values fall as a result of short-selling activities.

BNY and its affiliates, including the Adviser, Sub-Adviser and sub-sub-adviser affiliated with the Adviser and others involved in the management, sales, investment activities, business operations or distribution of the fund, are engaged in businesses and have interests other than that of managing the fund. These activities and interests include potential multiple advisory, transactional, financial and other interests in securities, instruments and companies that may be directly or indirectly purchased or sold by the fund or the fund's service providers, which may cause conflicts that could disadvantage the fund.

BNY and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the fund. BNY has no obligation to provide to the Adviser, Sub-Adviser, sub-sub-adviser or the fund, or effect transactions on behalf of the fund in accordance with, any market or other information, analysis, or research in its possession. Consequently, BNY (including, but not limited to, BNY's central Risk Management Department) may have information that could be material to the management of the fund and may not share that information with relevant personnel of the Adviser, Sub-Adviser or sub-sub-adviser. Accordingly, in making investment decisions for the fund, the Adviser, Sub-Adviser or sub-sub-adviser does not seek to obtain or use material inside information that BNY may possess with respect to such issuers. However, because the Adviser, Sub-Adviser or sub-sub-adviser in the course of investing fund assets in loans (as described above), may have access to material non-public information regarding a Borrower, the ability of the fund or funds advised by such Adviser, Sub-Adviser or sub-sub-adviser to purchase or sell publicly-traded securities of such Borrowers may be restricted.

Code of Ethics. The fund, the Adviser, the Sub-Adviser, the sub-sub-adviser and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities, including securities that may be purchased or held by the fund. The Code of Ethics subjects the personal securities transactions of employees to various restrictions to ensure that such trading does not disadvantage any fund. In that regard, portfolio managers and other investment personnel employed by the Adviser or an Affiliated Entity or a Sub-Adviser or sub-sub-adviser affiliated with the Adviser must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and also are subject to the oversight of BNY's Investment Ethics Committee. Portfolio managers and other investment personnel may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

Distributor

The Distributor, a wholly-owned subsidiary of the BNY, located at 240 Greenwich Street, New York, New York 10286, serves as the fund's distributor on a best efforts basis pursuant to an agreement, which continues for two years after its effective date and thereafter is renewable annually, with the fund. Shares will be continuously offered for sale by series of the Trust through the Distributor only in Creation Units, as described in the prospectus and below under "Purchase and Redemption of Creation Units." Shares in less than Creation Units are not distributed by the Distributor. The Distributor will deliver the prospectus to persons purchasing Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the Exchange Act and a member of FINRA. The Distributor has no role in determining the investment policies of the Trust series or which securities are to be purchased or sold. An affiliate of the Distributor may assist Authorized Participants in assembling shares to purchase Creation Units or upon redemption, for which it may receive commissions or other fees from such Authorized Participants. The Distributor also serves as distributor for other affiliated mutual funds.

Service Agents. The Adviser or the Distributor may provide additional cash payments out of its own resources to Service Agents that provide services. Such payments are separate from any 12b-1 fees and/or shareholder services fees or other expenses paid by the fund, as applicable. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to Service Agents, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid from the Adviser's or the Distributor's own resources to Service Agents for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. From time to time, the Adviser or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorships; support for recognition programs; technology or infrastructure support; and other forms of cash or non-cash compensation permissible under broker-dealer regulations. In some cases, these payments or compensation may create an incentive for a Service Agent to recommend or sell shares of the fund to you. In addition, except when not consistent with legal requirements, the Distributor may provide additional and differing compensation from its own assets to certain of its employees who promote the sale of select funds to certain Service Agents, who in turn may recommend such funds to their clients; in some cases, these payments may create an incentive for the employees of the Distributor to promote the fund for which the Distributor provides a higher level of compensation. This potential conflict of

interest may be addressed by policies, procedures or practices that are adopted by the Service Agent. As there may be many different policies, procedures or practices adopted by different Service Agents to address the manner in which compensation is earned through the sale of investments or the provision of related services, the compensation rates and other payment arrangements that may apply to a Service Agent and its representatives may vary by Service Agent.

Please contact your financial intermediary, as a potential Service Agent, for details about any payments it may receive in connection with the sale of fund shares or the provision of services to the fund.

The Distributor also may act as a Service Agent. Any payment as well as other payments from the fund to the Distributor's affiliates, such as the management fee payable to the Adviser, may create an incentive for the Distributor to recommend or sell shares of the fund. The Distributor and its representatives generally will be able to accept the applicable payments in exchange for serving as a Service Agent only to the extent consistent with applicable law and any related policies, procedures or practices adopted by the Distributor.

Transfer Agent, Custodian, and Administrator

The Transfer Agent, an affiliate of the Adviser, located at 240 Greenwich Street, New York, New York 10286, is the fund's transfer and dividend disbursing agent. Pursuant to a transfer agency agreement with the fund, the Transfer Agent will arrange for the maintenance of a record of fund shares held by The Depository Trust Company ("DTC") and prepare and transmit by means of DTC's book entry system, payments for dividends and distributions on or with respect to the shares declared by the Trust on behalf of the fund. For these services, the Transfer Agent receives a monthly fee from the Adviser, and is reimbursed for certain out-of-pocket expenses.

The Custodian, an affiliate of the Adviser, located at 240 Greenwich Street, New York, New York 10286, serves as custodian for the investments of the fund. The Custodian has no part in determining the investment policies of the fund or which securities are to be purchased or sold by the fund. Pursuant to a custody agreement applicable to the fund, the Custodian holds the fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee from the Adviser based on the market value of the fund's assets held in custody and receives certain securities transaction charges.

The Administrator, an affiliate of the Adviser, located at 240 Greenwich Street, New York, New York 10286, is the fund's administrator and fund accountant. Pursuant to a fund administration and accounting agreement with the Trust, the Administrator will provide, among other things, data processing services, clerical, accounting and bookkeeping services, internal auditing and legal services, internal executive and administrative services; prepare reports to shareholders, tax returns and reports to and filings with the SEC; calculate the net asset value of fund shares; and generally assist in supervising all aspects of fund operations (except investment management). The Administrator has no part in determining the investment policies of the fund or which securities are to be purchased or sold by the fund. For these services, the Administrator receives a monthly fee from the Adviser, which is based on the level of assets of the funds in the Trust, and is reimbursed for certain out-of-pocket expenses.

Annual Anti-Money Laundering Program Review

The fund may engage an accounting firm (which may be the independent registered public accounting firm that audits the fund's financial statements) to perform an annual independent review of the fund's anti-money laundering program.

Fund's Compliance Policies and Procedures

The fund has adopted compliance policies and procedures pursuant to Rule 38a-1 under the 1940 Act that cover, among other matters, certain compliance matters relevant to the management and operations of the fund.

Combined Prospectuses

The fund's prospectus may be combined with the prospectus of one or more funds that are not governed by the same board as the fund. This practice of combining prospectuses is for the convenience of fund shareholders and prospective fund shareholders, so that they can review features of multiple funds simultaneously. However, the

fund's board is only responsible for the disclosure in the fund's prospectus applicable to such fund, regardless of other disclosure that may be contained in a combined prospectus for such fund and one or more other funds.

Escheatment

Under certain circumstances, your financial intermediary account may be deemed "abandoned" or "unclaimed" under a state's abandoned or unclaimed property laws. The financial intermediary then may be required to "escheat" or transfer the assets in your account, including the fund's shares, to the applicable state's unclaimed property administration. Escheatment rules vary from state to state, but generally, your account could be escheated if:

- there has been no account activity or contact initiated by you for the period of time specified by your state (usually three or five years) and/or
- mail to the account address is returned as undeliverable by the United States Postal Service

In addition, no interest will accrue on uncashed dividends, capital gains or redemption checks, and such checks may be escheated. Please contact your financial intermediary for more information.

DETERMINATION OF NAV

Valuation of Portfolio Securities

The board has designated the Adviser as the fund's valuation designee to make all fair value determinations with respect to the fund's portfolio investments, subject to the board's oversight.

The fund's equity investments, including option contracts, shares of REITs and ETFs (but not including investments in other open-end registered investment companies), generally are valued at the last sale price on the day of valuation on the securities exchange or national securities market on which such securities primarily are traded. Securities listed on NASDAQ markets generally will be valued at the official closing price. If there are no transactions in a security, or no official closing prices for a NASDAQ market-listed security on that day, the security will be valued at the average of the most recent bid and asked prices. Bid price is used when no asked price is available. Open short positions for which there is no sale price on a given day are valued at the lowest asked price. Investments in other open-end investment companies are valued at their reported NAVs each day.

Substantially all of the fund's debt securities and instruments generally will be valued, to the extent possible, by one or more independent pricing services (the "Service"). When, in the judgment of the Service, quoted bid prices for debt securities and instruments are representative of the bid side of the market, these investments are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other debt securities and instruments is determined by the Service based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. The Services are engaged under the general supervision of the board. Overnight and certain other short-term debt securities and instruments (excluding Treasury bills) will be valued by the amortized cost method, which approximates value, unless a Service provides a valuation for such security or, in the opinion of the valuation designee, the amortized cost method would not represent fair value.

Market quotations of foreign securities in foreign currencies and any fund assets or liabilities initially expressed in terms of foreign currency are translated into U.S. dollars at the spot rate, and foreign currency forward contracts generally are valued using the forward rate obtained from a Service. If the fund has to obtain prices as of the close of trading on various exchanges throughout the world, the calculation of the fund's NAV may not take place contemporaneously with the determination of prices of certain of the fund's portfolio securities. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors will not be able to purchase or sell (redeem) fund shares.

Generally, over-the-counter option contracts and interest rate, credit default, total return and equity swap agreements, and options thereon, will be valued by the Service. Equity-linked instruments, such as contracts for difference, generally will be valued by the Service or at an evaluated price provided by a counterparty based on the value of the underlying reference asset(s). Futures contracts will be valued at the most recent settlement price. Restricted securities, as well as securities or other assets for which recent market quotations are not readily available or are determined not to reflect fair value accurately, are valued at fair value as determined in good faith based on

procedures approved by the board. Fair value of investments may be determined by the valuation designee using such information as it deems appropriate under the circumstances. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased and sold, and public trading in similar securities of the issuer or comparable issuers. Using fair value to price investments may result in a value that is different from a security's most recent closing price and from the prices used by other funds to calculate their NAVs.

Calculation of NAV

Except as otherwise described in the prospectus, NAV per share of the fund is determined on each day the Exchange is scheduled to be open for regular business, as of the scheduled close of regular session trading on the Exchange (normally 4:00 p.m. Eastern time). For purposes of determining NAV, certain options and futures contracts may be valued 15 minutes after the scheduled close of trading on the floor of the Exchange. The NAV per share of the fund is computed by dividing the value of the fund's net assets (i.e., the value of its assets less liabilities) by the total number of shares of the fund outstanding.

Fund expenses and fees, including management fees and fees pursuant to Plans (if applicable, and reduced by the fund's expense limitation, if any), are accrued daily and taken into account for the purpose of determining the NAV of the fund's shares.

Expense Allocations

Except as may be otherwise described in "Certain Expense Arrangements and Other Disclosures" in Part II of this SAI, all expenses incurred in the operation of the series of a fund company are borne by the fund company. Expenses attributable to a particular series of a fund company are charged against the assets of that series; other expenses of the fund company are allocated among the series on the basis determined by the board, including, but not limited to, proportionately in relation to the net assets of each series.

Exchange and Transfer Agent Closings

The holidays (as observed) on which both the Exchange and the Transfer Agent are closed currently are: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving and Christmas. In addition, the Exchange is closed on Good Friday.

ADDITIONAL INFORMATION ABOUT DIVIDENDS AND DISTRIBUTIONS

Dividends from net investment income, if any, are generally declared and paid annually, but may vary from period to period.

Distributions of net realized capital gains (i.e. the excess of the fund's net long-term capital gains over its net short-term capital losses), if any, generally are declared and paid once a year. The fund may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act. The fund may not make distributions from net realized securities gains unless capital loss carryovers, if any, have been utilized or have expired.

Dividends and other distributions on shares are distributed on a pro rata basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the fund.

Broker-dealers or other financial intermediaries, at their own discretion, may offer a dividend reinvestment service under which shares are purchased in the secondary market at current market prices. Investors should consult their broker-dealer or other financial intermediary for further information regarding any dividend reinvestment service offered.

Any dividend or distribution paid shortly after an investor's purchase of fund shares may have the effect of reducing the aggregate NAV of the shares below the cost of the investment. Such a dividend or distribution would be a return

of capital in an economic sense, although taxable as stated in the prospectus and this SAI. In addition, the Code provides that if a shareholder holds shares of the fund for six months or less and has (or is deemed to have) received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received or deemed to have been received.

CERTAIN MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of certain federal income tax considerations generally affecting the fund and its shareholders that supplements the discussions in the prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the fund or its shareholders, and the discussion here and in the prospectus is not intended to be a substitute for careful tax planning. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-advantaged account.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

The following information should be read in conjunction with the section in the prospectus entitled "Additional Tax Information."

Shareholders are urged to consult their own tax advisers regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, or local taxes.

Taxation of the Fund. The fund has elected and intends to qualify each year to be treated as a separate RIC under Subchapter M of the Code. As such, the fund should not be subject to federal income tax on its net investment income and capital gains, if any, to the extent that it timely distributes such income and capital gains to its shareholders. In order to qualify for treatment as a RIC, the fund must distribute annually to its shareholders at least the sum of 90% of its taxable net investment income (including for this purpose, dividends, taxable interest, the excess of net short-term capital gains over net long-term capital losses, less operating expenses), computed without regard to the dividends-paid deduction, and 90% of its net tax-exempt interest income, if any (the "Distribution Requirement") and also must meet several additional requirements. Among these requirements are the following: (i) at least 90% of the fund's gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in qualified publicly traded partnerships (the "Qualifying Income Requirement"); and (ii) at the end of each quarter of the fund's taxable year, its assets must be diversified so that (a) at least 50% of the market value of its total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested, including through corporations in which the fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers that it controls and that are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Diversification Requirement").

If the fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the Diversification Requirement where the fund corrects the failure within a specified period of time. In order to be eligible for the relief provisions with respect to a failure to meet the Diversification Requirement, the fund may be required to dispose of certain assets. If these relief provisions were not available to the fund and it were to fail to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at the regular corporate rate (currently 21%) without any deduction for distributions

to shareholders, and its distributions (including capital gains distributions) generally would be taxable as dividends to its shareholders to the extent of the fund's current and accumulated earnings and profits, subject to the dividends received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders. In addition, the fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC. If the fund determines that it will not qualify for treatment as a RIC, the fund will establish procedures to reflect the anticipated tax liability in the fund's NAV. To requalify for treatment as a RIC in a subsequent taxable year, the fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits (as calculated for U.S. federal income tax purposes) from any year in which the fund failed to qualify for tax treatment as a RIC. If the fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay a fund-level tax on certain net built-in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders.

As discussed more fully below, the fund intends to distribute substantially all of its net investment income and its capital gains for each taxable year.

Although the fund intends to distribute substantially all of its net investment income and its capital gains for any taxable year, if the fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax to the extent any such income or gains are not distributed. The fund may designate certain amounts retained as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits. If the fund failed to satisfy the Distribution Requirement for any taxable year, it would be taxed as a regular corporation, with consequences generally similar to those described in the second paragraph of this section "Taxation of the Fund."

The fund will be subject to a 4% excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for the twelve months ended October 31 of such year, subject to an increase for any shortfall in the prior year's distribution. For this purpose, any ordinary income or capital gain net income retained by the fund and subject to corporate income tax will be considered to have been distributed. The fund intends to declare and distribute dividends and distributions in the amounts and at the times necessary to avoid the application of this 4% excise tax but can make no assurances that such tax liability will be entirely eliminated. For example, the fund may receive delayed or corrected tax reporting statements from its investments that cause the fund to accrue additional income and gains after the fund has already made its excise tax distributions for the year. In such a situation, the fund may incur an excise tax liability resulting from such delayed receipt of such tax information statements. In addition, the fund may in certain circumstances be required to liquidate fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the fund to satisfy the requirement for qualification as a RIC.

The fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as "post-October losses") and certain other late-year losses.

Capital losses in excess of capital gains ("net capital losses") are not permitted to be deducted against a RIC's net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, the fund may carry a net capital loss from any taxable year forward to offset its capital gains in future years. The fund is permitted to carry forward a net capital loss to offset its capital gains, if any, in years following the year of the loss. The fund is permitted to carry forward indefinitely a net capital loss. To the extent subsequent capital gains are offset

by such losses, they will not result in U.S. federal income tax liability to the fund and may not be distributed as capital gains to its shareholders. Generally, the fund may not carry forward any losses other than net capital losses. Moreover, the carryover of capital losses may be limited under the general loss limitation rules if the fund experiences an ownership change as defined in the Code.

Taxation of Shareholders – Distributions. The fund receives income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of the fund, constitutes the fund's net investment income. The fund intends to distribute annually to its shareholders substantially all of its investment company taxable income (computed without regard to the deduction for dividends paid), its net tax-exempt income, if any, and any net capital gain (net recognized long-term capital gains in excess of net recognized short-term capital losses, taking into account any capital loss carryforwards). The fund will report to shareholders annually the amounts of dividends paid from ordinary income, the amount of distributions of net capital gain, the portion of dividends which may qualify for the dividends-received deduction, the portion of dividends which may qualify for treatment as qualified dividend income, and the amount of exempt-interest dividends, if any.

Subject to certain limitations, dividends reported by the fund as qualified dividend income will be taxable to non-corporate shareholders at rates of up to 20%. Dividends may be reported by the fund as qualified dividend income if they are attributable to qualified dividend income received by the fund. Qualified dividend income includes, in general, subject to certain holding period requirements and other requirements, dividend income from certain U.S. and foreign corporations. Subject to certain limitations, eligible foreign corporations include those incorporated in possessions of the United States, those incorporated in certain countries with comprehensive tax treaties with the United States and other foreign corporations if the stock with respect to which the dividends are paid is tradable on an established securities market in the United States. A dividend generally will not be treated as qualified dividend income to the extent that (i) the shareholder has not held the stock on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the stock becomes ex-dividend (which is the day on which declared distributions (dividends or capital gains) are deducted from the fund's assets before it calculates the NAV) with respect to such dividend or, in the case of certain preferred stock, for more than 90 days during the 181-day period beginning 90 days before such date, (ii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, (iii) the fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. The holding period requirements described in this paragraph apply to shareholders' investments in the fund and to the fund's investments in underlying dividend-paying stocks. Dividends treated as received by the fund from an underlying fund taxable as a RIC or from a REIT may be treated as qualified dividend income generally only to the extent so reported by such underlying fund or REIT. The fund's participation in the lending of securities may affect the amount, timing, and character of distributions to its shareholders. If the fund participates in a securities lending transaction and receives a payment in lieu of dividends (a "substitute payment") with respect to securities on loan in a securities lending transaction, such income generally will not constitute qualified dividend income and thus dividends attributable to such income will not be eligible for taxation at the rates applicable to qualified dividend income for individual shareholders and will not be eligible for the dividends-received deduction for corporate shareholders. If 95% or more of the fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the fund may report all distributions of such income as qualified dividend income.

Certain dividends received by the fund from U.S. corporations (generally, dividends received by the fund in respect of any share of stock (1) with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend and (2) that is held in an unleveraged position) when distributed and appropriately so reported by the fund may be eligible for the 50% dividends received deduction generally available to corporations under the Code. Dividends received by the fund from REITs will not be eligible for that deduction. In order to qualify for the deduction, corporate shareholders must meet the minimum holding period requirement stated above with respect to their shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their shares, and, if they borrow to acquire or otherwise incur debt attributable to shares, they may be denied a portion of the dividends-received deduction with respect to those shares. Any corporate shareholder should

consult its tax advisor regarding the possibility that its tax basis in its shares may be reduced, for U.S. federal income tax purposes, by reason of "extraordinary dividends" received with respect to the shares and, to the extent such basis would be reduced below zero, current recognition of income may be required.

Distributions from the fund's net short-term capital gains will generally be taxable to shareholders as ordinary income. Distributions from the fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their shares. Long-term capital gains are generally taxed to non-corporate shareholders at rates of up to 20%.

Although dividends generally will be treated as distributed when paid, any dividend declared by the fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared. A taxable shareholder may wish to avoid investing in the fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

If the fund's distributions exceed its current and accumulated earnings and profits (as calculated for U.S. federal income tax purposes), all or a portion of the distributions made in the taxable year may be treated as a return of capital to shareholders. A return of capital distribution generally will not be taxable but will reduce the shareholder's cost basis and result in a higher capital gain or lower capital loss when the shares on which the distribution was received are sold. After a shareholder's basis in the shares has been reduced to zero, distributions in excess of earnings and profits (as calculated for U.S. federal income tax purposes) will be treated as gain from the sale of the shareholder's shares.

Distributions that are reinvested in additional shares of the fund through the means of a dividend reinvestment service, if offered by your broker-dealer, will nevertheless be taxable dividends to the same extent as if such dividends had been received in cash.

A 3.8% tax generally applies to all or a portion of the net investment income of a shareholder who is an individual and not a nonresident alien for federal income tax purposes and who has adjusted gross income (subject to certain adjustments) that exceeds a threshold amount (\$250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends and certain capital gains (generally including capital gain distributions and capital gains realized on the sale of shares) are generally taken into account in computing a shareholder's net investment income but exempt-interest dividends generally are not taken into account.

The fund's shareholders will be notified annually by financial intermediaries, such as brokers, through which a shareholder holds fund shares as to the federal tax status of all distributions made by the fund. Shareholders who have not held the fund's shares for a full year should be aware that the fund may report and distribute to a shareholder, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the fund's ordinary income or net capital gain, respectively, actually earned during the shareholder's period of investment in the fund. Distributions of ordinary income and capital gains may also be subject to foreign, state and local taxes depending on a shareholder's circumstances.

Taxation of Shareholders – Sale of Shares. In general, assuming a shareholder holds fund shares as capital assets, a sale of shares results in capital gain or loss, and for individual shareholders, is taxable at a federal rate dependent upon the length of time the shares were held. A sale of shares held for a period of one year or less at the time of such sale will, for federal income tax purposes, generally result in short-term capital gains or losses, and a sale of those held for more than one year will generally result in long-term capital gains or losses. Long-term capital gains are generally taxed to non-corporate shareholders at rates of up to 20%.

Gain or loss on the sale of shares is measured by the difference between the amount received and the adjusted tax basis of the shares. Shareholders should keep records of investments made (including shares acquired through reinvestment of dividends and distributions) so they can compute the tax basis of their shares.

A loss realized on a sale of shares may be disallowed if substantially identical shares are acquired (whether through the reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after the date that the shares are disposed of. In such a case, the basis of the shares acquired must be adjusted to reflect the disallowed loss. Any loss upon the sale of shares held for six months or less will be treated as long-term capital loss to the extent of any amounts treated as distributions to the shareholder of long-term capital gain (including any amounts credited to the shareholder as undistributed capital gains).

Cost Basis Reporting. The cost basis of shares acquired by purchase will generally be based on the amount paid for the shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of shares generally determines the amount of the gain or loss realized on the sale or exchange of shares. Contact the broker through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

Taxation of Fund Investments. Certain of the fund's investments may be subject to complex provisions of the Code (including provisions relating to hedging transactions, straddles, integrated transactions, foreign currency contracts, forward foreign currency contracts, and notional principal contracts) that, among other things, may affect the fund's ability to qualify as a RIC, affect the character of gains and losses realized by the fund (e.g., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require the fund to annually mark-to-market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause the fund to recognize income without receiving cash with which to make distributions to its shareholders in amounts necessary to satisfy the RIC distribution requirements for avoiding income and excise taxes. The fund intends to monitor its transactions, make appropriate tax elections, and make appropriate entries in its books and records in order to mitigate the effect of these rules and preserve the fund's qualification for treatment as a RIC.

Certain investments made by the fund may be treated as equity in passive foreign investment companies ("PFICs") for federal income tax purposes. In general, a PFIC is a foreign corporation (i) that receives at least 75% of its annual gross income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains) or (ii) where at least 50% of its assets (computed based on average fair market value) either produce or are held for the production of passive income. If the fund acquires any equity interest in a PFIC, the fund could be subject to U.S. federal income tax and nondeductible interest charges on "excess distributions" received from such companies or on gain from the sale of stock in such companies, even if all income or gain actually received by the fund is timely distributed to its shareholders. The fund would not be able to pass through to its shareholders any credit or deduction for such a tax. A "qualified electing fund" election or a "mark to market" election may be available that would ameliorate these adverse tax consequences, but such elections could require the fund to recognize taxable income or gain (subject to the Distribution Requirement applicable to RICs, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax at the fund level, the fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the fund. Gains from the sale of stock of PFICs may also be treated as ordinary income. Amounts included in income each year by the fund arising from a qualified electing fund election, will be "qualifying income" under the Qualifying Income Requirement even if not distributed to the fund, if the fund derives such income from its business of investing in stock, securities or currencies. The fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules. In order for the fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the fund on an annual basis, which it might not agree to do. The fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its returns from these investments.

The fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures and options contracts subject to section 1256 of the Code ("Section 1256 Contracts") as of the end of the year as well as those actually realized during the year. Gain or loss from Section 1256 Contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. The fund may be required to defer the recognition of losses on Section 1256 Contracts to the extent of any unrecognized gains on offsetting positions held by the fund.

Foreign Taxes. Dividends and interest received by the fund on foreign securities may give rise to withholding and other taxes imposed by foreign countries. Any such taxes would, if imposed, reduce the yield on or return from those investments. Tax conventions between certain countries and the United States may reduce or eliminate such taxes.

If the fund meets certain requirements, which include a requirement that more than 50% of the value of the fund's total assets at the close of its respective taxable year consist of certain foreign securities (generally including foreign government securities), then the fund should be eligible to file an election with the IRS that may enable its shareholders, in effect, to receive either the benefit of a foreign tax credit, or a tax deduction, with respect to certain foreign and U.S. possessions income taxes paid by the fund, subject to certain limitations.

Pursuant to this election, the fund would treat the applicable foreign taxes as dividends paid to its shareholders. Each such shareholder would be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit the shareholder may be entitled to use against such shareholder's federal income tax. If the fund makes this election, the fund will report annually the respective amounts per share of the fund's income from sources within, and taxes paid to, foreign countries and U.S. possessions. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability. If the fund does not make this election, the fund will be entitled to claim a deduction for certain foreign taxes incurred by the fund. In certain instances, the fund might not elect to apply otherwise allowable U.S. federal income tax deductions for those foreign taxes, whether or not credits or deductions for those foreign taxes could be passed through to its shareholders pursuant to the election described above. If the fund does not elect to apply these deductions, taxable distributions you receive from the fund may be larger than they would have been if the fund had taken deductions for such taxes. Under certain circumstances, if the fund receives a refund of foreign taxes paid in respect of a prior year, the value of shares could be reduced or any foreign tax credits or deductions passed through to shareholders in respect of the fund's foreign taxes for the current year could be reduced.

A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by the fund may be subject to certain limitations imposed by the Code, which may result in a shareholder not receiving a full credit or deduction (if any) for the amount of such taxes. In particular, shareholders must hold their fund shares (without protection from risk of loss) on the ex-dividend date and for at least 15 additional days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a given dividend. Shareholders who do not itemize on their federal income tax returns may claim a credit (but no deduction) for such foreign taxes. Even if the fund were eligible to make such an election for a given year, it may determine not to do so. Shareholders that are not subject to U.S. federal income tax, and those who invest in the fund through tax-advantaged accounts (including those who invest through IRAs or other tax-advantaged retirement plans), generally will receive no benefit from any tax credit or deduction passed through by the fund.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, IRAs, salary deferral arrangements, 401(k) plans, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Under current law, the fund generally serves to block UBTI from being realized by its tax-exempt shareholders. However, notwithstanding the foregoing, tax-exempt shareholders could realize UBTI by virtue of their investment in the fund where, for example, (i) the fund invests in REITs that hold residual interests in REMICs, (ii) the fund invests in a REIT that is a taxable mortgage pool ("TMP") or has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares constitute debt-financed property in the hands of the tax-exempt shareholders within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisors. There are no restrictions preventing the fund from holding investments in REITs that hold residual interests in REMICs, and the fund may do so. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisors regarding these issues.

Certain tax-exempt educational institutions will be subject to a 1.4% tax on net investment income. For these purposes, certain dividends and capital gain distributions, and certain gains from the disposition of shares (among other categories of income), are generally taken into account in computing a shareholder's net investment income.

The fund's shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from the fund until a shareholder begins receiving payments from their retirement account.

Foreign Shareholders. Distributions derived from taxable ordinary income and paid by the fund to shareholders who are nonresident aliens or foreign entities will generally be subject to a 30% United States withholding tax unless a reduced rate of withholding or a withholding exemption is provided under applicable treaty law or unless such income is effectively connected with a U.S. trade or business carried on through a permanent establishment in the United States. Any foreign shareholders in the fund may be subject to U.S. withholding and estate tax and such shareholders are urged to consult their own tax advisors concerning the applicability of such taxes and the proper withholding form(s) to be submitted to the fund. A foreign shareholder who fails to provide an appropriate series of IRS Form W-8 may be subject to backup withholding (discussed below) at the appropriate rate.

Dividends reported by the fund as (i) interest-related dividends, to the extent such dividends are derived from the fund's "qualified net interest income," or (ii) short-term capital gain dividends, to the extent such dividends are derived from the fund's "qualified short-term gain," are generally exempt from this 30% withholding tax. "Qualified net interest income" is the fund's net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. "Qualified short-term gain" generally means the excess of the fund's net short-term capital gain for the taxable year over its net long-term capital loss, if any. In the case of shares held through an intermediary, the intermediary may withhold even if the fund reports the payment as an interest-related dividend or as a short-term capital gain dividend. Short-term capital gain dividends received by a nonresident alien individual who is present in the United States for a period of periods aggregating 183 days or more during the taxable year are not exempt from the 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of the fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders should contact their intermediaries with respect to the application of these rules to their accounts.

Under legislation known as "FATCA" (the Foreign Account Tax Compliance Act), a U.S. withholding tax of 30% will apply to payments to certain foreign entities of U.S.-source interest and dividends unless various U.S. information reporting and due diligence requirements that are different from, and in addition to, the beneficial owner certification requirements described above have been satisfied. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement. The fund will not pay additional amounts in respect to any amounts withheld. Non-U.S. shareholders should consult their tax advisers regarding the effect, if any, of this legislation on their ownership and sale or disposition of the fund's common shares.

A beneficial holder of shares of the fund who is a foreign person may be subject to foreign, state and local tax and to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment or fixed base maintained by the shareholder in the United States.

Backup Withholding. The fund will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) has provided the fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends, (3) has failed to certify to the fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 24%. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the U.S. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS.

Creation Units. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the Authorized Participant's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. An Authorized Participant who redeems Creation Units will generally recognize

a gain or loss equal to the difference between the Authorized Participant's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" (for an Authorized Participant that does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position.

Any gain or loss realized upon a creation or redemption of Creation Units will be treated as capital or ordinary gain or loss, depending on the holder's circumstances. Any capital gain or loss realized upon a creation of Creation Units will be treated as capital gain or loss if the Authorized Participant holds the securities exchanged therefor as capital assets, and otherwise will be ordinary income or loss. Similarly, any gain or loss realized upon a redemption of Creation Units will be treated as capital gain or loss if the Authorized Participant holds the shares comprising the Creation Units as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year, and otherwise will be short-term capital gain or loss. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year, and otherwise, will generally be short-term capital gain or loss. Any capital loss realized upon a redemption of Creation Units held for six months or less will be disallowed to the extent of exempt-interest dividends paid with respect to the Creation Units, and to the extent not disallowed will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gains with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the fund and if, pursuant to section 351 of the Code, the fund would have a basis in any deposit securities different from the market value of such securities on the date of deposit. The fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the fund, the purchaser (or a group of purchasers) may not recognize gain or loss upon the exchange of securities for Creation Units.

A person subject to U.S. federal income tax with the U.S. dollar as its functional currency for U.S. federal income tax purposes who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, or upon the use of the non-U.S. currency to pay expenses or acquire assets, recognize as ordinary gains or losses any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption. Authorized Participants purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

Authorized Participants purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss might be deductible.

Certain Potential Tax Reporting Requirements. Under promulgated Treasury regulations, if a shareholder recognizes a loss on disposition of the fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. A shareholder who fails to make the required disclosure to the IRS may be subject to adverse tax consequences, including significant penalties. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

State Tax Matters. Depending upon state and local law, distributions by the fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is

expected that the fund will not be liable for any corporate excise, income or franchise tax in Massachusetts if the fund qualifies as a RIC for federal income tax purposes.

The foregoing discussion is a summary only and is not intended as a substitute for careful tax planning. Purchasers of shares should consult their own tax advisors as to the tax consequences of investing in such shares, including under state, local and other tax laws. Finally, the foregoing discussion is based on applicable provisions of the Code, regulations, judicial authority and administrative interpretations in effect on the date hereof. Changes in applicable authority could materially affect the conclusions discussed above, and such changes often occur.

PORTFOLIO TRANSACTIONS

The Adviser assumes general supervision over the placement of securities purchase and sale orders on behalf of the fund. The fund employs a Sub-Adviser.¹ The fund uses the research facilities, and is subject to the internal policies and procedures, of the Sub-Adviser and executes portfolio transactions through the trading desk of the Sub-Adviser (collectively the "Trading Desk").

Trading the Fund's Portfolio Securities

Debt securities purchased and sold by the fund generally are traded on a net basis (i.e., without a commission) through dealers acting for their own account and not as brokers, or otherwise involve transactions directly with the issuer of the instrument. This means that a dealer makes a market for securities by offering to buy at one price and sell at a slightly higher price. The difference between the prices is known as a "spread." Other portfolio transactions may be executed through brokers acting as agents, which are typically paid a commission.

The Trading Desk generally has the authority to select brokers (for stocks) or dealers (for fixed-income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions is made in the best judgment of the Trading Desk and in a manner deemed fair and reasonable. In choosing brokers or dealers, the Trading Desk evaluates the ability of the broker or dealer to execute the transaction at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of the fund are selected on the basis of their professional capability and the value and quality of their services. The Trading Desk seeks to obtain best execution by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counterparty risk (i.e., the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (e.g., foreign or domestic security, large block, illiquid investment). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

Investment decisions for one fund or account are made independently from those for other funds or accounts managed by the portfolio managers. Under the Trading Desk's procedures, portfolio managers and their corresponding Trading Desks may, but are not required to, seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account, and available investments or opportunities for sales will be allocated equitably to each. In some cases, this policy may adversely affect the size of the position obtained or sold or the price paid or received by the fund. When transactions are aggregated, but it is not possible to receive the same price or execution on the entire volume of securities purchased or sold, the various prices may be averaged, and the fund will be charged or credited with the average price.

¹ The fund does not use a dual employee arrangement between the Adviser and an Affiliated Entity as referenced in this and certain other sections.

The portfolio managers will make investment decisions for the fund as they believe are in the best interests of the fund. Investment decisions made for the fund may differ from, and may conflict with, investment decisions made for other funds and accounts advised by the Adviser and its Affiliated Entities or a Sub-Adviser or sub-sub-adviser. Actions taken with respect to such other funds or accounts may adversely impact the fund, and actions taken by the fund may benefit the Adviser or its Affiliated Entities or a Sub-Adviser or sub-sub-adviser or other funds or accounts advised by the Adviser or an Affiliated Entity or Sub-Adviser or sub-sub-adviser. Funds and accounts managed by the Adviser, an Affiliated Entity or a Sub-Adviser or sub-sub-adviser may own significant positions in an issuer of securities which, depending on market conditions, may affect adversely the ability to dispose of some or all of such positions. Regulatory restrictions (including, but not limited to, those related to the aggregation of positions among other funds and accounts or those restricting trading while in possession of material non-public information, such as may be deemed to be received by the fund's portfolio manager by virtue of the portfolio manager's position or other relationship with the fund's portfolio company) and internal BNY policies, guidance or limitations (including, but not limited to, those related to the aggregation of positions among all fiduciary accounts managed or advised by BNY and all its affiliates (including the Adviser and its Affiliated Entities) and the aggregate exposure of such accounts) may restrict investment activities of the fund. While the allocation of investment opportunities among the fund and other funds and accounts advised by the Adviser and its Affiliated Entities may raise potential conflicts because of financial, investment or other interests of BNY or its personnel (or, with respect to the fund advised by a Sub-Adviser, or sub-sub-adviser the Sub-Adviser or sub-sub-adviser and their affiliates), the portfolio managers will make allocation decisions consistent with the interests of the fund and other funds and accounts and not solely based on such other interests.

Portfolio managers may deem it appropriate for one fund or account they manage to sell a security while another fund or account they manage is purchasing the same security. Under such circumstances, the portfolio managers may arrange to have the purchase and sale transactions effected directly between the fund and/or accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

The Adviser, an Affiliated Entity, a Sub-Adviser or sub-sub-adviser may buy for the fund securities of issuers in which other funds or accounts advised by the Adviser, the Affiliated Entity, the Sub-Adviser or the sub-sub-adviser may have, or are making, an investment in the same issuer that are subordinate or senior to the securities purchased for the fund. For example, the fund may invest in debt securities of an issuer at the same time that other funds or accounts are investing, or currently have an investment, in stocks of the same issuer. To the extent that the issuer experiences financial or operational challenges which may impact the price of its securities and its ability to meet its obligations, decisions by the Adviser, an Affiliated Entity, a Sub-Adviser or a sub-sub-adviser relating to what actions are to be taken may raise conflicts of interests, and the Adviser, the Affiliated Entity or the Sub-Adviser or the sub-sub-adviser, as applicable, may take actions for certain funds or accounts that have negative impacts on other funds or accounts.

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, portfolio managers will not be deterred from changing the fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Trading Desk based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs, and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that the fund invests in foreign securities, certain of the fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The Adviser (and, where applicable, an Affiliated Entity or a Sub-Adviser) may utilize the services of an affiliate to effect certain client transactions when it determines that the use of such affiliate is consistent with its fiduciary obligations, including its obligation to obtain best execution, and the transactions are in the best interests of its clients. Procedures have been adopted in conformity with Rule 17e-1 under the 1940 Act to provide that all

brokerage commissions paid by the fund to the Adviser (and, where applicable, an Affiliated Entity or a Sub-Adviser) are reasonable and fair.

For funds that invest in municipal securities, portfolio securities are purchased from and sold to parties acting as either principal or agent. Newly-issued securities ordinarily are purchased directly from the issuer or from an underwriter; other purchases and sales usually are placed with those dealers from which it appears that the best price or execution will be obtained. Usually no brokerage commissions as such are paid by the fund for such purchases and sales, although the price paid usually includes an undisclosed compensation to the dealer acting as agent. The prices paid to underwriters of newly-issued securities usually include a concession paid by the issuer to the underwriter and purchases of after-market securities from dealers ordinarily are executed at a price between the bid and asked price.

Soft Dollars

The term "soft dollars" is commonly understood to refer to arrangements where an investment adviser uses client (or fund) brokerage commissions to pay for research and brokerage services to be used by the investment adviser. Section 28(e) of the Exchange Act provides a "safe harbor" that permits investment advisers to enter into soft dollar arrangements if the investment adviser determines in good faith that the amount of the commission is reasonable in relation to the value of the brokerage and research services provided. Eligible products and services under Section 28(e) include those that provide lawful and appropriate assistance to the investment adviser in the performance of its investment decision-making responsibilities.

Subject to the policy of seeking best execution, the fund may execute transactions with brokerage firms that provide research services and products, as defined in Section 28(e). Any and all research products and services received in connection with brokerage commissions will be used to assist the applicable Affiliated Entity or Sub-Adviser in its investment decision-making responsibilities, as contemplated under Section 28(e). Under certain conditions, higher brokerage commissions may be paid in connection with certain transactions in return for research products and services.

The products and services provided under these arrangements permit the Trading Desk to supplement its own research and analysis activities, and provide it with information from individuals and research staff of many securities firms. Such services and products may include, but are not limited to, the following: fundamental research reports (which may discuss, among other things, the value of securities, or the advisability of investing in, purchasing or selling securities, or the availability of securities or the purchasers or sellers of securities, or issuers, industries, economic factors and trends, portfolio strategy and performance); current market data and news; statistical data; technical and portfolio analyses; economic forecasting and interest rate projections; and historical information on securities and companies. The Trading Desk also may use client brokerage commission arrangements to defray the costs of certain services and communication systems that facilitate trade execution (such as on-line quotation systems, direct data feeds from stock exchanges and on-line trading systems) or functions related thereto (such as clearance and settlement). Some of the research products or services received by the Trading Desk may have both a research function and a non-research or administrative function (a "mixed use"). If the Trading Desk determines that any research product or service has a mixed use, the Trading Desk will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Trading Desk determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Trading Desk in hard dollars.

The Trading Desk generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the services nor the amount of brokerage given to a particular brokerage firm are made pursuant to any agreement or commitment with any of the selected firms that would bind the Trading Desk to compensate the selected brokerage firm for research provided. The Trading Desk endeavors, but is not legally obligated, to direct sufficient commissions to broker/dealers that have provided it with research and other services to ensure continued receipt of research the Trading Desk believes is useful. Actual commissions received by a brokerage firm may be more or less than the suggested allocations.

There may be no correlation between the amount of brokerage commissions generated by a particular fund or account and the indirect benefits received by that fund or client. The Affiliated Entity or Sub-Adviser may receive a

benefit from the research services and products that is not passed on to the fund in the form of a direct monetary benefit. Further, research services and products may be useful to the Affiliated Entity or Sub-Adviser in providing investment advice to any of the funds or other accounts it advises. Information made available to the Affiliated Entity or Sub-Adviser from brokerage firms effecting securities transactions for another fund or account may be utilized on behalf of the fund. Thus, there may be no correlation between the amount of brokerage commissions generated by the fund and the indirect benefits received by the fund. Information so received is in addition to, and not in lieu of, services required to be performed by the Affiliated Entity or Sub-Adviser and fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the normal independent research activities of the Affiliated Entity or Sub-Adviser, it enables it to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

IPO Allocations

The fund may participate in IPOs. In deciding whether to purchase an IPO, a fund's portfolio manager(s) generally consider the capitalization characteristics of the security, as well as other characteristics of the security, and identifies funds and accounts with investment objectives and strategies consistent with such a purchase. Generally, as more IPOs involve small- and mid-cap companies, the funds and accounts with a small- and mid-cap focus may participate in more IPOs than funds and accounts with a large-cap focus. The Affiliated Entity or Sub-Adviser (as applicable), when consistent with the fund's and/or account's investment guidelines, generally will allocate shares of an IPO on a pro rata basis. In the case of "hot" IPOs, where the Affiliated Entity or Sub-Adviser only receives a partial allocation of the total amount requested, those shares will be distributed fairly and equitably among participating funds or accounts managed by the Affiliated Entity or Sub-Adviser. "Hot" IPOs raise special allocation concerns because opportunities to invest in such issues are limited as they are often oversubscribed. The distribution of the partial allocation among funds and/or accounts will be based on relative NAVs. Shares will be allocated on a pro rata basis to all appropriate funds and accounts, subject to a minimum allocation based on trading, custody and other associated costs. International hot IPOs may not be allocated on a pro rata basis due to transaction costs, market liquidity and other factors unique to international markets.

DISCLOSURE OF PORTFOLIO HOLDINGS

Policy on Disclosure of Portfolio Holdings

The Trust has adopted a policy regarding the disclosure of information about the fund's portfolio holdings. The board must approve all material amendments to this policy. The fund's portfolio holdings are publicly disseminated each day the fund is open for business through financial reporting and news services including publicly accessible Internet web sites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for shares, together with estimates and actual cash components, is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation ("NSCC"). The basket represents one Creation Unit of the fund. The Trust, the Adviser, the Sub-Adviser or the sub-sub-adviser (as applicable) or BNY will not disseminate non-public information concerning the Trust, except information may be made available prior to its public availability: (i) to a party for a legitimate business purpose related to the day-to-day operations of the fund including (a) a service provider, (b) the stock exchanges upon which an ETF is listed, (c) the NSCC, (d) the Depository Trust Company, and (e) financial data/research companies such as Morningstar, Bloomberg L.P., FactSet, Barra LLC and RiskMetrics Group, and Reuters, or (ii) to any other party for a legitimate business or regulatory purpose, upon waiver or exception, with the consent of an applicable Trust officer.

SUMMARY OF THE PROXY VOTING POLICY AND PROCEDURES

Delegation of Proxy Voting Responsibility and Adoption of Proxy Voting Procedures.

The board has delegated to the Adviser and the Adviser has delegated to NIMNA, the fund's Sub-Adviser, the authority to vote proxies of companies held in the fund's portfolio, except that the board has delegated to Institutional Shareholder Services Inc. ("ISS") the sole authority to vote proxies of Designated BHCs (defined below) for the fund as described below.

Proxy Voting Operations

The fund has engaged ISS as their proxy voting agent to administer the ministerial, non-discretionary elements of proxy voting and reporting.

Policies and Procedures; Oversight

The CCO is responsible for confirming that the Sub-Adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the fund's proxies are voted in the best interests of the fund. In addition, the adequacy of such policies and procedures are reviewed at least annually, and proxy voting for the fund is monitored to ensure compliance with the Sub-Adviser's procedures, as applicable, such as by sampling votes cast for the fund, including routine proposals as well as those that require more analysis, to determine whether they complied with the applicable Sub-Adviser's proxy voting procedures.

Review of Proxy Voting

The Adviser reports annually to the board on the fund's proxy voting, including information regarding: (1) proxy voting proposals that were voted; (2) proxy voting proposals that were voted against the management company's recommended vote, but in accordance with the applicable proxy voting guidelines; and (3) proxy voting proposals that were not voted, including the reasons the proxy voting proposals were not voted.

Availability of Fund Proxy Voting Records

Information regarding how the fund's proxies were voted during the most recent 12-month period ended June 30th is available, by the following August 31st, at www.bny.com/investments, on the SEC's website at <http://www.sec.gov> and without charge, upon request by calling 833-ETF-BNYM (383-2696) (inside the U.S. only).

BNY Proxy Conflicts Policy

Under certain circumstances, BNY has determined that it may not be appropriate for its subsidiaries and business units with discretionary authority to vote proxies on behalf of clients, including NIMNA (each, a "Voting Firm"), and has established a Proxy Voting Conflicts Policy (the "BNY Policy") that sets forth the required actions and reporting of Voting Firms when actual or potential conflicts of interest involving BNY arise. The BNY Policy identifies several specific types of proxy solicitations that are considered "Primary Conflicts" for all Voting Firms. Primary Conflicts typically arise when proxies are issued by BNY or by a pooled vehicle when relating to services provided by a BNY affiliate and may also arise due to relationships between a proxy issuer and BNY or BNY's Chief Executive Officer or Board of Directors. The BNY Policy directs the manner in which such Primary Conflicts are to be addressed (e.g., application of pre-determined, written guidelines, client consent, or delegation to an independent fiduciary). The BNY Policy also identifies as "Secondary Conflicts" situations that, while not identified as a Primary Conflict, may present an actual, potential or perceived material conflict for Voting Firms because of a relationship between a proxy issuer and BNY or its executive officers or Board of Directors.

When Primary Conflicts or Secondary Conflicts are voted in accordance with a Voting Firm's pre-determined, written voting guidelines, it is BNY's view that these votes do not present the potential for a material conflict of interest and no additional safeguards are needed.

The Voting Firms, including NIMNA, are also subject to the policies and decisions of BNY's Proxy Conflicts Committee (the "PCC"). Among other responsibilities, BNY has empowered the PCC to maintain, interpret and effect the BNY Policy. If a Voting Firm needs interpretive guidance concerning a Primary Conflict or identifies a Secondary Conflict, the PCC shall review the matter, and (in the case of identified conflicts) determine how best to resolve the conflict (e.g., independent fiduciary, abstention, or mirror voting).

Voting Proxies of Designated BHCs

BNY is subject to the requirements of the Bank Holding Company Act of 1956, as amended (the "BHCA"). Among other things, the BHCA prohibits BNY, funds that BNY "controls" by virtue of share ownership ("Bank Controlled Funds"), and any fund or other investment account over which BNY exercises sole voting discretion (collectively, the "BNY Entities"), in the aggregate, from owning or controlling or holding sole voting discretion with respect to

5% or more of any class of voting stock of certain U.S. bank holding companies, savings and loan holding companies, insured depository institutions and companies that control an insured depository institution (collectively, "BHCs"), without the prior approval of the Board of Governors of the Federal Reserve System (the "BHCA Rules").

For all funds except Bank Controlled Funds, the board has delegated to ISS the sole authority to vote proxies of BHCs for which one or more funds or other investment accounts over which BNY Entities, in the aggregate, exercise sole voting discretion with respect to 5% or more of any class of voting stock of the BHC (collectively, the "Designated BHCs"). Because ISS has sole voting authority over voting securities issued by the Designated BHCs, the holdings of such securities by the funds (other than Bank Controlled Funds) are excluded from the 5% aggregate computation under the BHCA Rules and the funds (other than Bank Controlled Funds) are permitted to purchase and hold securities of BHCs without limits imposed by the BHCA. (Voting securities of BHCs held by funds that are Bank Controlled Funds, however, continue to be aggregated with the holdings of other BNY Entities because of BNY's share ownership in those funds.)

An issuer that is a BHC will be identified as a Designated BHC (and voting authority over its voting securities will be delegated to ISS) when BNY Entities in the aggregate own, control or hold sole voting discretion with respect to approximately 4.9% of any class of voting securities issued by the BHC. If such aggregate level of ownership, control or voting discretion decreases to approximately 3%, the issuer will no longer be considered a Designated BHC and the Sub-Adviser will be redelegated sole voting authority over the BHC's voting securities held by the fund.

ISS votes proxies delegated by the board in accordance with the ISS Guidelines available at <https://www.issgovernance.com/policy-gateway/voting-policies>.

Material Conflicts of Interest. ISS has policies and procedures in place to manage potential conflicts of interest that may arise as a result of work that ISS's subsidiary performs for a corporate governance client and any voting of proxies relating to such client's securities that ISS performs on behalf of the fund. Such policies and procedures include separate staffs for the work performed for corporate governance clients and ISS's proxy voting services; a firewall that includes legal, physical and technological separations of the two businesses; and the employment of a blackout period on work performed with a corporate governance client during the pendency of a live voting issue in respect of securities of such client.

Voting Shares of Certain Registered Investment Companies

Under certain circumstances, when the fund owns shares of another registered investment company (an "Acquired Fund"), the fund may be required by the 1940 Act or the rules thereunder, to vote such Acquired Fund shares in a certain manner, such as voting the Acquired Fund shares in the same proportion as the vote of all other holders of the same type of such Acquired Fund shares.

ADDITIONAL INFORMATION ABOUT THE FUND'S STRUCTURE; FUND SHARES AND VOTING RIGHTS; SHAREHOLDER ACTIONS

Massachusetts Business Trusts

If a fund is a series of a fund company organized as an unincorporated business trust under the laws of the Commonwealth of Massachusetts, shareholders of the fund could, under certain circumstances, be held personally liable for the obligations of the fund. However, the fund company's Agreement and Declaration of Trust (the "Trust Agreement") disclaims shareholder liability for acts or obligations of the fund company and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the fund company or a board member. The Trust Agreement provides for indemnification from a fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by a fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the fund. The fund companies intend to conduct their operations in such a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of a fund.

Fund Shares and Voting Rights

Fund shares have equal rights as to dividends and in liquidation. Shares have no preemptive, subscription rights or, except as described in the prospectus or this SAI, conversion rights and are freely transferable. Each fund share has one vote and, when issued and paid for in accordance with the terms of its offering, is fully paid and non-assessable.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for a fund to hold annual meetings of shareholders. As a result, shareholders may not consider each year the election of board members or the appointment of an independent registered public accounting firm. However, for a fund that is organized as a Massachusetts business trust or a series of a Massachusetts business trust, the holders of at least 30% of shares outstanding and entitled to vote may require a special meeting of shareholders to be held, including for purposes of removing a board member from office. In addition, the board will call a meeting of shareholders for the purpose of electing board members if, at any time, less than a majority of the board members then holding office have been elected by shareholders.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted under the provisions of the 1940 Act or applicable state law or otherwise to the holders of the outstanding voting securities of an investment company will not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series, if any, affected by such matter. Rule 18f-2 further provides that a series shall be deemed to be affected by a matter unless it is clear that the interests of each series in the matter are identical or that the matter does not affect any interest of such series. Rule 18f-2 exempts the selection of the independent registered public accounting firm and the election of board members from the separate voting requirements of the rule.

Shareholder Actions

The Trust Agreement establishes a process that permits legitimate inquiries and claims to be made and considered while avoiding the time, expense, distraction, and other harm that can be caused to the Trust and its shareholders as a result of spurious shareholder claims, demands, and derivative actions. Certain aspects of the process are discussed here. With respect to a derivative action, which is where one or more shareholders bring an action in the name of the Trust or a series against parties allegedly causing harm to the Trust or the series, prior to the commencement of a derivative action, a shareholder must make a written demand on the board members requesting that the board members cause the Trust to file the action itself on behalf of the Trust or the affected series. Such written demand must comply with the requirements of Section 9.8(b)(iii) of the Trust Agreement. Within 150 calendar days of the receipt of a shareholder demand submitted in accordance with the requirements of the Trust Agreement, the Independent Board Members will consider the merits of the claim and determine whether maintaining a suit would be in the best interests of the Trust or the affected series, as applicable. If a majority of the Independent Board Members determine that maintaining a suit would not be in the best interests of the Trust or the affected series, as applicable, the demand shall be rejected and the shareholder shall not be permitted to maintain a derivative action unless the shareholder first sustains the burden of proof to the court that the decision of the Independent Board Members not to pursue the requested action was not a good faith exercise of their business judgment on behalf of the Trust. With respect to a direct action, no shareholder may bring a direct action claiming injury as a shareholder of the Trust, or an affected series, where the matters alleged (if true) would give rise to a claim by the Trust or by the Trust on behalf of an affected series, unless the shareholder has suffered an injury distinct from that suffered by the shareholders of the Trust, or the affected series, generally.

Pursuant to the Trust Agreement, any action commenced by a shareholder (i) directly against (A) the Trust or a series, (B) board members or officers related to, arising out of, or concerning the Trust, its business, or operations, or (C) otherwise related to, arising out of, or concerning the Trust, its business or operations or (ii) derivatively in the right or name of, or on behalf of, the Trust, or series (collectively, the "Covered Actions"), shall be brought only in the U.S. District Court for the District of Massachusetts (Boston Division) or, if such Covered Action may not be brought in that court, then such action shall be brought in the Business Litigation Session of Suffolk Superior Court in Massachusetts (the "Chosen Courts"). A Chosen Court may be less convenient and/or less favorable for a shareholder than one or more other courts. In any Covered Action, there shall be no right to a jury trial.

No provision of the Trust Agreement shall restrict any shareholder rights granted by, the Securities Act, the Exchange Act or the 1940 Act, or of any valid rule, regulation, or order of the SEC thereunder.

LOCAL MARKET HOLIDAY SCHEDULES

The Trust generally intends to effect deliveries of portfolio securities on a T+1 basis. The ability of the Trust to effect in-kind redemptions within the standard settlement period following receipt of a redemption request is subject, among other things, to the condition that, within the time period from the date of the request to the date of delivery of the securities, there are no days that are local market holidays on the relevant Business Days. For every occurrence of one or more intervening holidays in the local market that are not holidays observed in the United States, the redemption settlement cycle may be extended by the number of such intervening local holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within one Business Day. The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with local market holiday schedules, may require a delivery process longer than the standard settlement period. In certain circumstances during the calendar year, the settlement period may be greater than seven calendar days.

FINANCIAL STATEMENTS

The financial statements and financial highlights of the fund for the year ended February 28, 2025, along with the report of Ernst & Young LLP, the Trust's independent registered public accounting firm, included in the fund's Annual Report to Shareholders on Form N-CSR under the 1940 Act, are incorporated by reference into the SAI.

GLOSSARY

The following are definitions of certain terms used in this Statement of Additional Information. Other terms are defined in the Statement Additional Information.

Term	Meaning
12b-1 Plan	A Plan adopted pursuant to Rule 12b-1 under the 1940 Act
1940 Act	Investment Company Act of 1940, as amended
ACH	Automated Clearing House
Accumulation Period	The period beginning on the fund's ex-dividend date and ending on the day preceding the next ex-dividend date.
Administrator	The Bank of New York Mellon
ADRs	American Depositary Receipts and American Depositary Shares
Adviser	BNY Mellon ETF Investment Adviser, LLC
Advisers Act	Investment Advisers Act of 1940, as amended
Adviser-sponsored	An IRA or Retirement Plan sponsored by the Adviser or its affiliates, including the Distributor
Affiliated Broker	A broker that is (1) an affiliate of the fund, or an affiliated person of such person or (2) an affiliated person of which is an affiliated person of the fund, its Adviser or the Distributor
Affiliated Entity	An affiliate of the Adviser that, along with the Adviser, employs fund portfolio managers who are dual employees of the Adviser and such affiliate
Authorized Participant	A Participating Party or DTC Participant that has executed a Participant Agreement with the Distributor, and has been accepted by the Trust, with respect to purchases and redemptions of Creation Units.
Business Day	Generally, any day on which the NYSE is open for business.
BNY	The Bank of New York Mellon Corporation; BNY is the corporate brand of The Bank of New York Mellon Corporation. BNY may also refer to BNY

Term	Meaning
	and its direct and indirect subsidiaries
Cash Component	The deposit of a specified cash payment, which together with the Deposit Securities or Deposit Cash is deposited for a Creation Unit
CCO	Chief Compliance Officer
CEA	Commodities Exchange Act
CEO	Chief Executive Officer
CFTC	Commodity Futures Trading Commission
Code	Internal Revenue Code of 1986, as amended
CPO	Commodity pool operator
Creation Unit	Aggregations of a specified number of shares offered and issued by the fund
Custodian	The Bank of New York Mellon
Deposit Cash	A cash payment equal in value to the Deposit Securities
Deposit Securities	The basket of securities part of an underlying portfolio of the fund accepted for deposit for a Creation Unit
Distributor	BNY Mellon Securities Corporation
Dividend Equivalent Payment	A complete distribution of dividends on the day preceding the next dividend payment date of the fund, and is an amount equal, on a per Creation Unit basis, to the dividends on all the portfolio securities of the fund ("Dividend Securities") with ex-dividend dates within the accumulation period for such distribution (the "Accumulation Period"), net of expenses and liabilities for such period, as if all of the Dividend Securities had been held by the fund for the entire Accumulation Period.
Dividend Securities	An amount equal, on a per Creation Unit basis, to the dividends on all the portfolio securities of the fund
Dodd-Frank Act	Dodd-Frank Wall Street Reform and Consumer Protection Act
DTC	Depository Trust Company
DTC Participants	Participants of DTC who hold their securities there
EDRs	European Depositary Receipts

Term	Meaning
ETFs	Exchange-traded funds and similar exchange-traded products
ETNs	Exchange-traded notes
Exchange	The NASDAQ Stock Market LLC
Exchange Act	Securities Exchange Act of 1934, as amended
FDIC	Federal Deposit Insurance Corporation
Federal Funds	Monies of member banks within the Federal Reserve System which are held on deposit at a Federal Reserve Bank
FINRA	Financial Industry Regulatory Authority
Fund Deposit	The Deposit Securities or Deposit Cash, as applicable, and the Cash Component, which represent the minimum initial and subsequent investment amount for a Creation Unit of the fund
GDRs	Global Depositary Receipts
GNMA	Government National Mortgage Association
In-Kind Redemption	Distribution to a redeeming Authorized Participant of redemption proceeds in whole or in part in securities or other assets of the fund
Independent Board Member	A board member who is not an "interested person" (as defined in the 1940 Act) of the relevant fund
Interested Board Member	A board member who is considered to be an "interested person" (as defined in the 1940 Act) of the relevant fund
IPO	Initial public offering
IRAs	Individual retirement accounts (including, without limitation, traditional IRAs, Roth IRAs, Coverdell Education Savings Accounts, IRA "Rollover Accounts" or IRAs set up under Simplified Employee Pension Plans ("SEP-IRAs"), Salary Reduction Simplified Employee Pension Plans ("SARSEPs") or Savings Incentive Match Plans for Employees ("SIMPLE IRAs"))
IRS	Internal Revenue Service
ISS	Institutional Shareholder Services Inc.
Moody's	Moody's Investors Service, Inc.
NASDAQ	The Nasdaq Stock Market, Inc.

Term	Meaning
NAV	Net asset value
NIMNA	Newton Investment Management North America LLC
NFA	National Futures Association
NSCC	National Securities Clearing Corporation
NYSE	New York Stock Exchange
Participant Agreement	An agreement entered into with a financial participant so that the participant may engage in Creation Unit transactions
Participating Party	A broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC
Plans	Distribution Plans, Service Plans and Shareholder Services Plans
REIT	Real estate investment trust, as defined in the Code
REMIC	Real estate mortgage investment conduit, as defined in the Code
Retirement Plans	Qualified or non-qualified employee benefit plans, such as 401(k), 403(b)(7), Keogh, pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, sole proprietorships, non-profit entities, trade or labor unions, or state and local governments, but not including IRAs
RIC	Regulated investment company, as defined in the Code
SEC	Securities and Exchange Commission
Securities Act	Securities Act of 1933, as amended
Securities Lending Agent	The Bank of New York Mellon
Service Agents	Certain financial intermediaries (which may include banks), securities dealers and other industry professionals that have entered into an agreement with the Distributor
S&P	Standard & Poor's Ratings Services
Sub-Adviser	The fund's sub-investment adviser, if any, as described in the prospectus; the fund may have more than one Sub-Adviser in the future

Term	Meaning
Sub-Advised Funds	Funds that use a Sub-Adviser
TIPS	Treasury Inflation Protection Securities
Transfer Agent	The Bank of New York Mellon
Treasury	U.S. Department of the Treasury
Trust	BNY Mellon ETF Trust
USA PATRIOT Act	Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001

APPENDIX A

PROXY VOTING POLICIES AND PROCEDURES OF FIRMS DELEGATED FUND PROXY VOTING AUTHORITY

Newton Investment Management Limited/Newton Investment Management North America, LLC ("Newton")

Proxy Voting by Newton

Newton has adopted and implemented the Proxy Voting Policies and Procedures (the "Policy"), which it believes is reasonably designed to:

- Ensure that voting rights¹ are exercised;
- Ensure voting decisions are taken in the best interests of clients and in line with governance best practice, aiming to protect our clients' rights as minority shareholders;
- Address potential material conflicts of interest that may arise; and
- Meet disclosure requirements and expectations in connection with voting responsibilities and activities undertaken.

Voting Guidelines

Newton has established overarching voting guidelines which inform our ultimate voting decision, based on guidance established by internationally recognized governance principles including the OECD Corporate Governance Principles, the ICGN Global Governance Principles, the UK Investment Association's Principles of Remuneration and the UK Corporate Governance Code, in addition to other local governance codes.

All voting decisions are based on Newton's voting guidelines. We have used the services of an independent voting service provider to translate these guidelines into explicit voting actions forming a bespoke voting policy for Newton. This policy will be applied to all our votable holdings, enabling a universal approach to our voting while allowing us to deploy in-depth case-by-case analysis from the stewardship team for those issuers and/or proposals which merit greater focus due to the materiality of our investment or the importance of the issue at hand (e.g., shareholder resolution, corporate action, related-party transactions). In these instances, communication with or input from the wider investment team may be sought, as well as, if relevant, engagement with the company. The stewardship team retains the ultimate discretion to deviate the vote instruction from Newton's bespoke policy's recommendation.

Our active approach to voting means that our voting decisions reflect our investment rationale and the company's approach to relevant codes, market practices and regulations. These are applied to the company's unique situation, while also taking into account any explanations offered for why the company has adopted a certain position or policy.

Newton seeks to make proxy voting decisions that are in the best long-term financial interests of its clients and which seek to support investor value creation by supporting proposals that are consistent with our corporate governance views and investment case.

In general, voting decisions are taken consistently across all Newton's clients that are invested in the same underlying company. This is in line with Newton's investment process that focuses on the long-term success of the

¹ We do not acquire or hold securities to influence control of management under Rules 13d-1(b) and 13d-1(c) of the Securities Exchange Act of 1934. Any expression of our views or voting policy during meetings is not intended, and should not be construed, as an indication of voting intentions, support for any action, or an attempt to influence management control.

investee company. Further, it is Newton's intention to exercise voting rights in all circumstances where it retains voting authority. This may be hindered by various practical considerations. For instance, in certain markets, shares are "blocked" before the exercise of voting rights. Blocking consists of placing the stock on a register for a number of days spanning the meeting. During the share-blocked period, the shares cannot be traded freely.

In markets where share blocking is practiced, Newton will vote only when the resolution is not in shareholders' best interests and where restricting the ability to trade is not expected to adversely affect the value of clients' holdings. Another common barrier to voting is the requirement at market or company level for a Power of Attorney to be in place. In cases where our clients have not put these Powers of Attorney into place, we will not submit a vote.

Newton's Governance Principles and Voting Guidelines are available on our website and on demand.

Voting Procedures

All voting opportunities are communicated to Newton by way of an electronic voting platform. Moreover, the Stewardship Team has set up a series of email alerts and notifications on the electronic voting platform designed to ensure all meetings are voted in time and the significant holdings are captured and looked at internally.

The Stewardship team reviews the bespoke policy recommendation for all issuers and/or proposals which merit greater focus due to the materiality of our investment or the importance of the issue at hand (e.g., shareholder resolution, corporate action, related-party transactions) for matters of concern. Any such contentious issues identified may be referred to the appropriate global fundamental equity analyst or portfolio manager for comment.

An electronic voting service is employed to submit voting decisions.

Voting Service Providers

Newton utilizes an independent voting service provider for the purposes of managing upcoming meetings via its electronic platform, providing research and for implementing Newton's bespoke voting policy and issuing recommendations based on this policy.

Newton's external voting provider is subject to the requirements set by Newton's Vendor Management Oversight Group. As such, regular due diligence meetings are held and minutes maintained with this provider, which includes reviewing its operational performance, service quality, robustness of research and its internal controls, including management of its potential material conflicts of interest. In addition, and along with its other clients, Newton participates in consultations that seek specific feedback on proxy voting matters. This helps ensure alignment of interest between Newton's expectations and the voting recommendations provided by the external provider.

Acting Collectively

Subject to applicable law and reporting regulations, Newton will work collectively with other investors as well as trade associations, government bodies and non-governmental organizations to develop best practice, raise awareness of a concern or enhance the effectiveness of engagement activities. When considering action and also when acting collectively on a specific issue of concern with a company, we exercise caution in order to avoid situations of being unintentionally in receipt of Material Non-Public Information, breaching relevant anti-trust or anti-competitive rules and regulations, or being considered acting in concert with one or more other investors.

Conflicts of Interest

Where Newton acts as a proxy for its clients, a conflict could arise between Newton (including BNY funds or affiliate funds), the investee company and/or a client when exercising voting rights. Newton has in place procedures for ensuring potential material conflicts of interests are mitigated, while its clients' voting rights are exercised in their best interests. Newton seeks to avoid potential material conflicts of interest through:

- I. the establishment of Newton's Governance Principles and Voting Guidelines, which are applied in an objective and consistent manner across client accounts, based on, the application of Newton's bespoke

- voting policy and analysis drawn from internal and external research, as applicable and without consideration of any Newton or BNY client relationship factors;
- II. the establishment of an independent stewardship team, which executes Newton's proxy voting activities; and
- III. internal oversight groups.

Where a potential material conflict of interest exists between Newton, BNY, the underlying company and/or a client, the voting recommendations of an independent third-party proxy service provider will be applied.

All instances where a potential material conflict of interest has been recognized and where Newton engages its proxy voting service provider are disclosed in our annual stewardship report.

Newton employees are required to identify any potential or actual conflicts of interest and take appropriate action to avoid or manage these and report them to Newton's Conflicts of Interest Committee for review. Further information can be found in Newton's Conflicts of Interest Policy (<https://www.newtonim.com/global/special-document/conflict-of-interest-policy>). Newton employees are required to identify any potential or actual conflicts of interest and take appropriate action to avoid or manage these and report them to Newton's Conflicts of Interest Committee for review. Further information can be found in Newton's Conflicts of Interest Policy.

Disclosures and Reporting

We publish two major reports each year: (i) our annual stewardship report which provides an overview of our approach to stewardship and provides case studies on our engagement, advocacy and voting activities; and (ii) a post-season voting report outlining our views and approach on key trends observed, an overview of how we voted on shareholder proposals, and case studies on significant holdings and high profile names.

We also publish our quarterly vote record which includes voting rationale for decisions not aligned with the recommendations of the underlying company's management and for decisions on all shareholder proposed resolutions.

Newton's Governance Principles and Voting Guidelines describes our approach to the exercise of voting rights and are available on our website and on demand.

Newton's Governance Principles and Voting Guidelines document and procedures is also summarized in its Form ADV, which is filed with the SEC and furnished to clients upon request. Newton will provide clients with a copy of its policies noted above upon request, as well as information on how their proxies were voted by Newton.

Securities Lending

Newton does not engage in securities lending on behalf of its clients; this activity is at the discretion of individual clients. For certain funds that are managed by BNY, and where Newton is appointed as investment manager or sub-advisor, the fund boards have entered into securities-lending programs. The nature of our relationship has allowed us to agree to a recommended list of restricted securities for the purposes of lending. This list is updated on a quarterly basis.

Controls, Record Keeping and Auditing

Newton has established a Sustainability Committee that oversees all aspects relating to sustainability at Newton, including Newton's investments, direct impacts and engagement with communities and engagement with financial markets (advocacy) regarding sustainability issues. This includes Newton's approach to the exercise of voting rights.

Records are kept of all voting decisions, including evidence of the submission and approval process which are subject to external audit. In addition, the Corporate Actions team reports monthly on critical risk indicators in relation to voting matters. Further, Compliance Monitoring carry out reviews of Newton's proxy voting policies and procedures on a risk-based approach to confirm Newton's compliance with this policy.
