

BNY Mellon Sustainable Balanced Fund

FACT SHEET
June 30, 2022

Class K DRAKX

Goal/Approach

The fund seeks long-term capital appreciation. To pursue its goal, the fund uses a global multi-asset strategy that focuses on long-term capital appreciation. The fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the equity securities of issuers that demonstrate attractive investment attributes and sustainable business practices and have no material unresolvable environmental, social and governance (ESG) issues and in debt securities included in the Bloomberg MSCI U.S. Aggregate ESG Select Sector Neutral Index. The fund's investments are allocated among equity and equity-related securities and debt and debt-related securities. Under normal market conditions, generally 60% of the fund's net assets will be allocated to equity and equity-related investments and 40% of the fund's net assets will be allocated to debt and debt-related securities.

Founded on 40 years of experience, Mellon is a global leader in index management dedicated to precision and client partnership.

Investment Adviser
BNY Mellon Investment Adviser, Inc.

Part of the fund's recent performance is attributable to positive returns from its initial public offering (IPO) investments. There can be no guarantee that IPOs will have or continue to have a positive effect on fund performance. Currently, the fund is relatively small in asset size. IPOs tend to have a reduced effect on performance as a fund's asset base grows.

Effective April 1, 2019, Dreyfus Global Multi-Asset Income Fund was renamed BNY Mellon Sustainable Balanced Fund. The fund's Class Y shares and Class A shares were renamed Class K shares and Service Class shares, respectively, effective April 1, 2019. As of March 31, 2019, Class K shares are not available for purchase by individual investors. Class K shares are generally only offered to state-sponsored and/or state-administered retirement savings plans. Investors should discuss with their financial professional the eligibility requirements for Class K and Service Class shares and the historical results achieved by the fund's respective share classes.

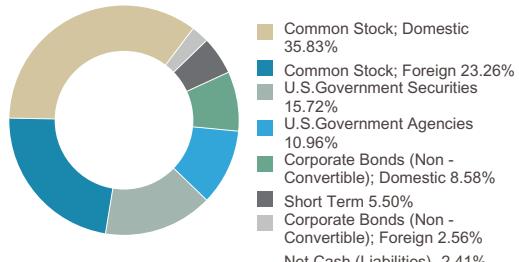

¹Portfolio composition is as of 6/30/2022 and is subject to change at any time. ²Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ³Source: FactSet. The **Customized Blended Index** is composed of 60% MSCI All Country World Index (NDR) and 40% Bloomberg MSCI US Aggregate ESG-Weighted Select Sector Neutral Index. The MSCI All Country World Index captures large and mid-cap representation across Developed Market (DM) countries and Emerging Market (EM) countries. The Bloomberg MSCI U.S. Aggregate ESG-Weighted Select Sector Neutral Index identifies fixed-income securities that satisfy certain ESG and liquidity criteria from the Bloomberg US Aggregate Bond Index (which is designed to broadly capture the U.S. investment grade, taxable fixed income market). With respect to corporate debt securities, the Bloomberg MSCI U.S. Aggregate ESG-Weighted Select Sector Neutral Index uses MSCI ESG rankings to measure ESG performance on an industry-specific basis, with ESG assessment categories and materiality varying by industry. Index rules generally exclude companies with significant activities in certain businesses, such as those involving alcohol, tobacco, nuclear power, gambling, and civilian firearms and other weapons. Risks: **Bonds** are subject generally to interest-rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. **Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. **Currencies** are subject to the risk that those currencies will decline in value relative to a local currency, or, in the case of hedged positions, that the local currency will decline relative to the currency being hedged. Each of these risks could increase the fund's volatility. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Impact investing and/or **Environmental, Social and Governance (ESG)** managers may take into consideration factors beyond traditional financial information to select securities, which could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. Further, ESG strategies may rely on certain values based criteria to eliminate exposures found in similar strategies or broad market benchmarks, which could also result in relative investment performance deviating. **Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.**
