The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Data assumes the reinvestment of dividends and capital gains, if any. Performance for periods less than 1 year is not annualized. Go to bny.com/investments for the fund's most recent month-end returns. Gross Expense is the total annual operating expense ratio for the fund, before any fee waivers or expense reimbursements. Net Expense is the total annual operating expense ratio for the fund, after any applicable fee waivers or expense reimbursements. The Net Expense is the actual fund expense ratio applicable to investors. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

FDIC is Federal Deposit Insurance Corp. NAV is Net Asset Value. YTD is Year to Date.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. Read the prospectus carefully before investing.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries.

Source: Morningstar. The Morningstar Rating™ for funds, or “star rating,” is calculated for managed products with at least a 3-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance (not including the effects of sales charges, loads and redemption fees if applicable), placing more emphasis on downward variations and rewarding consistent performance. Managed products, including open-end mutual funds, closed-end funds and exchange-traded funds, are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. © 2025 Morningstar, Inc. Ratings do not reduce investment risk and are subject to change. * Morningstar Percentile Rankings is a standardized way of ranking items within a peer group, in this case funds within the same Morningstar Category. The observations with the largest numerical value is ranked one; the observation with the smallest numerical value is ranked 100. The remaining observations are placed equal distance from one another on the rating scale.

** Source: FactSet. MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. An investor cannot invest directly in any index. Upside capture ratio measures a strategy’s performance in up markets relative to an index. A value over 100 indicates that an investment has outperformed the benchmark during periods of positive returns for the benchmark. Downside capture ratio measures a strategy’s performance in down markets relative to the index. A value of less than 100 indicates that an investment has lost less than its benchmark during periods of negative returns for the benchmark.
