*Supplement to Summary Prospectus, Prospectus  
and Statement of Additional Information*

The Board of Trustees of BNY Mellon Stock Funds (the "Trust") has approved, subject to shareholder approval, an Agreement and Plan of Reorganization (the "Agreement") between the Trust, on behalf of BNY Mellon International Core Equity Fund (the "Fund"), and BNY Mellon Investment Funds I, on behalf of BNY Mellon International Equity Fund (the "Acquiring Fund"). The Agreement provides for the transfer of the Fund's assets to the Acquiring Fund in a tax-free exchange for Class A shares, Class C shares, Class I shares and Class Y shares of the Acquiring Fund having an aggregate net asset value equal to the value of the Fund's net assets and the assumption by the Acquiring Fund of the stated liabilities of the Fund, the distribution of the corresponding class of shares of the Acquiring Fund to Fund shareholders and the subsequent termination of the Fund (the "Reorganization").

It is currently contemplated that shareholders of the Fund as of September 23, 2025 (the "Record Date") will be asked to approve the Agreement on behalf of the Fund at a special meeting of shareholders to be held on or about December 9, 2025. If the Agreement is approved, the Reorganization will be consummated on or about February 13, 2026.

In anticipation of the Reorganization, effective on or about September 23, 2025 (the "Sales Discontinuance Date"), the Fund will be closed to any investments for new accounts, except that new accounts may be established by:

- Participants in group employer retirement plans (and their successor plans), provided that the plan sponsor has been approved by BNY Mellon Investment Adviser, Inc. and established the Fund as an investment option in the plan by the close of business on the Sales Discontinuance Date;
- Wrap programs that established the Fund as an investment option under the wrap program by the close of business on the Sales Discontinuance Date; and
- Certain funds in the BNY Mellon Family of Funds and series of BNY Mellon Funds Trust.

Shareholders of the Fund as of the Sales Discontinuance Date may continue to make additional purchases and to reinvest dividends and capital gains into their existing Fund accounts up until the time of the Reorganization.

A Prospectus/Proxy Statement with respect to the proposed Reorganization will be mailed prior to the meeting to the Fund's shareholders as of the Record Date. The Prospectus/Proxy Statement will describe the Acquiring Fund and other matters. Investors may obtain a free copy of the Prospectus of the Acquiring Fund by calling 1-800-373-9387.

On or after January 31, 2026, BNY Mellon Investment Adviser, Inc. may terminate this expense limitation agreement at any time.

## Example

The Example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense limitation agreement by BNY Mellon Investment Adviser, Inc. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A (with or without redemption at end of period)	\$684	\$994	\$1,326	\$2,262

Class Y (with or without redemption at end of period)	\$90	\$339	\$607	\$1,373

## Portfolio Turnover

The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 58.22% of the average value of its portfolio.

## Principal Investment Strategy

To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of companies that are located in the foreign countries represented in the Morgan Stanley Capital International Europe, Australasia and Far East (MSCI EAFE®) Index and Canada. The fund may invest up to 20% of its assets in securities of issuers located in emerging market countries.

The fund's sub-adviser, Newton Investment Management North America, LLC, an affiliate of BNY Mellon Investment Adviser, Inc., employs a bottom-up investment approach using proprietary quantitative models and traditional qualitative analysis to identify attractive stocks for the fund. The fund's sub-adviser seeks to allocate country weights generally in accordance with the MSCI EAFE Index, but deviations from the MSCI EAFE Index country weightings may occur. The sub-adviser uses the sector allocations of the MSCI EAFE Index as a guide, but allocations may differ from those of the MSCI EAFE Index. The fund's stock selection process is designed to produce a diversified portfolio that, relative to the MSCI EAFE Index, has a below-average price/earnings ratio and an above-average earnings growth trend.

The fund typically sells a company's stock when the fund's sub-adviser determines that the company appears less likely to benefit from the current market and economic environment, shows deteriorating fundamentals or declining momentum, or falls short of the sub-adviser's expectations.

## Principal Risks

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. It is not a complete investment program. The fund's share price fluctuates, sometimes dramatically, which means you could lose money.

- *Risks of stock investing:* Stocks generally fluctuate more in value than bonds and may decline significantly over short time periods. There is the chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising prices and falling prices. The market value of a stock may decline due to general market conditions or because of factors that affect the particular company or the company's industry.
- *Foreign investment risk:* To the extent the fund invests in foreign securities, the fund's performance will be influenced by political, social and economic factors affecting investments in foreign issuers. Special risks associated with investments in foreign issuers include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political and economic instability and differing auditing and legal standards.
- *Emerging market risk:* The securities of issuers located or doing substantial business in emerging market countries tend to be more volatile and less liquid than the securities of issuers located in countries with more mature economies. Emerging markets generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Investments in these countries may be subject to political, economic, legal, market and currency risks. Special risks associated with investments in emerging market issuers may include a lack of publicly available information, a lack of uniform

disclosure, accounting and financial reporting and recordkeeping standards and limited investor protections applicable in developed economies. The risks also may include unpredictable political and economic policies, the imposition of capital controls and/or foreign investment limitations by a country, nationalization of businesses and the imposition of sanctions or restrictions on certain investments by other countries, such as the United States.

- **Foreign currency risk:** Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Foreign currencies, particularly the currencies of emerging market countries, are also subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government intervention and controls.
- **Liquidity risk:** When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities in a timely manner at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments that are illiquid or that trade in lower volumes may be more difficult to value. Investments in foreign securities, particularly those of issuers located in emerging markets, tend to have greater exposure to liquidity risk than domestic securities.
- **Market risk:** The value of the securities in which the fund invests may be affected by political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed-income markets may negatively affect many issuers, which could adversely affect the fund. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies world-wide.
- **Management risk:** The investment process used by the fund's sub-adviser could fail to achieve the fund's investment goal and cause your fund investment to lose value.

## Performance

The following bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the performance of the fund's Class A shares from year to year. Sales charges, if any, are not reflected in the bar chart, and if those charges were included, returns would have been less than those shown. The table compares the average annual total returns of the fund's shares to those of a broad measure of market performance. The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future. Performance for each share class will vary due to differences in expenses. More recent performance information may be available at [www.bny.com/investments](http://www.bny.com/investments).

### Year-by-Year Total Returns as of 12/31 each year (%)

Class A

During the periods shown in the chart:

**Best Quarter**  
2022, Q4: 19.82  
**Worst Quarter**  
2020, Q1: (23.97)

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through U.S. tax-deferred arrangements such as 401(k) plans or individual retirement accounts. Returns after taxes on distributions and sale of fund shares may be higher than returns before taxes or returns after taxes on distributions due to an assumed tax benefit from losses on a sale of the fund's shares at the end of the period.

For the fund's Class Y shares, periods prior to the inception date reflect the performance of the fund's Class I shares. Such performance figures have not been adjusted to reflect applicable class expenses of Class Y shares. Each share class is invested in the same portfolio of securities, and the annual returns would have differed only to the extent that the classes have different expenses.

The fund's distributions are taxable as ordinary income or capital gains, except when your investment is through an IRA, Retirement Plan or other U.S. tax-advantaged investment plan (in which case you may be taxed upon withdrawal of your investment from such account).

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares through a broker-dealer or other financial intermediary (such as a bank), the fund's distributor and its related companies may pay the intermediary for the sale of fund shares and related services. To the extent that the intermediary may receive lesser or no payments in connection with the sale of other investments, the payments from the fund's distributor and its related companies may create a potential conflict of interest by influencing the broker-dealer or other intermediary and your financial representative to recommend the fund over the other investments. This potential conflict of interest may be addressed by policies, procedures or practices adopted by the financial intermediary. As there may be many different policies, procedures or practices adopted by different intermediaries to address the manner in which compensation is earned through the sale of investments or the provision of related services, the compensation rates and other payment arrangements that may apply to a financial intermediary and its representatives may vary by intermediary. Ask your financial representative or visit your financial intermediary's website for more information.
