Macro Investment Outlook

View based on short-term outlook

<p>GROWTH</p> <p>View: ● Delta: ▲</p> <p>Our base case for 2026 is 'Recovery' which sees a rebound in Q1 driven by the end of the US government shutdown, increased fiscal support, and further monetary stimulus. Base case for Eurozone is a cyclical pickup in growth 2026. Base case for China sees growth slow toward 4%.</p>	<p>INFLATION</p> <p>View: ● Delta: ■ ■ ■</p> <p>We expect US inflation over the medium-term to be above target, reflecting the increase in tariffs on US good prices. We expect at target inflation in the Eurozone, slightly above market pricing, and continued deflation in China.</p>	<p>POLICY</p> <p>View: ● Delta: ■ ■ ■</p> <p>We expect the Fed to lower rates to 3% by end of 2026, broadly in line with market expectations. We expect the European Central Bank (ECB) to hold in the near-term given domestic inflationary pressures. We expect to see two more cuts from the Bank of England (BoE). We expect Bank of Japan (BOJ) to continue reducing policy accommodation in 2026 and China to ease further to complement fiscal stimulus.</p>	<p>VALUATION</p> <p>View: ● Delta: ■ ■ ■</p> <p>US equity valuations remain stretched by historical levels, suggesting vulnerability should investors reprice the growth and policy outlook, but earnings and margins remain robust. Global ex US valuations have increased on the back of improving market breath.</p>
<p>EARNINGS</p> <p>View: ● Delta: ■ ■ ■</p> <p>2025 earnings have been robust. Cyclical sectors have started to show improvement in margins, and we expect earnings to be supportive in 2026.</p>	<p>SENTIMENT</p> <p>View: ● Delta: ■ ■ ■</p> <p>US equity implied volatility hovered near the lower quartile. Put/call ratios eased and US consumer discretionary modestly outperformed staples. Global cyclicals ex tech gained relative to global defensives. Rates implied volatility remained stable.</p>	<p>MOMENTUM</p> <p>View: ● Delta: ■ ■ ■</p> <p>Japan stocks, gold, and UK stocks showed strong positive momentum. Japan bonds, JPYUSD cross, and oil showed strong negative momentum. Credit was relatively flat in signal strength.</p>

THEMES

02

Complementing Equity with Infrastructure

Our base case for 2026 sees growth above trend and consensus and expect inflation to remain above target (see Vantage Point for details). An environment of stronger growth and modest price pressures should be conducive for risk assets. Notably, 2025 provided a textbook case study on the importance of diversification. We maintain our favorable view on infrastructure for equity exposure but greater stability, income benefits, and diversification.

Growth vs Value During Inflation Regimes

The effective tariff rate remains below that of the announced tariff rate. We think, as the effective rate closes in on the announced rate, there is scope for further goods price pressure.

Firm Behavior Amidst Uncertainty

Non-tech equipment spending remains largely flat compared to pre-COVID. But abating uncertainty, resilient cash flows, and incentives from the OBBBA could see higher CAPEX towards domestic equipment investment. A rotation towards CAPEX will likely reduce the pace of buybacks but continues to underscore the resiliency of U.S. equities.

Resilient Financials Earnings

The recent developments in the credit space have sparked questions regarding the broader corporate sector. While challenging to say with certainty given the lack of transparency, our view is that a credit bust is odds against. First, at the aggregate level, the US corporate sector has de-levered since the global financial crisis (GFC). Second, non-bank loans to the domestic sector have been trending downwards since the pandemic. Third, total loans to the domestic sector are currently at a 25-year low. Notably, financial services and banks have been growing earnings faster than the broader market but remains cheaper (lower right quadrant on the chart).

Pockets of Opportunities in Emerging Markets

Most major EMs gained from export front-loading to the U.S. ahead of tariff deadlines. The payback has been softer than feared even as the U.S. economy has begun slowing. We think this reflects the continuing demand for semiconductors, electronics components, data centers, rare earths and precious metals, rising digitalization and cross-border services trade. Additionally, EMs are speeding up free trade agreements with the E.U., U.K. and with each other, tempering the adverse impact from U.S. tariffs alongside lower than feared reciprocal rates and exemptions. Over time, a re-balancing of trade toward non-U.S. locales and rising incomes at key EMs bode well.

Projections are speculative in nature and some or all of the assumptions underlying the projections may not materialize or vary significantly from the actual results.

Falling Cash Rates

Fed loosening will lower cash rates. Higher yields make a better entry point into the belly of the curve where correlation with changes in Fed policy rate expectations is highest. We think fiscal concerns and recovery in growth put upward pressure on 10-year yields. Intermediate duration is relatively attractive.

Hypothetical Change in Yield Over 12 Months & Performance

Projections are speculative in nature and some or all of the assumptions underlying the projections may not materialize or vary significantly from the actual results.

Capturing Differences in Interest Rates

After a decade of yield scarcity, government bond yields have moved higher across the board. Moreover, USD hedged exposure boosts income and, potentially, even total return by exploiting relatively higher short-term US interest rates (even after expected Fed cuts). Historically, it also helped lower the dispersion of the strong positive relationship of elevated yields with ex-ante performance. We continue to favor (USD-hedged) yields over spreads.

Global Sovereigns Hedged & Unhedged

Data as of December 31, 2025

Starting Yield and Subsequent 10-year Return (since 1990)

Data as of December 31, 2025

Projections are speculative in nature and some or all of the assumptions underlying the projections may not materialize or vary significantly from the actual results.

Case for Active Duration

Uncertainty has slowly abated, albeit remains elevated. We expect differentiated global economic performance from targeted U.S. trade policies and geopolitics, effectively, leading to differentiated monetary policy cycles and, ultimately, higher dispersion in fixed income returns across geographies. These different pieces of the puzzle - growth, inflation, and policy, and its asynchrony globally - may result in a macro environment particularly conducive to active management.

Emerging Market Local Debt

High EM real rates amidst easing inflation and stable-to-weaker trend in USD are driving EM monetary easing. We expect continuing price gains through FX as well as duration channels. Relatively low FX carry is a risk but is offset by reasonable macro fundamentals and policy management.

Potential Hedge for Inflation and Macro Volatility

Historically, gold has demonstrated notable multi-year price increases during periods marked by financial shock/uncertainty, supply shock/disruptions, and inflation persistence. In contrast, during more stable times characterised by peace, globalization, and steady U.S. inflation, gold prices have generally declined or remained stable over extended durations. Given current global geopolitical dynamics, we view gold favourably for its potential as a hedge against macroeconomic volatility and inflation.

Well Diversified Approach

Policy uncertainty remains elevated, but global stimulus is a significant offset. Risks of deterioration in the near-term macro data persist from the lagged effects of the tariff shock but 2026 is optimistic from monetary and fiscal loosening. The AI theme is expected to continue, but with more scrutiny from investors. Cyclical considerations and concentration risks may introduce volatility, which warrants a well-diversified approach across geographies.

Digital Allocations

Paul Atkins, former co-chair of Token Alliance, was appointed chair of the SEC, marking a major shift toward favorable regulation for digital assets and fueling another surge in Bitcoin's price. While digital assets have offered strong returns, they remain highly risky—about five times as volatile as equities—due to regulatory uncertainty, extreme price swings, and emerging cybersecurity threats like quantum computing.

ASSET CLASS VIEWS

03

Summary

ASSET	VIEW	DELTA	COMMENTARY
Global Equity			The global economy is showing resilience and stimulus is picking up, but downside risks to growth persist in the near-term. Despite this, recession risks are odds against, the US has also entered a new phase of policy easing, and previous rate cuts in other regions are expected to keep supporting the ongoing economic cycle.
Gov. Bonds			As growth recovers, yields should see upward pressure. We remain underweight US Treasuries vs international sovereign bonds, due to worsening fiscal fundamentals and ongoing US inflation risks. Elevated yields do entrench favorable income returns.
Credit			Spreads remain compressed. There is less upside in credit from the AI theme. Trade volatility and economic uncertainty may weigh on consumption and overall growth. We expect a rotation toward cheaper, safer fixed income assets. We prefer higher quality credits over HY, European credits over US. We favor active credit selection to manage spread risk.
Real Assets			Maintain favorable view on real asset diversifiers, such as precious metals, given macro volatility and inflation hedging potential. We have a favorable view on real return strategies, infrastructure, and natural resources.
Cash			We see merit in putting cash to work as policy loosening will lower cash rates. Higher yields make a better entry point into the belly of the curve. Intermediate duration is relatively attractive. We view absolute return strategies capable of exploiting monetary and fiscal divergence.

The AI theme is expected to continue, but with more scrutiny from investors. Cyclical considerations and concentration risks may introduce volatility, which warrants a well diversified approach across geographies.
US Equity	<div></div>	<div><div></div></div>	Labor market weakness and abating but still elevated policy uncertainty could see markets remaining sensitive to the macro data in the near-term. Disagreement at the Fed on the future path for policy rates may also lead to greater US equity volatility. Expectations for AI led productivity gains, and significant AI-related capex, limit deep downside risks in the near term. Further policy loosening and a cyclical recovery should be a supportive backdrop for small caps.
UK Equity	<div></div>	<div><div></div><div></div><div></div></div>	UK equities are attractive for income-seeking investors given elevated yields. We see income-equities as a hedge against structurally higher inflationary risks in the global economy.
Europe ex UK Equity	<div></div>	<div><div></div><div></div><div></div></div>	We see the ECB as remaining on hold as growth picks up in 2026 and inflation remains around target. We expect the lagged effects of policy loosening and greater fiscal stimulus as supporting the cycle. De-escalation of the Ukraine-Russia war could be a catalyst for performance in 2026. In relative terms, we think selected European indices (e.g., Spain, Italy) or Styles (Value, Income) can keep outperforming. Small caps trading at relative discounts to large caps are becoming attractive. However, the broader European market may lag as global trade and industrial production suffers from US trade policy.

ASSET	VIEW	DELTA	COMMENTARY
Japan Equity	<div></div>	<div><div></div><div></div><div></div></div>	Consumption and household incomes to be boosted in 2026 by easing inflation (towards the Bank of Japan's 2% target) and rising wages. Nominal growth to remain higher than 3% y/y. The JPY should stabilize on BOJ normalization (& Fed rate cuts) but the real exchange rate should stay competitive and sustain a modest expansion of foreign receipts and income.
EM Equity	<div></div>	<div><div></div><div></div><div></div></div>	Emerging markets to be boosted by a stable-to-weaker USD, local rate cuts and stable-to-improving activity at G3 economies and China. The AI-related capex pickup is generating new opportunities and providing an important offset against lingering drags from US tariffs. EM equities are cheap and will gain from long-term supply chain rotation.
China Equity	<div></div>	<div><div></div><div></div><div></div></div>	The trade truce with the US to limit external shocks. But further Sino-US de-coupling to persist (albeit, more gradually). The tech sector is a bright spot, and property is on a better footing. Further stimulus to re-balance the economy and curb deflation is needed and should be forthcoming.
EM ex China Equity	<div></div>	<div><div></div><div></div><div></div></div>	Electronics oriented EMs should continue reaping gains from strong AI-driven semiconductor orderbooks. Commodity intensive EMs to benefit from rising data-center related metals and minerals demand. China stabilization to also help. Relative advantages versus China (such as lower tariffs) likely to provide a leg-up, valuations are fair-to-attractive. Country-and-sector correlations are lower.

Fixed Income

ASSET	VIEW	DELTA	COMMENTARY
US Treasuries	Orange circle	Three orange squares	We see lingering risks to growth in the near-term but also inflation pressures that the Fed will likely look through. Large deficits remain a risk, but attractive yields and correspondingly favorable income returns keep us engaged. We are cautious on the prospect of limited duration gains and elevated volatility. We prefer Treasury inflation-protected securities (TIPS) to nominal US Treasuries.
Intl. Sovereign Debt	Teal circle	Teal triangle	FX hedged income returns in selected DM countries remain attractive in absolute terms and versus US Treasuries (we retain an overweight to UK Gilts and neutral view on German Bunds and JGBs). A weakening US dollar makes the asset class attractive on a non-FX hedged basis as well. Market is pricing in rate hikes for several DM central banks, but we see these expectations as premature. We see greater risks of interest rates repricing higher in the US vs rest of developed economies.
UK Gilts	Teal circle	Three teal squares	Attractive income returns. Hit to global demand due to the tariff slowdown should be disinflationary over the next 12 months. Softening labor market should exert downward pressure on wage growth.
German Bunds	Grey circle	Three grey squares	Lower income returns offered than several comparable government bonds, but if FX hedged the opposite is true. Economic backdrop remains weak and a slowdown in growth is expected in the second half of 2025. Fiscal news to support better growth prospects for 2026.
Japanese Government Bonds (JGBs)	Grey circle	Three grey squares	Relatively lower income returns and normalizing BoJ policy. But long-term yields are attractive, and FX hedges raise vol-adjusted return potential. Fiscal accounts have improved on a trend basis but could face modest pressure on new government's pro-growth policies.

ASSET	VIEW	DELTA	COMMENTARY
Inflation Protected	Grey circle	Three grey squares	Real rates expectations have normalized from overly optimistic (i.e., negative real rates) expectations. We expect above target inflation over the next 12 months, which is in line to slightly above market expectations.
Global IG	Orange circle	Three orange squares	Our outlook is constructive on credit, but spreads are rich and there is a limit in how much narrower they can get. Yield remains attractive, but we prefer using credit as a funding source. Whilst IG may hold up better than HY, risk-adjusted and relative-returns are not compelling.
High Yield	Orange circle	Three orange squares	Spreads are rich and we stay underweight. Amid heightened trade and financial volatility, weakening energy and industrial commodity prices and reactive Fed policy easing, we see the likelihood of spreads re-widening on HY corporates' stalling margins and re-financing pressures. Relative preference, within the space, is for short duration positioning for credit visibility and carry.
EM Debt - Local	Teal circle	Three teal squares	Even after recent local rate cuts, EM real rates are still high. A stable to weaker trend in the USD should present additional price gains through FX as well as duration channels. Relatively low FX carry is a risk but is offset, for now, by reasonable macro fundamentals, financial flexibility, and policy management at most major EMs.
EM Debt - USD	Grey circle	Three grey squares	Valuations are less expensive in comparison with global IG and HY credits. Our neutral view balances decent policy buffers, flexible currencies and a softer tone in the US dollar against the odds of a near-term softening in global trade flows in early 2026.

EM Sovereigns USD: The Bloomberg EM USD Aggregate: Sovereign Index is a subset of the Emerging Markets USD Aggregate Bond Index, only including securities classified as treasuries or sovereigns.

Emerging Markets Dividends: The Dow Jones Emerging Markets Select Dividend Index aims to measure the stock performance of 100 leading dividend-paying emerging-market companies, selected by dividend yield subject to screening and buffering criteria.

Euro Agg: The Bloomberg EuroAgg Index is a benchmark that measures the investment grade, euro-denominated, fixed-rate bond market, including treasuries, government-related, corporate and securitized issues. Inclusion is based on currency denomination of a bond and not country of risk of the issuer.

Euro High Yield: The Bloomberg Pan-European High Yield Index measures the market of non-investment grade, fixed-rate

corporate bonds denominated in the following currencies: euro, pounds sterling, Danish krone, Norwegian krone, Swedish krona, and Swiss franc.

FTSE 100: The FTSE 100 Index is a capitalization-weighted index of the 100 most highly capitalized companies traded on the London Stock Exchange.

FTSE NAREIT All Equity REITs: FTSE NAREIT All Equity REITS Total Return Index is a free float adjusted market capitalization weighted index that includes all tax qualified REITs listed in the NYSE, AMEX, and NASDAQ National Market.

Global Aggregate: The Bloomberg Global Aggregate Total Return (USD hedged) Index is a broad-based measure of the global investment-grade fixed income market.

Global High Yield: The Bloomberg Global High Yield Index is a broad-based measure of the global high yield market.

Global Infrastructure: The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability.

Global Investment Grade - Corporates: This Index reflects the corporate component of the Bloomberg Global Aggregate Index which is designed to provide a broad-based measure of the global investment-grade FIXED INCOME markets.

Global REITs: The FTSE EPRA Nareit Global REITs index is a subset of the FTSE EPRA Nareit Global Index, comprising of only the REITs constituents.

Global Treasury ex US: The Bloomberg Global Treasury ex US index tracks fixed-rate local currency government debt of investment grade countries excluding the US and represents the Treasury sector of the Global Aggregate Index.

Gold (USD / Troy Ounce): Gold London Bullion Market spot price, quoted in USD per Troy Ounce

Hedge Funds: The HFRX Global Hedge Fund Index is designed to be representative of the overall composition of the hedge fund universe.

International Select Dividends: The Dow Jones EPAC Select Dividend Index aims to represent the performance of high dividend-paying companies in the EPAC (Europe, Pacific, Asia and Canada) region, which covers developed markets excluding the U.S.

JPM EMBI Global Diversified: The J.P. Morgan EMBI Global Diversified Index tracks liquid, US Dollar emerging market fixed and floating-rate debt instruments issued by sovereign and quasi-sovereign entities¹

MSCI AC Asia ex Japan: The MSCI AC Asia ex Japan Index captures large and mid cap representation across 2 of 3 Developed Markets (DM) countries (excluding Japan) and 8 Emerging Markets (EM) countries in Asia.

MSCI All-Country World: The MSCI All-Country World is an index that tracks the performance of both Developed and Emerging Market equities.

MSCI Australia: The MSCI Australia Index is designed to measure the performance of the large and mid cap segments of the Australia market.

MSCI Brazil: The MSCI Brazil Index is designed to measure the performance of the large and mid cap segments of the Brazilian market.

MSCI Canada: The MSCI Canada Index is designed to measure the performance of the large and mid cap segments of the Canada market.

MSCI China: The MSCI China Index captures large and mid cap representation across China A shares, H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs).

REPRESENTATIVE INDICES

MSCI EAFE: The MSCI EAFE Index is an index that tracks the performance of Developed Market equities across Europe, Australasia and the Far East excluding the US and Canada.

MSCI EM: The MSCI EM index tracks the performance of Emerging Market Equities.

MSCI EMU (Euro Area): The MSCI EMU Index (European Economic and Monetary Union) captures large and mid cap representation across the 10 Developed Markets countries in the EMU.

MSCI Europe: The MSCI Europe Index captures large and mid cap representation across 15 Developed Markets (DM) countries in Europe. With 414 constituents, the index covers approximately 85% of the free float-adjusted market capitalization across the European Developed Markets equity universe.

MSCI France: The MSCI France Index is designed to measure the performance of the large and mid cap segments of the French market.

MSCI Germany: The MSCI Germany Index is designed to measure the performance of the large and mid cap segments of the German market.

MSCI Greece: The MSCI Greece Index is designed to measure the performance of the large and mid cap segments of the Greek market.

MSCI Growth: Index is designed to reflect the performance of securities exhibiting overall growth characteristics.

MSCI High Dividend Yield: Index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent.

MSCI India: The MSCI India Index is designed to measure the performance of the large and mid cap segments of the Indian market.

MSCI Indonesia: The MSCI Indonesia Index is designed to measure the performance of the large and mid cap segments of the Indonesian market.

MSCI Japan: The MSCI Japan Index is designed to measure the performance of the large and mid cap segments of the Japanese market.

MSCI Large Cap: Index is designed to reflect the performance of the large cap segment of the respective market.

MSCI Mexico: The MSCI Mexico Index is designed to measure the performance of the large and mid cap segments of the Mexican market.

MSCI Min. Volatility: Index is designed to reflect the performance of a minimum variance strategy.

MSCI Momentum: Index is designed to reflect the performance of an equity momentum strategy by emphasizing stocks with high price momentum.

MSCI Poland: The MSCI Poland Index is designed to measure the performance of the large and mid cap segments of the Polish market.

MSCI Quality: Index is designed to reflect the performance of quality growth stocks by identifying stocks with high quality scores based on three fundamental variables: high return on equity, stable y/y earnings growth, and low financial leverage.

MSCI Small Cap: Index is designed to reflect the performance of the small cap segment of the respective market.

MSCI South Africa: The MSCI South Africa Index is designed to measure the performance of the large and mid cap segments of

the South African market.

MSCI South Korea: The MSCI Korea Index is designed to measure the performance of the large and mid cap segments of the South Korean market.

MSCI Spain: The MSCI Spain Index is designed to measure the performance of the large and mid cap segments of the Spanish market.

MSCI Switzerland: The MSCI Switzerland Index is designed to measure the performance of the large and mid cap segments of the Swiss market.

MSCI Taiwan: The MSCI Taiwan Index is designed to measure the performance of the large and mid cap segments of the Taiwan market.

MSCI Turkey: The MSCI Turkey Index is designed to measure the performance of the large and mid cap segments of the Turkish market.

MSCI UK: The MSCI United Kingdom Index is designed to measure the performance of the large and mid cap segments of the UK market.

MSCI US: Index is designed to measure the performance of the large and mid- cap segments of the US market.

MSCI Value: Index is designed to reflect the performance of securities exhibiting overall value style characteristics.

MSCI World - DM: The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. With 1,395 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI World Growth: The MSCI World Growth Index captures large and mid cap securities exhibiting overall growth style characteristics across 23 Developed Markets (DM) countries. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

MSCI World Value: The MSCI World Value Index captures large and mid cap securities exhibiting overall value style characteristics across 23 Developed Markets (DM) countries. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

Nasdaq: The Nasdaq Composite Index is the market capitalization weighted index of approximately 3,000 common equities listed on the Nasdaq stock exchange.

Oil (WTI, USD / Barrel): Generic West Texas Intermediate crude oil spot price

Preferred Stock: The iShares Preferred and Income Securities ETF seeks to track the investment results of ICE Exchange-Listed Preferred & Hybrid Securities Index

Russell 1000: The Russell 1000® Index measures the performance of the large-cap segment of the US equity universe.

Russell 2000: The Russell 2000 Index is a small-cap stock market index of the bottom 2,000 stocks in the Russell 3000 Index.

Russell 3000: The Russell 3000® Index measures the performance of the largest 3,000 US companies designed to represent approximately 98% of the investable US equity market.

Sterling Agg: The Bloomberg Sterling Aggregate Bond Index measures the investment grade, sterling-denominated, fixed-rate bond market, including treasuries, government-related, corporate and securitized issues. Inclusion is based on the currency denomination of a bond, not country of risk of the issuer.

REPRESENTATIVE INDICES

S&P 500: The S&P 500 is an index designed to track the performance of the largest 500 US companies.

S&P 500 Communication Services: The index measures the performance of all those companies held in the S&P 500 index that are classified as a telecom services(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes telecommunication services and media and entertainment.

S&P 500 Consumer Discretionary: The index measures the performance of all those companies held in the S&P 500 index that are classified as a consumer discretionary(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes automobiles and components; consumer durables and apparel; consumer services; and consumer discretionary distribution and retail.

S&P 500 Consumer Staples: The index measures the performance of all those companies held in the S&P 500 index that are classified as a consumer staples(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes consumers staples distribution and retail; food, beverage and tobacco; and household and personal products.

S&P 500 Energy: The index measures the performance of all those companies held in the S&P 500 index that are classified as a energy(sector) company using the Global Industry Classification Standard(GICS) system.

S&P 500 Financials: The index measures the performance of all those companies held in the S&P 500 index that are classified as a financials(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes banks; financial services; and insurance.

S&P 500 Healthcare: The index measures the performance of all those companies held in the S&P 500 index that are classified as a health care(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes healthcare equipment and services; pharmaceuticals, biotechnology and life sciences.

S&P 500 Industrials: The index measures the performance of all those companies held in the S&P 500 index that are classified as a industrials(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes capital goods; commercial and professional services; and transportation.

S&P 500 Materials: The index measures the performance of all those companies held in the S&P 500 index that are classified as a materials(sector) company using the Global Industry Classification Standard(GICS) system.

S&P 500 Real Estate: The S&P 500® Real Estate comprises those companies included in the S&P 500 that are classified as members of the GICS® Real Estate sector. Industry group includes equity real estate investment trusts and real estate management and development.

S&P 500 Technology: The index measures the performance of all those companies held in the S&P 500 index that are classified as a information technology(sector) company using the Global Industry Classification Standard(GICS) system. Industry group includes software and services; technology hardware and equipment; and semiconductors and semiconductor equipment.

S&P 500 Utilities: The index measures the performance of all those companies held in the S&P 500 index that are classified as a utilities(sector) company using the Global Industry Classification Standard(GICS) system.

S&P 400 Midcap: Standard and Poor's Midcap 400 Index is a capitalization-weighted index which measures the performance of the mid-range sector of the U.S. stock market.

S&P 500 VIX: The VIX Index is a financial benchmark designed to be an up-to-the-minute market estimate of the expected volatility of the S&P 500® Index, and is calculated by using the midpoint of real-time S&P 500 Index (SPX) option bid/ask quotes.

US 30Y Fixed-Rate Mortgage: Bankrate.com 30-year US home mortgage fixed rate national average

US Agencies: Bloomberg US Agencies Total Return Unhedged USD measures US dollar-denominated, agency debt.

US Aggregate: Bloomberg US Agg Total Return Value Unhedged USD Index is a widely accepted, unmanaged total return index of corporate, government and government-agency debt instruments, mortgage-backed securities and asset-backed securities with an average maturity of 1-10 years.

US Corporates: Bloomberg US Corporate Total Return Value Unhedged USD Index tracks the investment grade, fixed-rate, taxable corporate bond market

US CMBS: The Bloomberg US CMBS Investment Grade Index measures the investment-grade market of US Agency and US Non-Agency conduit and fusion CMBS deals with a minimum current deal size of \$300mn. The index includes both US Aggregate eligible (ERISA eligible) and non-US Aggregate eligible (non-ERISA eligible) securities.

US Credit: The Bloomberg US Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable corporate and government related bond markets. It is composed of the US Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities.

US High Yield: Bloomberg US Corporate High Yield Total Return Index Value Unhedged USD Index tracks the performance of US dollar denominated below investment grade rated corporate debt publicly issued in the US domestic market.

US Leveraged Loans: The Morningstar LSTA US Leveraged Loan Index is a market-value weighted index designed to measure the performance of the US leveraged loan market.

US Long Credit: The Bloomberg US Long Credit Index measures the performance of investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related debt with at least ten years to maturity. It is composed of a corporate and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities.

US MBS: The Bloomberg US Mortgage Backed Securities (MBS) Index tracks fixed-rate agency mortgage backed pass-through securities guaranteed by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

US Munis: Bloomberg Municipal Bond Index Total Return Index Value Unhedged USD Index tracks the municipal FIXED INCOME market in the United States.

US Securitized: Bloomberg U.S. Securitized: MBS/ABS/CMBS and Covered TR Index Value measures US securitized debt including MBS, ABS, and CMBS.

US TIPS: The Bloomberg US Treasury Inflation-Protected Securities Total Return Index tracks the performance of publicly issued, US Treasury inflation-protected securities that have at least one year remaining to maturity and have \$250 million or more of outstanding face value.

US Treasury: The Bloomberg US Treasury Index is the US Treasury component of the US Aggregate Index and uses public obligations of the US Treasury with a remaining maturity of one year or more.

US Treasury Bills: The Bloomberg US Treasury Bill 3-6 Months Index tracks the market for treasury bills with 3 to 5.9 months to maturity issued by the US government. US Treasury bills are issued in fixed maturity terms of 4-, 13-, 26- and 52-weeks.

US Treasury Intermediate: The Bloomberg US Treasury Intermediate Index measures US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury with maturities of 1 to 9.9 years to maturity.

US Treasury Long: The Bloomberg US Treasury: Long Index measures US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury with 10 years or more to maturity.

USD: The US Majors Dollar Index (also referred to as 'DXY') tracks the performance of the USD versus a basket of foreign currencies including the euro, Japanese yen, Pound sterling, Canadian dollar, Swedish krona, and Swiss franc.

DISCLOSURES & DISCLAIMERS

Disclosures & Disclaimers

This presentation is for the exclusive use of the recipient and should not be further distributed without the permission of BNY.

This material should not be considered as investment advice or a recommendation of any investment manager or account arrangement and should not serve as a primary basis for investment decisions. Neither the information nor any opinions expressed herein should be construed as a solicitation or a recommendation by BNY and its affiliates to buy, hold or sell any securities or investments or hire any specific manager. Any statements and opinions expressed are those of the author as at the date of publication, are subject to change as economic and market conditions dictate, and do not necessarily represent the views of BNY Advisors.

The information has been provided as a general market commentary only and does not constitute legal, tax, accounting, other professional counsel or investment advice, is not predictive of future performance, and should not be construed as an offer to sell or a solicitation to buy any security or make an offer where otherwise unlawful.

The information has been provided without taking into account the investment objective, financial situation or needs of any particular person. BNY is not responsible for any subsequent investment advice given based on the information supplied. This is not investment research or a research recommendation for regulatory purposes as it does not constitute substantive research or analysis.

This information may contain projections or other forward-looking statements regarding future events, targets or expectations, and is only current as of the date indicated. Accordingly, such statements are inherently speculative as they are based on assumptions that may involve known and unknown risks and uncertainties. There is no assurance that such events or expectations will be achieved, and actual results, performance, or events may be significantly different from that shown, expressed or implied here. The information is based on current market conditions, which will fluctuate and may be superseded by subsequent market events or for other reasons and BNY's view as of the time of the information and statements. References to specific securities, asset classes and financial markets are for illustrative purposes only and are not intended to be and should not be interpreted as recommendations.

Charts are provided for illustrative purposes and are not indicative of the past or future performance of any product.

Past performance is no guarantee of future results. Diversification and strategic asset allocation do not guarantee a profit nor protect against a loss in declining markets. All investments and investment strategies are subject to risk, including the loss of principal.

Certain investments have specific or unique risks that should be considered along with the objectives, fees, and expenses before investing.

No investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment.

Equities are subject to market, market sector, market liquidity, issuer, and investment style risks to varying degrees. Small and midsize company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. **Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity.** These risks are generally greater with emerging market countries. **Real Estate** security investments involve similar risks to those associated with direct investments in real estate, including falling property values due to increasing vacancies or declining rents resulting from economic, legal, political, or technological developments, lack of liquidity, limited diversification and sensitivity to certain economic factors such as interest rate changes and market recessions. **Bonds** are subject to interest rate, credit, liquidity, call and market risks, to varying degrees. Generally, all other factors being equal, bond prices are inversely related to interest-rate changes and rate increases can cause price declines. Municipal income may be subject to state and local taxes. Some income may be subject to the federal alternative minimum tax for certain investors. Capital gains, if any, are taxable. **High yield bonds** involve increased credit and liquidity risks than higher rated bonds and are considered speculative in terms of the issuer's ability to pay interest and repay principal on a timely basis. **Commodities** contain heightened risk including market, political, regulatory, and natural conditions, and not be appropriate for all investors. **Currencies** can decline in value relative to a local currency, or, in the case of hedged positions, the local currency will decline relative to the currency being hedged. These risks may increase fund volatility.

Information and opinions presented have been obtained or derived from sources which BNY believed to be reliable, but BNY makes no representation to its accuracy and completeness. BNY accepts no liability for loss arising from use of this material.

BNY may refer clients to certain of its affiliates offering expertise, products and services which may be of interest to the client. Use of an affiliate after such a referral remains the sole decision of the client.

Qualification as a CFA® Charterholder requires:

- A bachelor's degree from an accredited institution or equivalent education or work experience.
- Successful completion of all three exam levels of the CFA® program.
- 48 months of acceptable professional work experience in the investment decision-making process.
- Fulfillment of local society requirements, which vary by society. Entry into a Member's Agreement, a Professional Conduct Statement and any additional documentation requested by CFA® Institute.
- CFA® and Chartered Financial Analyst® are registered trademarks owned by the CFA® Institute.

BNY Advisors is the brand name under which BNY Mellon Advisors, Inc. conducts its investment advisory business. BNY Advisors is an investment adviser registered in the United States under the Investment Advisers Act of 1940 and a subsidiary of The Bank of New York Mellon Corporation. BNY Advisors does not conduct business outside of the United States directly. All BNY Advisors services are offered through the appropriate BNY entity, which then contracts with BNY Advisors for these services. BNYSC is a registered investment adviser and broker-dealer and member of FINRA and SIPC, and is a subsidiary of The Bank of New York Mellon Corporation. BNY Investments is one of the world's leading investment management organizations, encompassing BNY's affiliated investment management firms and global distribution companies. BNY is the corporate brand of The Bank of New York Mellon Corporation and may be used to reference the corporation as a whole and/or its various subsidiaries generally.
